PRAYER FOR RELIEF	387
DEMAND FOR JURY TRIAL	388

Automotive Recycler Plaintiffs (“Plaintiffs” or “Automotive Recyclers”), based on personal knowledge as to themselves, and upon information and belief as to all other matters, allege as follows:

NATURE OF CLAIMS

1. People trust and rely on the manufacturers of motor vehicles and of critical safety devices to make safe products that do not give rise to a clear danger of death or personal injury. An airbag is a critical safety feature of any motor vehicle. Airbags are meant to inflate rapidly during an automobile collision to prevent occupants from striking hard objects in the vehicle, such as the steering wheel, dashboard, or windshield.

2. An airbag supplier must take all necessary steps to ensure that its products—which literally can make the difference between life and death in an accident—function as designed, specified, promised, and intended. Profits must take a back seat to safety for the airbag manufacturer, and also for the automobile manufacturer when it makes its product sourcing decisions.

3. This action concerns defective airbags manufactured by Takata Corporation and its related entities (“Takata”) and equipped in vehicles manufactured, sold, or leased by Defendants Honda, BMW, Chrysler, GM, Mazda, Mercedes-Benz, Nissan, Subaru, Toyota, and Volkswagen and their related entities (collectively the “Vehicle Manufacturer Defendants”). Defendants knowingly misrepresented their vehicles as being safe and deceptively concealed the fact that inflators in their vehicles were prone to aggressively deploy and/or violently explode and maim or kill drivers and passengers.

4. All Takata airbags at issue in this litigation share a common, uniform defect: the use of ammonium nitrate, a notoriously volatile and unstable compound, as the propellant in their

defectively designed inflators (the “Inflator Defect”). The inflator, as its name suggests, is supposed to inflate the airbag upon vehicle impact. In the milliseconds following a crash, the inflator ignites a propellant to produce gas that is released into the airbag cushion, causing the airbag cushion to expand and deploy. The term “airbag” shall be used herein to refer to the entire airbag module, including the inflator.

5. The following basic illustration depicts Takata’s airbag module:

6. In the late 1990s, Takata shelved a safer chemical propellant in favor of ammonium nitrate, a far cheaper and more unstable compound that is much better suited for large demolitions in mining and construction. Indeed, ammonium nitrate is the explosive that Timothy McVeigh and Terry Nichols used in April 1995 to bomb the Alfred P. Murrah Federal Building in downtown Oklahoma City.

7. Under ordinary conditions, including daily temperature swings and contact with moisture in the air, Takata’s ammonium-nitrate propellant transforms and destabilizes, causing

irregular and dangerous behavior ranging from inertness to violent combustion. When Takata decided to abandon the safer propellant in favor of the more dangerous but cheaper one, it was aware of these risks and did so over the objections and concerns of its engineers in Michigan. Tellingly, Takata is the only major airbag manufacturer that uses ammonium nitrate as the primary propellant in its airbag inflators.

8. As a result of the common, uniform Inflator Defect, Takata airbags often fail to perform as they should. Instead of protecting vehicle occupants from bodily injury during accidents, the defective Takata airbags too often aggressively deploy and/or violently explode, sometimes expelling metal debris and shrapnel at vehicle occupants. As of February 2018, Takata airbags have been responsible for at least 22 deaths and hundreds of serious injuries worldwide.

9. When the Vehicle Manufacturer Defendants purchased Takata's airbags for their vehicles, they were aware that the airbags used the volatile and unstable ammonium nitrate as the primary propellant in the inflators.

10. The volatility and instability of Takata's ammonium-nitrate propellant has been underscored by the glaring and persistent quality control problems that have plagued Takata's manufacturing operations.

11. Takata and the Vehicle Manufacturer Defendants first received word of startling airbag failures in the field no later than 2003, when a Takata inflator ruptured in a BMW vehicle in Switzerland. BMW and Takata jointly investigated the incident in one of Takata's Michigan facilities, and inaccurately minimized the incident as an anomaly, without alerting federal safety regulators.

12. Similarly, in 2004, a Takata airbag in a Honda Accord in Alabama exploded, shot out metal shrapnel, and severely injured the car's driver. Honda and Takata investigated the incident and inaccurately minimized it as "an anomaly." Honda did not issue a recall. Neither Honda nor Takata sought the involvement of federal safety regulators.

13. The serious danger posed by the Inflator Defect was not disclosed to U.S. safety regulators until 2008, despite red flags raised by prior Takata airbag ruptures or explosions. It took three additional reports of airbag rupture incidents in 2007 to prompt the 2008 disclosure, and even then, Takata and Honda falsely assured regulators that they needed to recall only approximately 4,000 Honda vehicles, claiming that they had identified all "possible vehicles that could potentially experience the problem."

14. Behind the scenes, however, Takata and Honda were busy conducting tests that revealed far more serious problems. As reported in *The New York Times*, Takata conducted secret tests in 2004, which confirmed that its inflators were defective, and then destroyed those test results to conceal the defect. After a 2007 airbag rupture, Honda began collecting inflators for further testing as well.

15. Tragically, these airbag failures were the first of many to come. Honda and Takata were forced to issue further recalls in 2009, 2010, and 2011, but they did so in a limited and misleading way, apparently in an effort to avoid the huge costs and bad publicity that would have been associated with appropriately sized and broader recalls. Despite the repeated Takata/Honda recalls, and though the other Vehicle Manufacturer Defendants knew their vehicles were also equipped with Takata airbags containing ammonium nitrate, they failed to take reasonable measures to investigate or protect the public.

16. Over a decade after the first incidents of airbag ruptures, Defendants' obfuscation and inaction broke down in the face of mounting incidents and increased scrutiny by regulators, the press, and private plaintiffs. By the middle of 2013, the pace of the recalls increased exponentially as the National Highway Traffic Safety Administration ("NHTSA") began to force Defendants into action. Whereas approximately 3 million vehicles had been recalled up until that point (the vast majority of which were Hondas), the April–May 2013 recalls added 4 million more vehicles to the list, across ten manufacturers. Just one year later, in June 2014, another 5.6 million vehicles were recalled, and by October 2014, global recalls had reached 16.5 million vehicles. As of July 2017, global recalls exceeded 60 million vehicles.

17. Even then, Defendants worked hard to limit the scope of the recalls to humid parts of the country. They strenuously and falsely claimed that the risks caused by the Inflator Defect disappeared to the north of some arbitrary latitude in the American South. And they mischaracterized the Inflator Defect as the product of idiosyncratic manufacturing flaws.

18. By November 2014, in anticipation of a United States Senate hearing to be attended by Takata and the major automakers, NHTSA demanded that the recalls be expanded to the entire country for certain driver side airbags, citing airbag rupture incidents in North Carolina and California. Incredibly, Takata refused, and testified at Congressional hearings that vehicles in non-humid regions were safe, *even as it claimed that it had not yet determined the root cause of the failures.*

19. With additional pressure and public scrutiny, the Vehicle Manufacturer Defendants eventually agreed to NHTSA's demand. At that point, the total number of recalled vehicles escalated to approximately 17 million in the United States and 25 million worldwide.

20. In response to the additional pressure and public scrutiny, Defendants were forced to consult with external explosives and airbag specialists, and performed additional testing on Takata's airbags. This testing confirmed what Defendants already knew: Takata's airbags containing ammonium nitrate were defective and prone to rupture.

21. In light of this testing, Takata was unable to deny the existence of the Inflator Defect any longer. On May 18, 2015, Takata filed four Defect Information Reports ("DIRs") with NHTSA and agreed to a Consent Order regarding its (1) PSDI, PSDI-4, and PSDI-4K driver air bag inflators; (2) SPI passenger air bag inflators; (3) PSPI-L passenger air bag inflators; and (4) PSPI passenger air bag inflators, respectively. After concealing the Inflator Defect for more than a decade, Takata finally admitted that "a defect related to motor vehicle safety may arise in some of the subject inflators." And in testimony presented to Congress following the submission of its DIRs, Takata's representative admitted that the use of ammonium nitrate is a factor that contributes to the tendency of Takata's airbags to rupture, and that as a result, Takata will phase out the use of ammonium nitrate. Still, even Takata's defect admission is inaccurate and misleading, because the Inflator Defect is manifest in each of Takata's inflators containing ammonium nitrate. And shockingly, certain Vehicle Manufacturer Defendants continue to equip new vehicles with inflators containing ammonium nitrate, even after conceding that inflators containing ammonium nitrate create an unacceptable public safety hazard.

22. Further, in its DIRs, Takata acknowledged that the defect is present in inflators that were installed in vehicles as replacement parts through prior recalls, necessitating a second recall of those vehicles.

23. As a result of Takata's admission that its inflators are defective, tens of millions of additional vehicles have been or will be recalled in the United States, pushing the total number

of recalled vehicles nationwide to nearly 44 million with approximately 70 million defective Takata airbags. While Takata has records of which manufacturers it sold defective inflators to, it claims not to have records of which vehicles those inflators were installed in. The Vehicle Manufacturers possess those records, however, and are thus in the process of identifying which vehicles must be recalled based on Takata's DIRs.

24. As a result of Defendants' concealment of the Inflator Defect for more than a decade, the recalls now underway cannot be implemented effectively. Defendants have acknowledged that the process could take several *years* because of supply constraints. Even before the number of recalled vehicles nationwide doubled from approximately 17 million to 34 million, Honda's spokesman acknowledged that "[t]here's simply not enough parts to repair every recalled single car immediately."

25. Even if there were enough airbags, dealers are unable to keep up with the volume of customers rushing to get their Takata airbags replaced. Following the expanded recalls in late 2014, some dealers reported receiving up to *900 calls per day* about the recalls, and told customers that they may have to wait months before airbags can be replaced. And following Takata's submission of the May 18th DIRs, NHTSA's recall website received over one million visits.

26. Consumers are, therefore, in the frightening position of having to drive dangerous vehicles for many months (or even years) while they wait for Defendants to replace the defective airbags in their cars. Some of the Defendants are not providing replacement or loaner vehicles, even though there is an immediate need to provide safe vehicles to consumers. As a result, many consumers are effectively left without a safe vehicle to take them to and from work, to pick up

their children from school or childcare, or, in the most urgent situations, to transport themselves or someone else to a hospital.

27. Even more troubling, many of the replacement airbags that Takata and the vehicle manufacturers are using to “repair” recalled vehicles suffer from the same common, uniform defect that plagues the airbags being removed—they use unstable and dangerous ammonium nitrate as the propellant within the inflator, a fact that Takata’s representative admitted at a Congressional hearing in June 2015. At the Congressional hearing, the Takata representative repeatedly refused to provide assurances that Takata’s replacement airbags are safe and defect-free.

28. Takata and the Vehicle Manufacturer Defendants knew or should have known that the Takata airbags installed in millions of vehicles were defective. Both Takata and the Vehicle Manufacturer Defendants, who concealed their knowledge of the nature and extent of the defect from the public while continuing to advertise their products as safe and reliable, have shown a blatant disregard for public welfare and safety. Moreover, the Vehicle Manufacturer Defendants have violated their affirmative duty, imposed under the Transportation Recall Enhancement, Accountability, and Documentation Act (the “TREAD Act”), to promptly advise customers about known defects.

29. The actions of Defendant Honda have been especially disturbing. Despite the shocking record of injuries and failures in Honda vehicles, Takata and Honda were slow to report the full extent of the danger to drivers and passengers, and they failed to issue appropriate recalls. Honda and Takata provided contradictory and inconsistent explanations to regulators for the Inflator Defect in Takata’s airbags, which led to more confusion and delay. Indeed, the danger of defective airbags and the number of vehicles affected was concealed for years after it

became apparent there was a potentially lethal problem. Although Takata and Honda repeatedly had actual knowledge and/or were on notice of, and failed to fully investigate, the problem and issue proper recalls, they allowed the problem to proliferate and cause numerous injuries and several deaths over the last 15 years.

30. Even before purchasing inflators from Takata, the Vehicle Manufacturer Defendants were aware that Takata used volatile and unstable ammonium nitrate as the primary propellant in its inflators, and thus the Vehicle Manufacturer Defendants were on notice of the Inflator Defect even before they installed the inflators in their vehicles, because Takata reviewed the designs of the inflators with the Vehicle Manufacturers and the Vehicle Manufacturers approved the designs. The Vehicle Manufacturer Defendants were also put on notice of the Inflator Defect no later than 2008, when Honda first notified regulators of a problem with its Takata airbags. Because their vehicles also contained Takata airbags, the Vehicle Manufacturer Defendants knew or should have known at that time that there was a safety problem with their airbags, and the Vehicle Manufacturer Defendants should have launched their own investigations and notified their customers. That responsibility only grew as incidents multiplied.

31. Instead, Defendants put profits ahead of safety. Takata cut corners to build cheaper airbags, and the Vehicle Manufacturer Defendants sold consumers vehicles that they knew or should have known contained those defective airbags. For several years Defendants engaged in a pattern of reckless disregard, deception, concealment, and obfuscation. Only relatively recently – on the heels of media scrutiny – have Defendants begun recalling the millions of vehicles in the United States with the Inflator Defect.

32. As a result of Defendants' misconduct, Plaintiffs and members of the proposed Classes were harmed and suffered actual damages. The defective Takata airbags significantly

diminish the value of the vehicles in which they are installed. Defendants' false representations and omissions concerning the safety and reliability of their vehicles, and their concealment of the known safety defects plaguing those vehicles and their brands, caused Plaintiffs and Class members to purchase and retain vehicles of diminished value. Now, such vehicles have been stigmatized as a result of being recalled and equipped with Takata airbags as well as by the widespread publicity of the Inflator Defect.

33. Further, Plaintiffs and the Classes did not receive the benefit of their bargain; rather, they purchased vehicles that are of a lesser standard, grade, and quality than represented, and they did not receive vehicles that met ordinary and reasonable consumer and business expectations regarding safe and reliable operation. Purchasers of the Class Vehicles paid more than they would have had the Inflator Defect been disclosed. Defendants unjustly benefited from their unconscionable delay in recalling their defective products, as they avoided incurring the costs associated with recalls and installing replacement parts for many years.

34. The defective Takata airbags create a dangerous condition that gives rise to a clear, substantial, and unreasonable danger of death or personal injury.

35. Plaintiff Automotive Recyclers and members of the Classes purchased Class Vehicles and the defective Takata airbags contained in the vehicles, but are now unable to sell the airbags, which are essentially valueless. Had they known the truth about the problems associated with the Inflator Defect, the Automotive Recyclers and class members would not have purchased the Class Vehicles and airbags contained therein or would have paid a reduced amount. Moreover, Automotive Recyclers and class members have suffered economic injury as they incurred additional costs for identifying, storing, maintaining, or otherwise disposing of the defective Takata airbags.

JURISDICTION AND VENUE

36. Jurisdiction is proper in this Court pursuant to the Class Action Fairness Act, 28 U.S.C. § 1332(d), because members of the proposed Plaintiff Class are citizens of states different from Defendants' home states, and the aggregate amount in controversy exceeds \$5,000,000, exclusive of interest and costs. Also, jurisdiction is proper in this Court pursuant to 28 U.S.C. § 1331, because Plaintiffs' RICO claims arise under federal law, and pursuant to 15 U.S.C. § 1121 for Plaintiffs' Lanham Act claims. This Court has supplemental jurisdiction over Plaintiffs' state law claims under 28 U.S.C. § 1367.

37. This Court has personal jurisdiction over Plaintiffs because Plaintiffs submit to the Court's jurisdiction.

38. This Court has personal jurisdiction over Defendants pursuant to Florida Statutes § 48.193(1)(a)(1), (2), and (6), because they conduct substantial business in this District; some of the actions giving rise to the Complaint took place in this District; and some of Plaintiffs' claims arise out of Defendants operating, conducting, engaging in, or carrying on a business or business venture in this state or having an office or agency in this state, committing a tortious act in this state, and causing injury to property in this state arising out of Defendants' acts and omissions outside this state; and at or about the time of such injuries Defendants were engaged in solicitation or service activities within this state, or products, materials, or things processed, serviced, or manufactured by Defendants anywhere were used or consumed within this state in the ordinary course of commerce, trade, or use. This Court also has personal jurisdiction over Defendants who waived any right to contest personal jurisdiction by declining to raise an objection to personal jurisdiction in their prior Rule 12 motions. This Court also has personal jurisdiction over Defendants because they consented to jurisdiction by registering to do business

in Florida. This Court has pendant or supplemental personal jurisdiction over the claims of non-Florida Plaintiffs.

39. This Court also has personal jurisdiction over the Defendants under 18 U.S.C. § 1965 because they are found or have agents or transact business in this District.

40. This Court also has personal jurisdiction over the Defendants, because transferor courts that have transferred actions to this MDL have general jurisdiction over the Defendants, and this Court, under 28 U.S.C. § 1407, has personal jurisdiction over Defendants to the same extent as any transferor court has personal jurisdiction over them. These transferor courts are located in the states in which each of the Defendants are respectively headquartered, and thus this Court may exercise general jurisdiction over Defendants. To the extent necessary for personal jurisdiction purposes, any claims asserted by non-Florida Plaintiffs in this First Amended Consolidated Class Action Complaint may be deemed to have been filed in a transferor court that may exercise personal jurisdiction over Defendants for such claims.

41. Venue is proper in this Court pursuant to 28 U.S.C. § 1391(a) because a substantial part of the events or omissions giving rise to these claims occurred in this District, Defendants have caused harm to Class members residing in this District, and Defendants are residents of this District under 28 U.S.C. § 1391(c)(2) because they are subject to personal jurisdiction in this district. Also, venue is proper in this district pursuant to 18 U.S.C. § 1965 and 28 U.S.C. § 1407.

I. Vehicle Manufacturer Defendants

42. Defendant Honda Motor Co., Ltd. (“Honda Motor”) is a foreign for-profit corporation with its principal place of business in Tokyo, Japan. Honda Motor manufactures and

sells motorcycles, automobiles, and power products through independent retail dealers, outlets, and authorized dealerships primarily in Japan, North America, Europe, and Asia.

43. Defendant American Honda Motor Co., Inc. (“American Honda”) is a subsidiary of Honda Motor headquartered in Torrance, California. American Honda conducts the sale, marketing, and operational activities for Honda cars, trucks, sport utility vehicles, and automobile parts in the United States. American Honda manufactures and assembles its vehicles for sale in the United States in automobile plants located in Greensburg, Indiana; East Liberty, Ohio; Lincoln, Alabama; and Marysville, Ohio.

44. Defendant Honda of America Mfg Inc. (“Honda Mfg”) is an Ohio corporation with its principal place of business in Marysville, Ohio. Honda Mfg is a subsidiary of Honda Motor. Honda Mfg is involved in the design, manufacture, testing, marketing, distribution and sale of Honda vehicles in the United States, including those utilizing Takata airbags.

45. Defendant Honda R&D Co. Ltd. (“Honda R & D”) is a Japanese corporation with its principal place of business in Wako, Japan. Honda R&D is a subsidiary of Honda Motor. Honda R&D is involved in the design, development, manufacture, assembly, testing, distribution and sale of Honda vehicles, including those utilizing Takata airbags.

46. Defendants Honda Motor, Honda Mfg, Honda R&D, and American Honda are collectively referred to as “Honda” or “Honda Defendants.” Honda vehicles sold in the United States contain defective airbags manufactured by Takata. The Honda Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

47. Defendant Bayerische Motoren Werke AG (“BMW AG”) is a German holding company and automobile manufacturer. BMW AG is headquartered in Munich, Bavaria,

Germany. BMW Group is a subsidiary of BMW AG and is also headquartered in Munich. BMW AG, together with its subsidiaries, develops, manufactures, and sells cars and motorcycles worldwide.

48. Defendant BMW of North America, LLC (“BMW North America”) is a subsidiary of BMW AG and is headquartered in Woodcliff Lake, New Jersey. BMW of North America is the United States importer of BMW vehicles.

49. Defendant BMW Manufacturing Co., LLC (“BMW Manufacturing”) is a Delaware limited liability company with its principal place of business in Spartanburg, South Carolina. BMW Manufacturing is a subsidiary of BMW AG. BMW Manufacturing is involved in the design, manufacture and testing in the United States of BMW vehicles.

50. Defendants BMW AG, BMW Manufacturing, and BMW North America are collectively referred to as “BMW” or “BMW Defendants.” BMW vehicles sold in the United States contain defective airbags manufactured by Takata. The BMW Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

51. FCA US LLC (“New Chrysler”), formerly known as Chrysler Group LLC, is a Delaware limited liability company with its principal place of business located at 1000 Chrysler Drive, Auburn Hills, Michigan and New Chrysler is a citizen of the States of Delaware and Michigan. The sole owner of New Chrysler is Fiat Chrysler Automobiles N.V., a public limited liability company incorporated under the laws of the Netherlands with its principal place of business located in London, United Kingdom.

52. New Chrysler was created on or about June 1, 2009, in connection with the sale of substantially all of the assets of Chrysler LLC (“Old Chrysler”), pursuant to a Sale Motion and

Purchase Agreement (“Chrysler Sale Agreement”) approved by the United States Bankruptcy Court for the Southern District of New York under Section 363 of the U.S. Bankruptcy Code (the “Chrysler 363 Sale”). As a result of the Chrysler 363 Sale, New Chrysler acquired substantially all of Old Chrysler’s books, records, and personnel and knowledge of the defective Takata airbags those books, records, and personnel held. New Chrysler also took responsibility for any necessary recalls of both New and Old Chrysler vehicles going forward. The causes of action in this Complaint against New Chrysler are directed solely to New Chrysler and are based solely on New Chrysler’s wrongful conduct.

53. Chrysler vehicles sold in the United States by New Chrysler contain defective airbags manufactured by Takata. New Chrysler delivers these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

54. General Motors LLC (“New GM”) is a Delaware limited liability company with its principal place of business located at 300 Renaissance Center, Detroit, Michigan, and is a citizen of the States of Delaware and Michigan. The sole member and owner of New GM is General Motors Holdings LLC.

55. General Motors Holdings LLC (“GM Holdings”) is a Delaware limited liability company with its principal place of business in Detroit, Michigan, and is a citizen of the States of Delaware and Michigan. The sole member and owner of GM Holdings is General Motors Company.

56. General Motors Company (“GM Parent”) is a Delaware corporation with its principal place of business in Detroit, Michigan, and is a citizen of the States of Delaware and Michigan. GM Parent’s only asset is 100% ownership interest in GM Holdings. In SEC filings,

GM Parent states: “We [defined as GM Parent] design, build and sell cars, trucks, crossovers and automobile parents worldwide.” According to SEC filings, GM Parent sells vehicles “through [its] dealer network to retail customers.” As stated in SEC filings, GM Parent is also responsible for determining when a recall should be conducted and for making reports to NHTSA.

57. GM Parent and GM Holdings have complete domination and control over New GM.

58. New GM, GM Parent, and GM Holdings are collectively referred to as the “GM Defendants.”

59. The GM Defendants were created on or about July 10, 2009, in connection with the sale of substantially all of the assets of General Motors Corporation (“Old GM”) pursuant to a Master Sale and Purchase Agreement (“GM Sale Agreement”) approved by the United States Bankruptcy Court for the Southern District of New York under Section 363 of the U.S. Bankruptcy Code (the “GM 363 Sale”). As a result of the GM 363 Sale, New GM acquired substantially all of Old GM’s books, records, and personnel, including Rita Kauppi (Global Commodity Manager for Airbags), Leo Knowlden (Lead Engineer for Inflators), and Tony Popovski (Global Purchasing Manager for Airbags)—all of whom had specific knowledge of the defective Takata airbags. New GM then transferred some of these assets to GM Holdings. Defendants thereby acquired from Old GM knowledge about the defective Takata airbags that those books, records, and personnel held. GM Parent and New GM also took responsibility for any necessary recalls of both New and Old GM vehicles going forward. The causes of action in this Complaint against the GM Defendants are directed solely to GM Parent, GM Holdings, and New GM and are based solely on their wrongful conduct.

60. GM vehicles sold in the United States by the GM Defendants contain defective airbags manufactured by Takata. The GM Defendants delivered these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

61. Defendant Mazda Corporation, along with its subsidiaries, develops, manufactures, and sells automotive vehicles worldwide. Mazda's global headquarters are located in Hiroshima, Japan.

62. Defendant Mazda Motor of America, Inc. doing business as Mazda North American Operations ("Mazda North American"), a subsidiary of Mazda, is a California corporation with its corporate headquarters located in Irvine, California. Mazda North American is responsible for the distribution, marketing and sales of Mazda brand automobiles in the United States.

63. Defendants Mazda and Mazda North American are collectively referred to as "Mazda" or the "Mazda Defendants." Mazda vehicles sold in the United States contain defective airbags manufactured by Takata. The Mazda Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

64. Daimler Aktiengesellschaft ("Daimler AG") is a foreign corporation headquartered in Stuttgart, Baden-Württemberg, Germany. Daimler AG is in the business of designing, developing, manufacturing, marketing, and selling luxury automobiles.

65. Mercedes-Benz USA, LLC ("MBUSA") is a Delaware limited liability corporation, whose principal place of business is 303 Perimeter Center North, Suite 202, Atlanta, Georgia 30346. Until approximately July 2015, Mercedes's principal place of business was 1

Mercedes Drive, Montvale, New Jersey 07645. Daimler AG is the parent corporation of MBUSA. Daimler AG and MBUSA are collectively referred to as “Mercedes” or “Mercedes Defendants.” The Mercedes Defendants engineered, designed, developed, manufactured, or installed the Defective Airbags in the Mercedes-branded Class Vehicles, and approved the Defective Airbags for use in those vehicles. The Mercedes Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida. They also developed, reviewed, and approved the marketing and advertising campaigns designed to sell these Class Vehicles.

66. Defendant Nissan Motor Company, Ltd. (“Nissan”), along with its subsidiaries, develops, manufactures, and sells automotive vehicles worldwide. Nissan’s global headquarters are located in Yokohama, Japan.

67. Defendant Nissan North America, Inc. (“Nissan North America”), a subsidiary of Nissan, is a California corporation with its corporate headquarters located in Franklin, Tennessee. Nissan North America is responsible for the distribution, marketing and sales of Nissan and Infiniti brand automobiles in the United States.

68. Defendants Nissan and Nissan North America are collectively referred to as “Nissan” or the “Nissan Defendants.” Nissan vehicles sold in the United States contain defective airbags manufactured by Takata. The Nissan Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

69. Defendant Fuji Heavy Industries (“Fuji”), the parent company of Subaru, is a transportation conglomerate. Along with its subsidiaries, Fuji develops, manufactures, and sells automotive vehicles worldwide. Fuji’s global headquarters are located in Tokyo, Japan.

70. Defendant Subaru of America, Inc. (“Subaru America”), a subsidiary of Fuji, is a New Jersey corporation with its corporate headquarters located in Cherry Hill, New Jersey. Subaru of America is responsible for the distribution, marketing and sales of Subaru brand automobiles in the United States.

71. Defendants Fuji and Subaru America are collectively referred to as “Subaru” or the “Subaru Defendants.” Subaru vehicles sold in the United States contain defective airbags manufactured by Takata. The Subaru Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

72. Defendant Toyota Motor Corporation (“Toyota”) is the world’s largest automaker and the largest seller of automobiles in the United States. Toyota is a Japanese Corporation headquartered in Toyota City, Aichi Prefecture, Japan.

73. Defendant Toyota Motor Sales, U.S.A., Inc. (“Toyota U.S.A.”) is a wholly-owned subsidiary of Toyota Motor Corporation and is responsible for the marketing, sales, and distribution in the United States of automobiles manufactured by Toyota Motor Corporation. Toyota U.S.A. is headquartered in Torrance, California and is a subsidiary of Toyota Motor Corporation.

74. Toyota Motor Engineering & Manufacturing North America, Inc. (“TEMA”) is headquartered in Erlanger, Kentucky with major operations in Arizona, California, and Michigan. TEMA is responsible for Toyota’s engineering design and development, research and development, and manufacturing activities in the U.S., Mexico, and Canada. TEMA is a subsidiary of Toyota Motor Corporation.

75. Defendants Toyota, Toyota U.S.A., and TEMA are collectively referred to as “Toyota” or the “Toyota Defendants.” Toyota vehicles sold in the United States contain defective airbags manufactured by Takata. The Toyota Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida.

76. Volkswagen Aktiengesellschaft (“VW AG”) is a German corporation with its principal place of business in Wolfsburg, Germany. VW AG is one of the largest automobile manufacturers in the world, and is in the business of designing, developing, manufacturing, marketing, and selling automobiles. VW AG is the parent corporation of Audi AG.

77. Volkswagen Group of America (“VW America”) is a New Jersey corporation doing business throughout the United States. VW America’s corporate headquarters is located in Herndon, Virginia. VW America is a wholly-owned U.S. subsidiary of VW AG, and it engages in business activities in furtherance of the interests of VW AG, including the advertising, marketing and sale of Volkswagen automobiles worldwide.

78. Audi Aktiengesellschaft (“Audi AG”) is a German corporation with its principal place of business in Ingolstadt, Germany. Audi AG is the parent of Audi of America, LLC, and a subsidiary of the Audi Group, which is a wholly-owned subsidiary of VW AG. Audi AG designs, develops, manufactures, and sells luxury automobiles.

79. Audi of America, LLC (“Audi America”) is a Delaware limited liability company, with its principal place of business located at 2200 Ferdinand Porsche Drive, Herndon, Virginia 20171. Audi America is a wholly-owned U.S. subsidiary of Audi AG, and it engages in business, including the advertising, marketing and sale of Audi automobiles, in all 50 states.

80. As used in this Complaint, “Audi” and “Audi Defendants” refers to Audi AG and Audi America. “Volkswagen” and “Volkswagen Defendants” refers to VW AG, VW America, Audi AG, and Audi America.

81. The Volkswagen Defendants engineered, designed, developed, manufactured, or installed the Defective Airbags in the Volkswagen- and Audi-branded Class Vehicles (defined below), and approved the Defective Airbags for use in those vehicles. The Volkswagen Defendants deliver these products into the stream of commerce with the expectation that they will be purchased by consumers in the United States and the State of Florida. They also developed, reviewed, and approved the marketing and advertising campaigns designed to sell these Class Vehicles.

82. Collectively, these parties are referred to as the “Vehicle Manufacturer Defendants.”

II. Plaintiffs

83. Butler Auto Recycling, Inc. (“Butler”) is an automotive parts recycler and Florida corporation with its principal place of business at 6401 N. Palafox St., Pensacola, FL 32503. Prior to the recalls set forth herein, Butler purchased Class Vehicles, as defined below, containing Takata airbags. Butler purchased these Takata airbags for purposes of resale. Had Butler known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

84. Cunningham Brothers Auto Parts, LLC (“Cunningham”) is an automotive parts recycler and Delaware limited liability company with its principal place of business at 10980 Wards Rd., Rustburg, VA 24588. Prior to the recalls set forth herein, Cunningham purchased Class Vehicles, as defined below, containing Takata airbags. Cunningham purchased these

Takata airbags for purposes of resale. Had Cunningham known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

85. Midway Auto Parts LLC (“Midway”) is an automotive parts recycler and Delaware limited liability company with its principal place of business at 4210 Gardner Ave., Kansas City, MO 64120. Prior to the recalls set forth herein, Midway purchased Class Vehicles, as defined below, containing Takata airbags. Midway purchased these Takata airbags for purposes of resale. Had Midway known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

86. Road Tested Parts, Inc. d/b/a WeaverParts.com (“Weaver”) is an automotive parts recycler and Georgia corporation with a principal place of business at 774 Highway 320, Carnesville, GA 30521. Weaver also has a substantial business operation at 9001 Stitt St., Monroe, NC 28110. Prior to the recalls set forth herein, Weaver purchased Class Vehicles, as defined below, containing Takata airbags. Weaver purchased these Takata airbags for purposes of resale. Had Weaver known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

87. Snyder’s Ltd. (“Snyder’s”) is an automotive parts recycler and Texas corporation with its principal place of business at 24549 State Hwy. 95, Holland, Texas 76534. Prior to the recalls set forth herein, Snyder’s purchased Class Vehicles, as defined below, containing Takata airbags. Snyder’s purchased these Takata airbags for purposes of resale. Had Snyder’s known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

88. Triple D Corporation d/b/a Knox Auto Parts (“Knox”) is an automotive parts recycler and Tennessee corporation with its principal place of business at 8721 Oakridge Hwy.,

Knoxville, TN 37931. Prior to the recalls set forth herein, Knox purchased Class Vehicles, as defined below, containing Takata airbags. Knox purchased these Takata airbags for purposes of resale. Had Knox known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

89. Automotive Dismantlers and Recyclers Association, Inc. d/b/a Automotive Recyclers Association (“ARA”) is incorporated in New York with its principal place of business in Virginia. ARA is an international trade association of businesses dedicated to the efficient removal and reuse of automotive parts, and the safe disposal of inoperable motor vehicles. ARA directly services approximately 1,050 member companies and approximately 3,500 additional companies through affiliated organizations.

- a. ARA proceeds with this litigation pursuant to an assignment of claims by Rigsby’s Auto Parts & Sales, Inc., and Quarno’s Auto Salvage (collectively the “Assignors”).
- b. Rigsby’s Auto Parts & Sales, Inc. (“Rigsby’s”) is an automotive parts recycler and Florida corporation with its principal place of business at 40147 Lynbrook Drive, Zephyrhills, Florida 33540. Prior to the recalls set forth herein, Rigsby’s purchased Class Vehicles, as defined below, containing Takata airbags. Rigsby’s still purchased these Takata airbags for purposes of resale. Had Rigsby’s known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.
- c. Quarno’s Auto Salvage (“Quarno’s”) is an automotive parts recycler with its principal place of business at 550 Quarno Road, Cocoa, Florida 32927-4840. Prior to the recalls set forth herein, Quarno’s purchased Class Vehicles, as defined

below, containing Takata airbags. Quarno's purchased these Takata airbags for purposes of resale. Had Quarno's known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

90. Young's Auto Center and Salvage, LP ("Young's") is an automotive parts recycler and North Carolina limited partnership with its principal place of business at 2500 N.C. Highway 242 South, Benson, NC 27504. Prior to the recalls set forth herein, Young's purchased Class Vehicles, as defined below, containing Takata airbags. Young's purchased these Takata airbags for purposes of resale. Had Young's known of the Inflator Defect, it would not have purchased the Class Vehicles or it would not have paid as much for them as it did.

91. Butler, Cunningham, Knox, Midway, Snyder's, Weaver, ARA, and Young's are collectively referred to as "Plaintiffs" or "Automotive Recycler Plaintiffs."

GENERAL FACTUAL ALLEGATIONS

I. Definitions

92. Plaintiffs bring this action on behalf of themselves and all persons similarly situated who purchased Class Vehicles (defined below). Plaintiffs seek redress individually and on behalf of those similarly situated for economic losses stemming from Defendants' manufacture, sale or lease, and false representations and omissions concerning the Defective Airbags in the Class Vehicles, including but not limited to diminished value. Plaintiffs, on behalf of themselves and those similarly situated, seek to recover damages and statutory penalties, and injunctive relief/equitable relief.

93. "Defective Airbags" refers to all airbag modules (including inflators) manufactured by Takata ("Takata airbags") that use propellant containing ammonium nitrate in their inflators (the "Inflator Defect"), including (a) all airbags that are subject to the recalls

identified in the table set forth in paragraph 97, *infra*; (b) all Takata airbags subject to recalls relating to Takata's May 18, 2015 DIRs, the Coordinated Remedy Order issued by NHTSA in *In re Docket No. NHTSA-2015-0055 Coordinated Remedy Program Proceeding*, and amendments thereto, concerning Takata's ammonium-nitrate inflators, and the Consent Order issued by NHTSA in *In re EA 15-001 Air Bag Inflator Rupture*, and any amendments thereto; and (c) all Takata airbags subject to any subsequent expansion of pre-existing recalls, new recalls, amendments to pre-existing DIRs, or new DIRs, announced prior to the date of an order granting class certification, relating to the tendency of such airbags to over-aggressively deploy or rupture. All Defective Airbags contain the Inflator Defect. As a result of the Inflator Defect, Defective Airbags have an unreasonably dangerous tendency to: (a) rupture and expel metal shrapnel that tears through the airbag and poses a threat of serious injury or death to occupants; and/or (b) hyper-aggressively deploy and seriously injure occupants through contact with the airbag.

94. With respect to all Defendants except New Chrysler and GM, "Class Vehicles" refers to all vehicles purchased in the United States that have Defective Airbags.

95. With respect to New Chrysler, "Class Vehicles" refers to all vehicles in the United States that have Defective Airbags that were: (1) manufactured, sold, or distributed by New Chrysler; or (2) manufactured, sold, or distributed by Old Chrysler and purchased by a Class member after June 1, 2009.

96. With respect to the GM Defendants, "Class Vehicles" refers to all vehicles in the United States that have Defective Airbags that were (1) manufactured, sold, or distributed by the GM Defendants or (2) manufactured, sold, or distributed by Old GM and purchased by a Plaintiff or Class member after July 10, 2009.

97. As detailed in this Complaint, over the course of nine years Takata and the Vehicle Manufacturer Defendants have issued a series of partial, misleading, and ultimately ineffective recalls to address the Defective Airbags. The following table identifies, to the best of Plaintiffs' understanding and without the benefit of discovery, the recalled vehicles by manufacturer, and which of the airbags are included in the recall for each vehicle (driver, passenger, or both):

Manufacturer	Recall	Make	Model	Model Years	Side(s)	Zone ¹
BMW	13V172	BMW	325Ci	2002-2003	Passenger	N/A
BMW	13V172	BMW	325i	2002-2003	Passenger	N/A
BMW	13V172	BMW	325iT	2002-2003	Passenger	N/A
BMW	13V172	BMW	325xi	2002-2003	Passenger	N/A
BMW	13V172	BMW	325xiT	2002-2003	Passenger	N/A

BMW	13V172	BMW	330xi Sedan	2002-2003	Passenger	N/A
BMW	13V172	BMW	M3 Convertible	2002-2003	Passenger	N/A
BMW	13V172	BMW	M3 Coupe	2002-2003	Passenger	N/A
BMW	14V348	BMW	325i	2004-2006	Both	N/A
BMW	14V348	BMW	325xi	2004-2005	Both	N/A

¹ In its original Coordinated Remedy Order, dated November 3, 2015, NHTSA prioritized recalls in the "High Absolute Humidity" Zone ("HAH"). Each Vehicle Manufacturer was permitted to define its own HAH Zone, provided that it included at a minimum all vehicles ever sold or registered in Alabama, Florida, Georgia, Hawaii, Louisiana, Mississippi, Texas, Puerto Rico, American Samoa, Guam, Saipan, and the U.S. Virgin Islands. The Non-HAH Zone included all other states and the District of Columbia.

In May 2016, converted the HAH and Non-HAH Zones into three new zones:

- a. Zone A includes all former HAH areas, plus California and South Carolina;
- b. Zone B includes Arizona, Arkansas, Delaware, District of Columbia, Illinois, Indiana, Kansas, Kentucky, Maryland, Missouri, Nebraska, Nevada, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Virginia, and West Virginia;
- c. Zone C includes Alaska, Colorado, Connecticut, Idaho, Iowa, Maine, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, New York, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Vermont, Washington, Wisconsin and Wyoming.

Some recalls are not limited by zone because they were initiated before NHTSA's creation of zones in November 2015, or because they apply nationwide (*e.g.*, recalls of replacement inflators).

98. In addition to the recalls listed in the table above, there are many future recalls required by NHTSA that have not yet been announced by the manufacturers. These future recalls include model years 2013 and later in Zone A and model years 2009 and later in Zone C. The future recalls apply to all manufacturers and will continue through December 2019.³

I. Takata is a Major Manufacturer of Airbags and Inflators

99. Takata was the world's second largest manufacturer of automotive safety devices, including airbags. Takata was one of the first companies to market driver-side airbags in the early 1980s.

³ See Amended Annex A and <https://www.nhtsa.gov/takata-air-bags/takata-recall-expansion-what-consumers-need-know>.

100. Takata has supplied airbags to automakers for U.S. vehicles and to state and local governmental purchasers since at least 1983. By 2014, Takata had captured 22 percent of the global automotive airbag market.

101. Takata manufactured, distributed, and sold Defective Airbags that can cause serious bodily injury or death; and intentionally concealed the foregoing from Plaintiffs, Class members, and federal regulators.

II. Takata's Airbags Have A Common, Uniform Defect

A. Takata Recklessly Chose An Inexpensive and Dangerous Propellant

102. The part of the airbag at issue in this matter is the inflator. The inflator consists of a metal canister loaded with propellant wafers or pellets, and is placed in the airbag module. Upon impact, the propellant wafers or pellets ignite, triggering a chemical reaction that produces gas, which in turn inflates the fabric airbag. This process occurs within milliseconds.

103. The following basic illustration, included earlier in the complaint as well, depicts Takata's airbag module:

104. When it began manufacturing airbags in the 1980s, Takata used a compound called sodium azide as the propellant within its inflators. In the mid-1990s, Takata began using a different propellant called 5-aminotetrazole, in part due to toxicity issues associated with sodium azide.

105. In the late-1990s, Takata's managers pressured its engineers in Michigan to devise a lower cost propellant based upon ammonium nitrate, a compound used in fertilizer and explosives. Ammonium nitrate is a dangerous material that should not be used in airbags. It is an inherently volatile and unstable chemical.

106. Daily temperature swings are large enough for the ammonium nitrate to cycle through three of its five crystalline states, adding to its volatility. It also readily absorbs moisture from the atmosphere. The chemical's sensitivity to temperature and moisture cause it to break

down over time, which in turn results in violent detonation. As one explosives expert bluntly stated in *The New York Times*, ammonium nitrate “shouldn’t be used in airbags,” and is better suited to large demolitions in mining and construction.

107. From the time it began investigating ammonium nitrate in the late 1990s, Takata understood these risks. Indeed, Takata expressed concern in a patent document in 1996 that an ammonium-nitrate propellant would be vulnerable to temperature changes and that its casing “might even blow up.” Takata further recognized that “[o]ne of the major problems with the use of ammonium nitrate is that it undergoes several crystalline phase changes,” one of which occurs at approximately 90 degrees Fahrenheit. If ammonium nitrate undergoes this type of temperature change, the compound may “expand and contract and change shape resulting in growth and cracking” of the propellant, which might cause an airbag inflator to “not operate properly or *might even blow up* because of the excess pressure generated” (emphasis added).

108. Takata further admitted in a patent document from 1999 that pure ammonium nitrate is “problematic” because many gas generating compositions made with it are “thermally unstable.”

109. In 1999, as the ammonium nitrate design was being considered, Takata’s engineering team in Moses Lake, Washington, raised objections and pointed to a publicly available explosives manuals that warned of the risk of disintegration and irregular, overly-energetic combustion. As one former Takata engineer noted, “ammonium nitrate stuck out like a sore thumb,” and yet his team was given only “a couple days” to do its review.

110. Not surprisingly, other major airbag manufacturers, including Autoliv, Key Safety Systems, and TRW Automotive, have reportedly avoided or abandoned using ammonium nitrate as a propellant. Indeed, Takata’s representative confirmed at a Congressional hearing in June

2015 that Takata is the only major airbag manufacturer that uses ammonium nitrate as a primary propellant in its inflators.

111. The only conceivable advantage to the compound for an airbag manufacturer, according to the expert quoted in *The New York Times*, is that it is “cheap, unbelievably cheap.” Indeed, Takata had originally planned to use tetrazole as its propellant, which is not only more stable than ammonium nitrate, but also yields other desired benefits, such as being more environmentally friendly. But tetrazole was too expensive for Takata, and executives ultimately pressured engineers in Michigan to develop a cheaper alternative.

112. Takata began receiving complaints regarding the Inflator Defect shortly after introducing the redesigned airbag to the market, and those complaints continued to multiply over the years. Nevertheless, rather than switch to the compound it knew would be safer, even if more expensive, Takata recklessly opted to try, over the course of many years, to stabilize a compound that resists stabilization.

113. For example, in a 2006 patent application, Takata discussed the need to test the performance of ammonium nitrate at various extreme temperatures because it is an unstable chemical, and these tests could reveal many problems, including “over-pressurization of the inflator leading to rupture.” The 2006 patent document purportedly contained a fix for that sort of rupturing.

114. Notably, the alleged fix in 2006 came *after* a rupture incident in 2004 that caused a serious injury, and incidents continued to mount after that time as well.

115. In a 2007 patent for allegedly phase stabilized ammonium nitrate that incorporates a scavenging additive designed to retain moisture in an effort to prevent these catastrophic ruptures, Takata representatives noted the following:

Without the addition of the [additive], and as shown in [the patent], the ballistic curves indicate that changes occurred in the gas generant after 50 cycles. After 100 cycles the ballistic performance was very aggressive and did not meet USCAR specification. After 200 cycles the ballistic performance was so aggressive the ballistic performance was so aggressive that the inflator ruptured due to extremely high internal pressures.

116. Thus, Takata's inflators were "grenades" in the glove box or steering wheel waiting to detonate after going through 100 or 200 cycles of thermal cycling, which, of course, is something cars in the real world will eventually do.

117. The use of this additive (or any other) designed to address ammonium nitrate's hygroscopic nature (affinity for moisture) is, at best, a temporary fix because at some point the additive will no longer be able to absorb the excess moisture and the ballistic curves will again exceed specification leading to ruptures.

118. Takata submitted a patent application with other purported "fixes" as recently as 2013. These ongoing, albeit unsuccessful, efforts show that Takata knew throughout the relevant period that its airbags were defective.

B. The Risks of the Inflator Defect Were Exacerbated by Takata's and Defendants' Abysmal Quality Control

119. Takata and the Vehicle Manufacturer Defendants became further aware of the instability of its ammonium-nitrate propellant from the persistent and glaring quality control problems Takata encountered in its manufacturing operations. The Takata plants that manufactured the airbags and inflators at issue in this Complaint include plants located in Moses Lake, Washington, LaGrange, Georgia, and Monclova, Mexico. Defendants routinely visited and audited Takata operations, including in response to quality and safety concerns.

120. Starting in 2001, engineers at Takata's Monclova, Mexico plant identified a range of problems, including rust, which they said could have caused inflators to fail. Between 2001 and 2003, Takata struggled with at least 45 different inflator problems, according to dozens of

internal reports titled “potential failures” and reviewed by *Reuters*. On at least three occasions between 2005 and 2006, Takata engineers struggled to eliminate leaks found in inflators, according to engineering presentations. In 2005, Shainin, a U.S. consulting firm, found a pattern of additional problems.

121. Underscoring Takata’s reckless use of the volatile and unstable ammonium nitrate, on March 31, 2006, the Monclova, Mexico plant was rocked by violent explosions in containers loaded with propellant. The Vehicle Manufacturer Defendants were made aware of this incident soon after it occurred.

122. Apparently, not even that terrible accident could prompt serious and lasting improvements: in a February 2007 email to multiple colleagues, one manager stated that “[t]he whole situation makes me sick,” referring to Takata’s failure to implement checks it had introduced to try to keep the airbags containing the unstable and volatile ammonium-nitrate propellant from failing.

123. Takata engineers also scrambled as late as 2009 to address its propellant issues after “inflators tested from multiple propellant lots showed aggressive ballistics,” according to an internal presentation in June 2009.

124. Based on internal Takata documents, Takata was struggling to meet a surge in demand for its airbags. Putting profits ahead of safety, Takata exhibited shoddy and reckless behavior in the handling of its ammonium-nitrate propellant. In March 2011, a Takata supervisor at the Monclova, Mexico plant sent an e-mail to other employees stating “A part that is not welded = one life less, which shows we are not fulfilling the mission.” The title of the e-mail was “Defectos y defectos y defectos!!!!” This shoddy and reckless attitude permeated all of Takata’s operations and facilities.

125. Yet handling problems at Takata facilities persisted: another manager urged employees to examine the propellant visible in a cross section of an airbag inflator, noting that “[t]he propellant arrangement inside is what can be damaged when the airbags are dropped. . . . Here you can see why it is important to handle our product properly.” A 2009 presentation of guidelines on handling inflators and airbag units also stressed the dangers of mishandling them. The presentation included a link to a video that appeared to show side-curtain airbags deploying violently, sending the inflator hurtling into the car’s cabin.

126. Despite knowing it was shipping potentially deadly products, including inflators containing unstable and volatile ammonium-nitrate propellant, Takata resisted taking back damaged or wet airbag modules, in part because Takata struggled to keep up with a surge in demand for its airbags through the early and mid-2000s as it won big new clients like Old GM.

127. Moreover, while Defendants, and particularly Takata, had previously assured the public that the Defective Airbags had been remedied and that the new airbags being placed in recalled vehicles were safe, in fact, several Vehicle Manufacturer Defendants have been or will be required to recall model year 2013, 2014, 2015, and 2016 vehicles because of the risk of the Takata airbags rupturing. And Takata has now admitted that replacement airbags installed in recalled vehicles are defective as well, and cannot assure the public that replacement inflators containing ammonium nitrate are safe and not prone to rupture.

III. Takata Airbag Failures and Defendants’ Inadequate Response

A. 2003-2008: Early Incidents and the 2008 Honda Recall (08V-593)

128. Honda was among the first automakers to use Takata’s new airbags. Honda and Takata began discussing inflators with ammonium-nitrate propellant as early as 1998, and Honda first installed such inflators in its 2001 Model Year vehicles. Since then, Takata airbags

containing the Inflator Defect have been installed in vehicles manufactured by at least ten automakers.

129. On November 1, 2003, Charlene Weaver of Arizona—one of the least humid states in the country—was a passenger in a 2004 Subaru Impreza when she was killed in a Takata airbag-related accident. As summarized in a later section of this Complaint, her car was not recalled until May 2015, more than a decade later.

130. Also in 2003, an inflator ruptured in a BMW in Switzerland, prompting a January 2004 investigation by Takata and BMW. That investigation took place at a Takata facility in Michigan and involved inflators sold to BMW, Honda, and Toyota. The testing was ordered by a senior Takata executive, and the results indicated that the inflators were defective. Takata confirmed this in a Defect Information Report to NHTSA more than a decade later.

131. In 2004, a Takata airbag violently exploded in a Honda Accord in Alabama, shooting out metal fragments and injuring the car's driver. Honda was notified of the incident, and at least one Takata employee recalled being told that Honda examined the part before turning it over to Takata. Takata reported back to Honda that it was unable to find a cause for the incident. Ultimately, the companies deemed the incident "an anomaly," and conducted no further investigation or analysis to the public's knowledge. Notably, Honda and Takata did not issue a recall or even involve federal safety regulators beyond completing a reporting form in a cursory and incomplete manner.

132. Yet, by this time, Takata was aware of the broad problems associated with its choice of the unstable and volatile ammonium nitrate as a propellant. As noted above, between 2001 and 2003, internal Takata reports titled "potential failures" showed that Takata struggled with at least 45 different inflator problems, and that, in 2002, the Monclova, Mexico plant

recorded 60 to 80 defects for every million inflators shipped to automakers—six to eight times beyond Takata's own quality control limit.

133. In June and August of 2007, Honda notified Takata of three additional airbag explosion incidents. All three accidents involved metal fragments propelling into the faces and bodies of car passengers upon deployment of the airbags. As with the 2004 incident, Honda did not initiate a recall or provide information about the ruptures to federal regulators. Rather, it callously risked vehicle occupants' safety as it purportedly awaited a failure mode analysis being conducted by Takata.

134. After the 2007 incidents, Honda and Takata began another internal investigation, including a survey of inflators. Starting in late 2007 or early 2008, Honda began collecting inflators returned to dealers for reasons unrelated to the exploding-airbag defect, and sent them to Takata for investigation, all without informing vehicle owners or regulators. Honda also collected inflators from scrap yards for the same purpose.

135. Takata began what became a year-long study of the Inflator Defect. Takata's engineers ultimately claimed that workers at a Takata factory in Monclova, Mexico had left moisture-sensitive explosives out on the plant floor, making them prone to overly energetic combustion. Takata advised Honda that by November 2002, it had corrected any such handling deficiencies.

136. The victims of the four Honda incidents—one in 2004 and three in 2007—brought legal claims against Honda, which the automaker settled on a strictly confidential basis. While Honda filed a standard report with U.S. safety regulators for each of these four incidents, its reports tellingly omitted the most critical detail of these incidents: the Defective Airbags posed a

substantial risk of serious injury or death when deployed. In later submissions to NHTSA, Honda admitted that it had received still other complaints in this timeframe:

- a. On July 25, 2008, Honda received an unidentified complaint related to Takata driver-side airbag ruptures.
- b. On September 11, 2008, Honda received notice of a complaint regarding an “unusual” driver-side airbag deployment.

137. Takata shared the results of the inflator survey analysis with Honda on October 2, 2008. That analysis indicated an airbag inflator problem. Honda and Takata claimed, however, that only a small number of inflators were affected.

138. As a result, Honda issued a recall, but only for 3,940 vehicles in the United States. This November 2008 recall involved certain 2001 Honda Accord and Civic vehicles with airbags that “could produce excessive internal pressure,” causing “the inflator to rupture,” spraying metal fragments through the airbag cushion (“2008 Recall”). Honda reported that it learned of the problem from a June 2007 claim, and falsely assured regulators that it had identified all “possible vehicles that could potentially experience the problem.”

139. Even as Takata and Honda advocated a minuscule recall focused on older models—less than 0.1 percent of the total Honda recall to date—at about the same time, in April 2009, Takata engineers scrambled to repair a flaw in a machine at the Monclova, Mexico factory that made the airbag propellant more volatile, according to materials from a company presentation given that year.

B. 2008-2009: Additional Incidents, the 2009 Honda Recall (09V-259), and Honda’s and Takata’s Misleading Reporting to NHTSA

140. Additional incidents took place after the 2008 Recall that underscored its inadequacy:

- a. On April 27, 2009, six months after the limited 2008 recall, a Takata airbag in Jennifer Griffin's 2001 Honda Civic exploded after a minor accident in Orlando, Florida. The explosion sent a two-inch piece of shrapnel from the Defective Airbag flying into Ms. Griffin's neck. Although Ms. Griffin survived, when highway troopers found her, she was bleeding from a severe gash in her neck. Ms. Griffin's car was not part of the 2008 Recall. Honda received notice of the incident no later than September 2009, and likely months earlier in July towards the beginning of its correspondence with NHTSA regarding the upcoming 2009 recall.
- b. On May 28, 2009, 18-year-old Ashley Parham of Oklahoma was killed while driving a 2001 Honda Accord when the Takata airbag in her car exploded after her car bumped another car in a parking lot. While she apparently survived the collision itself, the metal shrapnel that shot out of the exploding Defective Airbag sliced open her carotid artery and she bled to death. Ms. Parham's car was not part of the 2008 Recall.
- c. Another Takata airbag-related fatal incident took place in Virginia on June 9, 2009, and Honda ultimately settled a lawsuit brought by the decedent's family.
- d. According to one of its submissions related to the upcoming 2009 Recall, Honda received three additional Takata airbag unusual deployment complaints on July 27, July 31, and August 31, 2009.

141. With incidents mounting, Takata and Honda revisited the issue yet again. In June 2009, Takata reported to Honda that the defective airbag components had been made at its factory in Moses Lake, Washington. At the time, Takata engineers claimed that between 2000

and 2002, a flaw in a machine that presses air bag explosives into wafers had made the explosives unstable. The Takata engineers further claimed that with the defective airbags, explosives in the metal inflator, which would normally burn down and produce the nitrogen gas to inflate the air bag, instead burn aggressively and cause the inflator to burst, shooting hot fragments through the air bag's fabric.

142. After two years of investigation, Honda and Takata claimed that a machine at Takata's Moses Lake factory in Washington state had failed to compress chemicals firmly enough. That left the inflators vulnerable to moisture, potentially causing the bags to inflate more forcefully than they were supposed to. At that time, Takata also acknowledged that the defect covered a wider range of vehicles than initially estimated, but claimed that the plant had made numerous upgrades to its machinery in late 2002, which it claimed had improved the quality of its explosives.

143. In June 2009, Takata provided a follow up report to Honda on its November 2008 analysis, stating that issues related to propellant production appeared to have caused the improper inflator performance.

144. As a result of Takata's June 2009 follow-up report and the additional claims of "unusual deployments," on June 30, 2009, Honda issued another recall, this one covering 2001 and 2002 Civic, Accord, and Acura vehicles ("2009 Recall"). Thus, it was two months *after* Ms. Parham's death that Honda expanded its 2008 Recall to include the model she drove.

145. In August 2009, NHTSA's Recall Management Division sent Honda an information request to explain why it did not include 2009 Recall vehicles in the 2008 Recall, and "to evaluate the timeliness of [Honda's] recent defect decision."

146. NHTSA also wanted to know “the difference between the driver’s airbag inflators in those vehicles from the inflators in the 09V-259 vehicles and explain how this distinction, or any other between the two sets of vehicles, convinced [Honda] at the time that it did not need to include the latter set in the 08V-593 recall population.”

147. NHTSA’s Recall Management Division further requested that Honda provide complaints, lawsuits, warranty claims, and field reports, along with an explanation of the “unusual driver-side airbag deployments” and Honda’s investigative efforts.

148. In Honda’s September 16, 2009 reply to NHTSA, the automaker said that its information about the “unusual driver airbag deployments” came from Takata: “[w]e understood the causal factors to be related to airbag propellant due to handling of the propellant during airbag inflator module assembly.”

149. Honda also reported, based on information from Takata, that the problem with the airbags was isolated to the “production of the airbag propellant prior to assembly of the inflators.” Specifically, the cause was “related to the process of pressing the propellant into wafers that were later installed into the inflator modules,” and limited to “a specific production process” involving one high-precision compression press that was used to form the propellant into wafers, the automaker told NHTSA.

150. Honda also disclosed to NHTSA that it had fielded nine complaints and one lawsuit related to the 2008 and 2009 Recalls. Honda also finally informed NHTSA about the 2004 incident involving an “unusual deployment” of the vehicle’s airbag. Honda claimed that it “only recently [was] reminded of this incident,” and that, until recently, Honda “had not associated it with the [2008 Recall] campaign.”

151. Through a November 20, 2009 request, NHTSA also sought information from Takata. Takata submitted a partial response to NHTSA on December 23, 2009 (“Partial Response”), and then a full response on February 19, 2010 (“Full Response”). Both responses provided vague and misleading information about the seriousness of the problem.

152. Takata claimed that there were no substantive design differences between the inflators in the airbags at issue in the two recalls, but cited differences in the production processes between the lots.

153. Takata also claimed that the defects only existed in specific lots manufactured between certain dates. It claimed that the inflators involved in the 2008 Recall were manufactured between October 29, 2000 and December 1, 2000, and that inflators involved in the 2009 Recall were manufactured between August 23, 2000 and February 25, 2001. Takata did not provide the dates the inflators were shipped, as NHTSA requested, because, as Takata admitted, its records did not have that information. Instead, it gave just the manufacturing dates.

154. In its Full Response, Takata claimed that the defect identified in the 2009 Recall was the result of a single compression press (the “Stokes press”) in a single plant. Takata further claimed that while it did manufacture 2,400 inflators using the same process as the defective inflators, the design was different and “[t]herefore, Takata is convinced that the inflators sold [redacted] contain no safety-related defect.”

155. Takata falsely wrote in its Full Response that it “believed - [redacted] - that expanding the recall to include all vehicles equipped with inflators manufactured with Stokes propellant produced through and including February 28, 2001 would capture all inflators with tablets that had a risk of producing overly energetic combustion. This recommendation, as well as the analysis that supported it, was presented to Honda on June 12, 2009.”

156. In both the Partial Response and the Full Response, Takata stated: “Takata has not provided any airbag inflators that are the same or substantially similar to the inflators in vehicles covered by Recalls 08V-593 [in 2008] and 09V-259 [in 2009] to any customers other than Honda. The physical characteristics of the inflator housing used in the Honda vehicles subject to these recalls are unique to Honda.” This statement would prove to be false.

157. Based on Takata’s and Honda’s misrepresentations and omissions concerning the nature and scope of the Inflator Defect, NHTSA closed its investigation into the Takata airbags on May 6, 2010.

158. In the months following NHTSA’s 2009/2010 request for information, Takata engineers came up with yet another purported explanation for the ruptures; specifically, that in September 2001, machine operators at the Moses Lake, Washington plant could have inadvertently switched off an “auto reject” function that weeded out poorly made explosives that can become unstable. However, Takata assured Honda at the time that, “as part of the upgrades at that plant, in September 2002, the supplier had added a locking mechanism that prevented workers from turning the auto-reject function off.”

159. The *Wall Street Journal* further reported that “Honda and Takata discovered more problems. At Moses Lake, employees had switched off a mechanism that automatically checked whether the right amount of propellant was loaded in inflators; at a plant in Monclova, Mexico, a dehumidifier that kept parts dry hadn’t been turned on. At times poor record-keeping meant Honda and Takata couldn’t figure out which cars had defective bags.”

C. 2010: The 2010 Recall (10V-041) and Honda’s Shifting Explanations

160. Honda’s and Takata’s ongoing cover-up and ineffective recalls continued to cost lives. In December 2009, a 2001 Honda Accord driven by Gurjit Rathore, 33, hit a mail truck in

Richmond, Virginia. Her air bag exploded, propelling shrapnel into her neck and chest, and she bled to death in front of her three children, according to a lawsuit filed by her family.

161. In February 2010, only months after its previous recall, Honda announced a third recall for an additional 379,000 vehicles across a number of models (“2010 Recall”).

162. Honda’s explanation for the airbag defect changed yet again, but still misleadingly focused on the manufacturing process. Honda explained that of the two different manufacturing processes used in the preparation of an airbag propellant, one process was within specification and the other was not. Honda’s expanded recall supposedly reached those vehicles employing airbags that had utilized manufacturing processes not within specification.

163. Once again, however, injuries continued to mount:

- a. In April 2010, two months after the 2010 Recall, the Takata airbag in Kristy Williams’s 2001 Honda Civic exploded while she was stopped at a traffic light in Morrow, Georgia, sending metal shards into her neck and causing profuse bleeding. She survived only because she applied pressure with her fingers to stem the arterial bleeding.
- b. On November 8, 2010, Suetania Emmanuel of St. Croix, U.S. Virgin Islands was driving a 2002 Honda Civic when the Takata airbag exploded and sent shards of metal into her face and throat.

D. 2011-2012: Mounting Honda Recalls, Including the 2011 Recall (11V-260)

164. In April 2011, Honda filed a Part 573 Defect and Noncompliance report for 2,430 replacement service part airbag modules that might have been installed in vehicles covered by previous recall expansions (“2011 Recall”). Honda was unable to determine which vehicles

contained the defective replacement parts, forcing it to recall all 833,277 vehicles that might have had the part installed.

165. According to documents submitted with the 2011 Recall, on August 15, 2011, Honda became aware of an August 1, 2011 “energetic deployment of a driver’s airbag inflator that was outside of the prior range of suspect inflators.” On September 2, 2011, Honda and Takata began an analysis of these so-called “outside of range” occurrences.

166. Further underscoring the instability of the ammonium-nitrate propellant, on or about September 14, 2011, Honda and Takata began investigating the possibility that airbag inflator propellant lots were mixed during airbag inflator assembly, prompting further analysis of airbag inflator production records for the period when propellant was processed by the suspect method.

167. Honda reported its death and injury tallies to regulators only in a confidential submission in December 2011, when it issued a fifth limited recall for the rupture defect, according to NHTSA. That recall expanded Recall No. 11V-260 (April 2011), to include an additional 272,779 Honda and Acura vehicles. The expanded recall also included another 640 airbags sold as replacement parts; however, because Honda could not determine on which vehicles the 640 replacement airbags were installed, an additional 603,241 vehicles had to be recalled. Collectively, 1.7 million Honda and Acura vehicles had been recalled by the end of 2011 because they contained Takata-manufactured airbags.

168. In the meantime, Honda and Takata quietly continued their internal investigation into the Inflator Defect. According to Honda, an exploding airbag in Puerto Rico in October 2011 prompted Honda to ask permission from NHTSA to collect “healthy” airbag modules to see if “abnormal combustion was possible.” The collection began on March 14, 2012, and by

November 21, 2012, Honda in fact found that even its so-called “healthy” airbags could abnormally combust in certain conditions.

169. Notably, in or about December 2012, NHTSA’s Office of Defects Investigation (“ODI”) notified Honda that there were numerous injury or death incidents listed on a spreadsheet Honda provided to NHTSA in connection with NHTSA’s Takata investigation that were *not* previously provided to NHTSA under the early warning reporting system established by the TREAD Act. In late 2014, Honda ultimately admitted that it failed to report 1,729 serious accidents resulting in injuries or deaths to NHTSA between 2003 and 2014. Eight of these incidents involved Takata airbags. In January 2015, Honda agreed to pay a \$70 million fine for this startling failure.

170. Toyota also received additional direct notice of the Inflator Defect in this timeframe. Starting in September 2012, Toyota received field reports of three U.S. vehicles with fractured inflators—two were front passenger side airbags that deployed inadvertently. Toyota recovered 144 in-use inflators from both the Japan and U.S. markets for Takata to evaluate. In February 2013, Takata informed Toyota that some of the propellant wafers found within the recovered inflators were cracked, possibly due to lower material density.

171. Dangerous and tragic incidents continued to mount during this period.

- a. On April 20, 2011, an unidentified man was hurt in Puerto Rico when the Takata driver-side airbag ruptured in his 2001 Honda Accord LX. His attorney notified NHTSA on May 26, 2011.
- b. On September 20, 2011, Eddie Rodriguez crashed his Honda Civic in Puerto Rico, deploying airbags that launched sharp pieces of metal toward him. Honda reached a confidential settlement with the driver in 2013.

- c. On October 20, 2011, there was an alleged rupture of a passenger side airbag in Puerto Rico; Honda obtained the vehicle for analysis on February 3, 2012.
- d. On December 4, 2011, Miranda Perez suffered left eye blindness due to a Defective Airbag rupture while driving her 2003 BMW M3 in Buffalo, New York.
- e. On March 2, 2012, Angelina Sujata suffered chest injuries due to a Takata airbag rupture while driving her 2001 Honda Civic in Chapin, South Carolina.
- f. On March 8, 2012, Sharonda Blowe of Jacksonville, Florida was severely injured while driving a 2001 Honda Accord when she was struck in the head by pieces of metal exploding out of a Defective Airbag. Ms. Blowe brought suit and reached a confidential settlement.
- g. On September 2, 2012, Monique Roig suffered facial injuries due to a Defective Airbag rupture while riding in a 2001 Honda Civic in Miami-Dade County, Florida.

E. 2013-2014: Takata's Belated Admissions of Broader Defects and the 2013 Recall (13V-132)

172. By 2013, it became clear to federal regulators, and Defendants were already aware, that the Defective Airbag issue and the number of Defective Airbags were much more significant than Takata or Honda initially reported to NHTSA.

173. On February 8, 2013, NHTSA and Honda met to discuss the "ongoing investigation" into Honda's defective Takata airbags. By March 6, 2013, Honda claimed that:

A recreation of propellant production using the same methods as were used during 2001-2002 production periods indicated that it was possible for propellant produced during 2001-2002 to be manufactured out of specification without the manufacturing processes correctly identifying and removing the out of specification propellant. Separately, Honda was informed by the supplier of

another potential concern related to airbag inflator production that could affect the performance of these airbag modules.

174. In February and March 2013, Takata notified Nissan and Mazda that it was investigating airbag quality. Separately, Takata advised Honda “of another potential concern related to airbag inflator production that could affect the performance of these airbag modules.”

175. On April 10, 2013, Honda filed a Recall Notification (“2013 Recall”) for an additional 561,422 vehicles that could be affected by the following part defect:

Defect description:

In certain vehicles, the passenger’s (frontal) airbag inflator could produce excessive internal pressure. If an affected airbag deploys, the increased internal pressure may cause the inflator to rupture. In the event of an inflator rupture, metal fragments could be propelled upward toward the windshield, or downward toward the front passenger’s foot well, potentially causing injury to a vehicle occupant.

176. On April 11, 2013, Takata filed a Defect Information Report titled “Certain Airbag Inflators Used as Original Equipment.” In that report, Takata misleadingly attributed the defect to isolated manufacturing flaws, describing the Defective Airbags as follows:

Some propellant wafers produced at Takata’s plant in Moses Lake, Washington, between April 13, 2000 and September 11, 2002 may have been produced with an inadequate compaction force. . . . In addition some propellant wafers used in inflators produced at Takata’s plant in Monclova, Mexico between October 4, 2001 and October 31, 2002, may have been exposed to uncontrolled moisture conditions. Those wafers could have absorbed moisture beyond the allowable limits In both cases, the propellant could potentially deteriorate over time due to environmental factors, which could lead to over-aggressive combustion in the event of an air bag deployment. This could create excessive internal pressure within the inflator, and the body of the inflator could rupture.

177. It was not until its April 2013 Defect Information Report that Takata finally admitted that the defective inflators were installed as original equipment in vehicles manufactured by companies other than Honda, including Toyota, Nissan, Mazda, and BMW.

Takata did not know, however, how many inflators were installed as original equipment in vehicles manufactured by companies other than Honda.

178. In April 2013, based on Takata's new admissions, six major automakers, including Nissan, Mazda, BMW, Pontiac, and Honda, issued recalls of 3.6 million vehicles containing Takata airbags. The other Defendants, by contrast, issued no recalls, falsely representing that their vehicles were safe.

179. With the increased awareness and scrutiny, news of incidents became more widespread:

- a. On August 5, 2013, Joseph Nasworthy of Jacksonville, Florida suffered severe lacerations to his eye and nose when the Takata airbag exploded upon deployment in his 2005 Honda Civic.
- b. On September 1, 2013, Stephanie Erdman of Destin, Florida was driving a 2002 Honda Civic when she was hit in the eye by shards of metal that shot from the Takata airbag. Ms. Erdman filed suit and reached a confidential settlement.
- c. Also in September 2013, when police got to the scene of a minor car accident in Alhambra, California, they thought the driver, Hai Ming Xu, had been shot in the face. In fact, he was killed by shrapnel exploding from the Takata airbag in his 2002 Acura TL that deployed when it hit the wall of a building. As *The New York*

Times reported:

The authorities have not determined a reason for the injuries, though his coroner's report cited tears in his airbag and facial trauma from a foreign object. And problems persist with Honda's reporting of potential defects.

In at least four more recent suspected ruptures, including the one linked to [the California driver's] death, Honda has not filed a so-called early warning report with safety regulators, as is required in cases where there is a claim of defect that resulted in an injury or death, according to case lawyers and legal filings.

- d. On October 12, 2013, Brandi Owens of Forsyth County, Georgia was injured in a low-speed accident when the driver's side Takata airbag of her 2013 Chevy Cruze exploded and detached from the steering wheel. According to a lawsuit, metal from the airbag hit Owens in the face and left her blind in one eye.

180. By 2014, the incident rate picked up even more dramatically, with over a dozen incidents involving injuries or fatalities in Nissan, Honda, Toyota, Chevy, and Mazda vehicles taking place in a variety of regions in the country, from humid Puerto Rico to far drier Massachusetts and California. For example:

- a. On February 19, 2014, a Takata passenger airbag ruptured and sprayed metal fragments at the passenger following a crash in a 2007 Chrysler 300.
- b. On February 20, 2014, a Takata driver's side airbag in a 2003 Dodge Ram 1500 ruptured and ejected metal fragments following an accident. The driver suffered severe physical injury as a result.
- c. On March 14, 2014, Susan Cosgrove of Fremont, California was injured in a low-speed accident while driving a 2013 Chevy Cruze. The Takata-related recall notice on her car arrived at her residence after the incident.
- d. On May 29, 2014, Corey Burdick of Eustes, Florida was driving a 2001 Honda Civic when the airbag deployed and sent shards of metal into his eye.
- e. In June 2014, a low-speed accident involving a 2005 Honda Accord in Los Angeles, California, caused the car's driver-side airbag to "detonate," sending hot metal and plastic shrapnel into the cabin.

181. With accidents proliferating, Takata met with NHTSA officials on May 20, 2014 to provide information about inflator ruptures not covered by previous recalls. At that meeting,

Takata noted that “all six of the potentially-relevant rupture incidents had occurred in either Florida or Puerto Rico.” The referenced incidents included both passenger and driver side airbags. This statement omitted one of the earliest incidents, Ms. Weaver’s 2003 accident in Arizona, as well as later incidents in drier locales, as noted above.

182. On June 11, 2014, NHTSA’s ODI published an ODI Resume for a preliminary evaluation of Investigation No. PE 14-016. That document stated that NHTSA was opening an investigation “in order to collect all known facts from [Takata] and the vehicle manufacturers that it believes may have manufactured vehicles equipped with inflators produced during the same period as those that have demonstrated rupture events in the field.”

183. Also on June 11, 2014, Takata informed NHTSA that it “believes that an [sic] number of the inflators identified above were provided to the following vehicle manufacturers for use in vehicles sold in the United States (the manufacturers are listed in alphabetical order): BMW, Chrysler, Honda, Mazda, Nissan, and Toyota.” Takata’s June 11, 2014 letter further stated:

If we determine that any of those inflators were sold to other vehicle manufacturers, we will let you know promptly. Takata is not certain which models or model years of vehicles are equipped with the subject inflators, and it does not know how many of those vehicles were sold in or are registered in the States to be covered by the requested field actions. That information will need to be obtained from the affected vehicle manufacturers.

184. On June 20, 2014, Honda issued additional recalls for a total of nearly 4.5 million Honda and Acura vehicles that contained Defective Airbags.

185. On June 26, 2014, GM recalled over 29,000 Chevrolet Cruze vehicles because the Defective Airbags have a tendency to not deploy at all or rupture and cause metal fragments to strike and severely injure vehicle occupants.

186. Though the first Takata Airbag related recall was launched years earlier, New Chrysler failed to initiate a field action or recall until 2014. Just prior to the New Chrysler field action in June of 2014, which covered a mere 208,700 older-model vehicles in Florida, Hawaii, Puerto Rico, and the U.S. Virgin Islands, New Chrysler told the public that there was not a safety defect with its inflator. New Chrysler stated:

Chrysler Group has agreed, in principle, to honor a National Highway Traffic Safety Administration request to replace airbag inflators in certain vehicles registered in four U.S. regions... This is not a safety recall. Chrysler Group has not identified a defect. This is a field action conducted out of an abundance of caution.

187. By the end of June 2014, the number of vehicles that had been recalled due to Takata's Defective Airbags had increased to over 6 million, a small fraction of the total recall. The Vehicle Manufacturer Defendants, however, had still not recalled all of the vehicles containing Defective Airbags.

188. On July 8, 2014, Honda expanded a "two million vehicle air bag recall by as many as one million more vehicles in California." *The New York Times* reported that "[a] defective inflator could explode in a crash, sending shards of its metal casing into the passenger compartment. The inflator was made by Takata Corporation, which has said the propellant inside the inflator was not properly prepared and was too powerful."

189. In August 2014, Honda issued yet another recall of Honda and Acura vehicles, its ninth for the defect—bringing the total of recalled Honda and Acura vehicles to six million.

190. The tragic pattern of mounting injuries and casualties in the face of Defendants' sluggish response continued:

- a. On June 25, 2014, Patricia Mincey was rendered quadriplegic due to a Takata airbag rupture while driving her 2001 Honda Civic in Jacksonville, Florida.

- b. On July 7, 2014, Claribel Nunez of Hialeah, Florida suffered severe wounds to her forehead from shrapnel that exploded out of a Takata airbag in her 2001 Honda Civic.
- c. On July 22, 2014, Joshua Reliford suffered severe facial and brain injuries due to a Takata airbag rupture while driving his 2001 Honda Civic in McCracken County, Kentucky.
- d. On July 28, 2014, Francisco Demarco died due to a Takata airbag rupture while riding in the passenger seat of a 2007 Honda Accord in Palm Beach County, Florida.
- e. On August 17, 2014, a Takata airbag ruptured after an accident in a 2007 Ford Mustang, deploying with abrupt force and ejecting a metal fragment into the driver's leg. Ford was notified of the incident.
- f. On October 2, 2014, Florida resident Hien Tran died, four days after her 2001 Honda Accord struck another car in Orlando and the Takata airbag exploded, sending shrapnel into her neck. The medical examiner stated that the shrapnel tore through the airbag, hitting Ms. Tran and causing "stab-type wounds" and cutting her trachea. Indeed, her death was initially investigated as a homicide by detectives. A week after she died, she received a letter in the mail from Honda urging her to get her car fixed because of faulty airbags that could explode.
- g. On October 4, 2014, Devon Rideout suffered permanent loss of vision due to an alleged Takata airbag rupture while riding passenger in a 2001 BMW 330i in Chesapeake City, Virginia.

F. 2014-2015: Forced National Recall And Takata's Admission of a Defect

191. On October 22, 2014, NHTSA expanded the recall list to cover ten automakers and 7.8 million vehicles, over 5 million of which were Hondas. In a Consumer Advisory dated October 22, 2014, NHTSA sent an urgent warning to the owners of the now "7.8 million Affected Vehicles":

The National Highway Traffic Safety Administration urges owners of certain Toyota, Honda, Mazda, BMW, Nissan, Mitsubishi, Subaru, Chrysler, Ford and General Motors vehicles to act immediately on recall notices to replace defective Takata airbags. Over seven million vehicles are involved in these recalls, which have occurred as far back as 18 months ago and as recently as Monday. The message comes with urgency, especially for owners of vehicles affected by regional recalls in the following areas: Florida, Puerto Rico, limited areas near the Gulf of Mexico in Texas, Alabama, Mississippi, Georgia, and Louisiana, as well as Guam, Saipan, American Samoa, Virgin Islands and Hawaii.

192. On October 29, 2014, NHTSA sent letters to ten automakers regarding the safety risks posed by the Takata airbags. The letter stated that "[t]he ongoing cooperation of all manufacturers who have recalled vehicles is essential to address this safety risk," and that the "NHTSA team is engaged with you in critical work to better understand the failures and take action to remedy the safety risk" NHTSA's letter also asked the automakers to provide NHTSA with information as to their recall process, urged a faster response from them, and stated that "more can and should be done as soon as possible to prevent any further tragedies."

193. The U.S. Department of Justice also began investigating whether Takata committed any crimes. On November 13, 2014, the United States District Court for the Southern District of New York issued a federal grand jury subpoena to Takata and Honda.

194. By November 18, 2014, it was clear to NHTSA that even the extensive recalls to date were insufficient. NHTSA therefore demanded a national recall of Chrysler, Ford, Honda, Mazda, and BMW vehicles with certain driver-side airbags made by Takata.

195. Takata refused to support a national recall at a hearing before the U.S. House of Representatives Energy and Commerce Subcommittee on December 3, 2014, claiming there was “not enough scientific evidence” to support a national recall. Yet, as NHTSA Administrator David Friedman stated, “when we saw real-world incidents on the driver side, one in California, we pushed Honda to make sure that their recall covered that region. Then very recently, we became aware of a driver side incident in North Carolina. With six total incidents, two of which are outside that region, we can no longer support a regional recall. Our policy is clear: Recalls must be nationwide unless the manufacturers can demonstrate that they are regional. With the new data, it is clear they can no longer demonstrate that the region that was used before was appropriate for driver side airbags.”

196. The geographic scope of the incidents undermined Takata’s focus on humidity as the defining contributor to the dangerous ruptures. As Mr. Friedman explained, “[o]ne of the most frustrating parts about this is that neither the automakers nor Takata have been able to get to the bottom of the root cause on this. We have been pushing them to do so.”

197. As of the December 3, 2014 House of Representatives hearing, Honda, Ford, Chrysler, and Toyota had all agreed to a nationwide recall, principally for driver side airbags. Days later, Mazda expanded the geographic scope of its recall. By December 23, BMW had also agreed to a nationwide recall.

198. Having misrepresented and omitted the nature and scope of the Inflator Defect for over a decade, 10 vehicle manufacturers met in December 2014 to “sort out a way to understand the technical issues involved.” Some defendants, including Volkswagen and Mercedes, were shockingly absent. A few months later, in March 2015, Honda announced an advertising campaign to promote the recall—a step it could and should have taken a decade ago. A few days

later, Honda announced another 105,000 vehicles that needed to be recalled (Recall 15V-153), consisting of vehicles that should have been part of the 2014 recalls.

199. Frustrated by Takata's continual foot-dragging, NHTSA imposed a \$14,000 per day fine that started on Friday, February 20, 2015, concluding that Takata had not been forthcoming with the information. Days later, NHTSA demanded that Takata preserve all airbag inflators removed through the recall process.

200. In response to public scrutiny and pressure from NHTSA and private plaintiffs, Defendants were forced to consult with external explosives and airbag specialists, and performed additional testing on Takata's airbags. This testing confirmed what Defendants already knew: Takata's airbags containing ammonium nitrate were defective and prone to over-aggressive deployment and rupture.

201. In light of this testing, Takata was unable to deny the existence of the Inflator Defect any longer. On May 18, 2015, Takata filed four Defect Information Reports ("DIRs") with NHTSA and agreed to a Consent Order regarding its (1) PSDI, PSDI-4, and PSDI-4K driver air bag inflators; (2) SPI passenger air bag inflators; (3) PSPI-L passenger air bag inflators; and (4) PSPI passenger air bag inflators, respectively. After concealing the Inflator Defect for more than a decade, Takata finally admitted that "a defect related to motor vehicle safety may arise in some of the subject inflators." And in testimony presented to Congress following the submission of its DIRs, Takata's representative admitted that the use of ammonium nitrate is a factor that contributes to the tendency of Takata's airbags to rupture, and that as a result, Takata will phase out the use of ammonium nitrate.

202. Still, even Takata's defect admission is inaccurate and misleading, because the Inflator Defect is manifest in each of Takata's airbags containing ammonium nitrate. And

shockingly, certain Vehicle Manufacturer Defendants continue to equip new vehicles with airbags containing ammonium nitrate, even after admitting that airbags containing ammonium nitrate as the primary propellant are prone to rupture, and thus create an unacceptable public safety hazard.

203. Further, in its DIRs, Takata acknowledged that the Inflator Defect is present in inflators that were installed in vehicles as replacement parts through prior recalls, necessitating a second recall of those vehicles.

204. As a result of Takata's admission that its inflators are defective, the total number of recalled vehicles nationwide will exceed 40 million. While Takata has records tracking which manufacturers it sold Defective Airbags to, it claims not to have records indicating which vehicles those Defective Airbags were installed in. The Vehicle Manufacturers possess those records, however, and are thus in the process of identifying which vehicles must be recalled based on Takata's DIRs and its corresponding admission that its airbags are defective.

205. In the meantime, the risk of injury remains very real, and is exacerbated by Defendants' poor execution of the recalls, as discussed in Section V, *infra*.

- a. On November 19, 2014, Racquel Hudson suffered extensive first and second degree burns due to a Takata airbag rupture while driving her 2004 Honda Odyssey in San Antonio, Texas.
- b. On December 12, 2014, the driver-side airbag in a 2002 BMW 325 parked in the owner's driveway deployed with such energy that it melted and burned the dashboard and ceiling panel, created burn marks throughout the cabin, and shattered the front windshield.

- c. On December 31, 2014, the Takata driver-side airbag in a 2008 Mazda 6 deployed following an accident, ejecting metal fragments that injured the driver's face.
- d. On January 18, 2015, Carlos Solis was killed in an accident in Houston, Texas, and a ruptured Takata airbag was the suspected cause.
- e. On April 5, 2015, the Takata driver-side airbag in a 2005 Honda Accord ruptured, sending metal shards and shrapnel into the vehicle and severing 22-year old Kylan Langlinais's carotid artery; Honda's recall notice arrived two days after the crash, and Ms. Langlinais died from her injuries that same day.

206. In September 2015, NHTSA was forced to contact Volkswagen and Mercedes to seek information regarding their uses of Takata airbags. Consistent with Defendants' long pattern of behavior, and despite the increasingly irrefutable evidence of the inherent, uniform defect in Takata's ammonium-nitrate inflators, Volkswagen wrote to NHTSA in February 2016, in an effort to push back against the inclusion in comprehensive recalls of its own defective vehicles. Eventually, in its Third Amended Coordinated Remedy Order, issued December 9, 2016, NHTSA expanded the recall to Volkswagen and Mercedes.

207. Over the past 15 years that Defendants and Takata knew there was a problem with the safety of its airbags, there have been at least 22 deaths and hundreds of injuries linked to defective Takata airbags worldwide. As detailed above, the incidents date back to at least 2003, and involve vehicles made by Defendants. Each of the Defendants knew of the Inflator Defect by virtue of these incidents—in addition to many other sources—but failed to disclose the nature and scope of the Inflator Defect, choosing to put their customers' lives at risk in order to avoid expensive recalls.

208. The Defendants were on further notice due to unusual Takata airbag deployments that should have prompted further inquiry into the airbags' fitness for use. A review of publicly-available NHTSA complaints shows dozens of incidents of Takata airbags inadvertently deploying in the Class Vehicles—events likely tied to the unstable and volatile ammonium-nitrate propellant. These complaints started as early as September 2005, and involve vehicles manufactured by Acura (Honda), BMW, Dodge (Chrysler), Ford, Mitsubishi, Pontiac, Subaru, and Toyota. Some of these incidents showed still further signs of the Inflator Defect, including airbags that deployed with such force that they caused the windshield to crack, break, or shatter, and others that caused unusual smoke and fire (or both). For example:

- a. Takata airbags inadvertently deployed and caused windshields to crack, shatter, or break in a 2004 Mitsubishi Lancer on November 23, 2006, a 2003 Toyota Corolla on May 3, 2010, a 2003 Toyota Matrix on August 17, 2010 (in addition to causing unusual smoke), and a 2003 Toyota Matrix on January 29, 2012 (in addition to damaging the dashboard).
- b. Takata airbags inadvertently deployed and caused unusual smoke and heat in a 2003 Acura MDX on January 29, 2012, causing the driver skin burns, and a 2003 Toyota Corolla on March 17, 2014.

IV. The Vehicle Manufacturer Defendants Sold Their Vehicles As “Safe” and “Reliable”

209. At all relevant times, in advertisements and promotional materials, the Vehicle Manufacturer Defendants continuously maintained that their vehicles were safe and reliable and uniformly concealed the Inflator Defect. Plaintiffs, directly or indirectly, were exposed to these advertisements or promotional materials prior to purchasing or leasing Class Vehicles. The

misleading statements about Class Vehicles' safety in Defendants' regulatory filings, advertisements, and promotional materials were material to decisions to purchase Class Vehicles.

210. Examples of the Vehicle Manufacturers' safety and reliability representations, from 2000 through the present, include the following:

a. **BMW:**

- i. In 2005, BMW represented on its website: "Driver's and passenger's front airbag supplemental restraint system (SRS) with 'smart' dual-threshold, dual-stage deployment and sensor to help prevent unnecessary passenger's airbag deployment."
- ii. In 2008 BMW represented on its website: "The driver and front passenger airbags provide effective protection for the head and upper-torso area, preventing contact with the steering wheel and dashboard. In a head-on collision, you have the best possible protection."
- iii. In 2008 BMW represented on its website: "The principle behind the function of the front airbags for driver and passenger is very simple: in the event of an impact with a force greater than the safe threshold, the airbag sensors activate a substance that causes the airbags to instantly inflate. Within a fraction of a second, the airbags form a protective cushion over the steering wheel and dashboard, significantly reducing the risk of cranial and upper body injuries."
- iv. In 2015, BMW represented on its website: "There is no end to our quest for the next innovation. And it's not just about greater power and more efficient performance. It's also about safety. We prepare our vehicles to expect the unexpected."

b. **New Chrysler:**

- i. The 2009 Chrysler 300 brochure stated that: “[n]o one wants to test a vehicle’s impact resistance, but 300 is ready, if it occurs.... Advanced multistage front air bags deploy in staged amounts, depending on impact severity, while available front seat-mounted side air bags with supplemental front and rear side-curtain air bags offer additional side-impact protection to front and rear outboard occupants.”
- ii. The 2011 Dodge Dakota brochure claimed that the: “Dakota heritage of protecting you and your passengers is uncompromising. In addition to the many safety and security features listed here, all 2011 Dakota models now feature supplemental side-curtain air bags as standard equipment and, of course, four-wheel ABS.”
- iii. The 2011 Jeep Wrangler brochure asserted that: “Wrangler’s got your back, your sides, as well as your front end. Just as Wranglers are purpose-built for fun, they’re also infused with advanced active and passive systems designed to help keep you safe and secure. At the forefront are the standard advanced multistage front air bags.”
- iv. The 2011 Chrysler 300 brochure included the slogan: “[t]his kind of safety gives you that kind of security.” The brochure further advertised that: “advanced multistage front air bags, supplemental front-seat thorax side air bags, driver-knee air bag, and supplemental side-curtain air bags for front and rear outboard occupants are all standard.”

- v. A February 9, 2012 press release boasted that the 2012 Chrysler 300 and 2012 Dodge Charger had achieved 5-star safety ratings from NHTSA, and it boasted that the Chrysler 300 and Dodge Charger were named a “Top Safety Pick” by the Insurance Institute for Highway Safety. The press release further quoted the Senior Vice President-Engineering of Chrysler, who stated: “we’re very pleased that both the 2012 Chrysler 300 and 2012 Dodge Charger have achieved the highest overall rating” and that: “both vehicles are robustly designed with a rigid structure to protect occupants and have numerous advanced safety features.”
- vi. The 2012 Dodge Charger brochure highlighted that the Charger was a 2011 Insurance for Highway Safety (“IHS”) top safety pick. The brochure further stated that: “[s]afety and security are the driving principles behind every Dodge vehicle, including Charger” and that: “[a]dvanced multistage front air bags, supplemental front-seat mounted pelvic-thorax side air bags, driver-side knee air bag, and supplemental side-curtain air bags for front and rear outboard occupants are all standard.”
- vii. Just prior to the New Chrysler field action in June of 2014, New Chrysler told the public that there was not a safety defect with its inflator. New Chrysler stated: “Chrysler Group has agreed, in principle, to honor a National Highway Traffic Safety Administration request to replace airbag inflators in certain vehicles registered in four U.S. regions... This is not a safety recall. Chrysler Group has not identified a defect. This is a field action conducted out of an abundance of caution.”

- viii. In 2017, New Chrysler's website listed its mission as: "To create the type of exciting, efficient, reliable, safe vehicles you expect and deserve."
 - ix. In 2017, New Chrysler described the design of the 2007–2017 Jeep Wrangler on Jeep's website as: "With an all-new frame, exterior and interior design, engine, safety and security and convenience features, the Jeep Wrangler was built on the successful, original Jeep Brand formula."
- c. **GM Defendants:**
- i. In its 2010 Annual Report, GM Parent proclaimed its products would "improve safety and enhance the overall driving experience for our customers."
 - ii. In an April 2010 video advertisement, GM Parent Chairman and CEO, Ed Whitacre, stated that New GM was "designing, building, and selling the best cars in the world," and has "unmatched lifesaving technology" to keep customers safe.
 - iii. On November 10, 2010, New GM published a video that told consumers that New GM actually prevents any defects from reaching consumers. The video, titled "Andy Danko: The White Glove Quality Check," explains that there are "quality processes in the plant[s] that prevent any defects from getting out."
 - iv. New GM's brochure for the 2010 Chevy Avalanche called the truck a "Four-Wheel Bodyguard," in connection with its airbags, and an "all-encompassing approach to safety." This model is subject to the Inflator Defect recalls.

- v. An August 29, 2011, advertisement on Defendants' website stated that "Chevrolet provides consumers with fuel-efficient, safe and reliable vehicles that deliver high quality, expressive design, spirited performance and value."
- vi. The promotional brochure for New GM's 2011 Cadillac Escalade series noted: "Passenger safety is a primary consideration throughout the engineering process." It also advised potential customers that "[a] look beneath the beautiful exterior reveals a comprehensive approach to safety."
- vii. Defendants published on their website a December 27, 2011, an interview with Gay Kent (General Motors Executive Director of Vehicle Safety and Crashworthiness), who stated, "[o]ur safety strategy is about providing continuous protection for our customers before, during and after a crash. . . . We design safety and crashworthiness into our vehicles very early in development." In the interview, Kent touted "GM's own internal requirements for vehicle safety and crashworthiness, which go above and beyond federal requirements."
- viii. An April 2012, New GM national advertising campaign slogan proclaimed: "Safety. Utility. Performance."
- ix. In a July 10, 2012, news release, Chris Perry (Chevrolet Global Vice President of Marketing) stated, "[w]e think customers who have been driving competitive makes or even older Chevrolets will be very pleased by today's Chevrolet designs, easy-to-use technologies, comprehensive safety and the quality built into all of our cars, trucks and crossovers."

- x. GM Parent's 2013 Annual Report asserts that "[n]othing is more important than the safety of our customers."
 - xi. During a presentation at the May 2014 North American Conference on Elderly Mobility, Gay Kent (General Motors Director of Global Vehicle Safety) stated that "[t]he safety of all our customers is our utmost concern."
 - xii. In December 2014, Defendants issued a news release touting the Insurance Institute for Highway Safety (IIHS)'s designation of four Chevrolet vehicle models as "Top Safety Picks," including some models subject to recalls due to the Inflator Defect.
 - xiii. In a February 2015 news release, Defendants advertised high rankings in a J.D. Power Vehicle Dependability Study for several models subject to the Inflator Defect recalls. The news release highlighted the GMC Sierra (which is subject to the Inflator Defect recalls) for becoming "the first full-size pickup to receive the highest-possible five-star Overall Vehicle Score for safety."
 - xiv. In 2017, Defendants' website stated: "Safety is always our priority. It's the main concern with each and every car we design and a driving principle of our company."
- d. **Honda:**
- i. In 2002, Honda represented on its website: "Having already earned top safety ratings with its quadruple five-star front- and side-impact crash test ratings, the 2002 Odyssey now offers the latest generation of airbag systems from Honda. Driver's and front passenger's dual stage airbags (SRS) along with driver's and front passenger's side airbags are now standard equipment

on all models Both front airbags have a dual-stage inflator that can deploy the airbag at one of two rates depending on the severity of the crash The front passenger's side airbag has an automatic cutoff system that is designed to prevent side airbag deployment if a child (or small statured adult) leans into the side airbag deployment path. Once the child returns to an upright position, the side airbag will be able to deploy and provide protection in the event of a side impact Building on the standard anti-lock braking system (ABS), new standard rear disc brakes result in improved stopping performance with higher resistance to brake fade and a more responsive brake pedal feel. Amber rear turn signals have been added, which help other drivers differentiate the indicators with increased clarity.”

- ii. In 2002, Honda represented in a commercial: “5-stars of frontal collision tests . . . that’s a safe car. Safe, get it through your head. To see what safe really means, take a look at a close look at the 2002 civic from Honda.”
- iii. In 2002, Honda represented in brochures: “Honda’s commitment to safe driving is in evidence throughout every vehicle Every new vehicle comes with dual front airbags (SRS), most using a dual stage design... All designed to keep you and yours out of harm’s way.”
- iv. In 2004, Honda represented in brochures: “A glance at the crash-test data posted by the U.S. government’s National Highway Traffic Safety Administration reveals a galaxy of 5-star ratings for Honda cars and trucks. In fact, five of our models to date – Accord Coupe, Civic Coupe, CR-V, Odyssey and Pilot – have earned the highest NHTSA crash-test ratings in

frontal and side impact testing It's a solid testament to our emphasis on safety.”

- v. In 2007, Honda represented on its website: “Through innovative original research, Honda has created advanced airbags that offer outstanding levels of occupant protection.”
- vi. In 2007, Honda also represented on its website: “Honda led the industry through advances such as driver and front passenger airbags with ‘dual output inflators’ that adjust the deployment force of the airbags to the severity of the crash.”
- vii. In 2007, Honda also represented on its website: “The Honda Accord is the first mid-size sedan to offer front, front-side and side curtain airbags as standard equipment. Accord earned a 5-star frontal impact rating from the U.S. government and a frontal ‘Best Pick’ from the Insurance Institute for Highway Safety (IIHS).”
- viii. In 2007, Honda also represented on its website: “Every Honda and Acura vehicle begins with a basic structure designed to be fundamentally safe, but we add advanced technology as standard equipment that can help the driver maintain control of the vehicle.”
- ix. In 2015, Honda represented on its website: “Honda is committed to providing safety for everyone—that means crash protection not only for our own drivers and passengers, but also for the occupants of other vehicles, and injury mitigation for pedestrians.” “As a leader, Honda looks beyond

government regulations, studying real world situations to develop new safety technologies for everyone.”

- x. In 2015, Honda represented on its website: “Acura believes driving a luxury car should be a highly enjoyable experience. And while we tend to dwell on the more exhilarating aspects of our vehicles, we consider your safety a top priority. . . . Safety has been top of mind with Acura engineers since day one. . . . Over the years, we’ve added many advanced safety technologies to the list, and the vast majority of them are now standard on every model.”

e. **Mazda:**

- i. In 2004, Mazda represented in brochures that its cars possessed “inspiring performance” and “reassuring safety features.”
- ii. In 2005, Mazda represented on its website: “[I]n every configuration, you’ll enjoy Mazda’s legendary performance, function, style and safety.”
- iii. In 2015, Mazda represented on its website: “In the realm of safety, Mazda’s aim is to achieve a safe and accident-free automotive society from the three viewpoints of vehicles, people, and roads and infrastructure. Specifically, the Company carries out research and development into safety technologies based on the Mazda Proactive Safety philosophy, which particularly respects the driver, and has released vehicles featuring the full suite of Mazda’s advanced safety technologies . . .”

f. **Mercedes**

- i. In a May 15, 2013 Mercedes press release on the Mercedes website, Dr. Dieter Zetsche, Chairman of the Board of Management of Daimler AG and

Head of Mercedes-Benz Cars said: “Rather than being about safety or aesthetics, power or efficiency, comfort or dynamism, our aspirations were ‘the best or nothing’ in every respect. No other car stands for the Mercedes-Benz brand promise more than the S-Class.”

- ii. In a June 18, 2014, Mercedes press release on the Mercedes website, Mercedes stated: “Hallmark Mercedes high level of safety- To make top-class safety available for everyone, the CLS-Class will in the future be fitted with a host of new assistance systems along with existing systems with upgraded functionality.”
- iii. In a March 22, 2016, Mercedes press release on the Mercedes website, Mercedes stated about its Coupe: “In keeping with the Mercedes-Benz tradition, the body forms the foundation for exemplary crash safety. A high-strength safety passenger compartment forms the core of this concept. It is surrounded by specially designed and crash-tested deformation zones, which ensure the best possible occupant safety. In addition to 3-point safety belts with pyrotechnical and reversible belt tensioning and belt-force limitation for driver, front passenger and those in the outer rear seats, numerous airbags serve to protect the vehicle’s occupants in an accident. These include combined thorax/pelvis side bags for driver and front passenger and an optimized window bag extending over both seat rows, optional side bags for the outer rear seats and a driver knee bag.”
- iv. In a September 1, 2015, press release on the Mercedes website, Prof. Dr. Thomas Weber, Member of the Daimler Board of Management responsible

for Group Research and Head of Mercedes-Benz claimed that “[t]he S-Class sets the pace on the global market when it comes to safety, efficiency and comfort.”

- v. In a 2011 C-Class brochure, Mercedes touted its “legacy of safety innovation,” promising “top-rated safety” that is “not just equipped with a list of safety features [but] engineered as an orchestrated system that is designed to make the most of the precious milliseconds it takes to avoid, or survive, a collision.”
- vi. In a 2011 M-Class brochure, Mercedes touted its “Five Star Safety.” With respect to airbags in particular, the brochure promises “10-way air bag protection. . . eight air bags offer a total of 10 ways of protection.”
- vii. In a 2012 S-Class Brochure, Mercedes claimed that the “S-Class is engineered not merely to meet expectations, but to redefine every measure of how an automobile... can protect its occupants.” The S-Class is “engineered with visionary safety advances.”

g. **Nissan/Infiniti:**

- i. In 2005, Nissan represented in brochures that its vehicles possessed “an entire set of safety features to help protect you from the unavoidable, including steel reinforcements, guard beams and advanced airbags that will help safeguard you and your passengers in the event of an accident.”
- ii. In 2015, Nissan represented on its website: “Nissan is committed to its position as a leader in the world of automotive safety. This dedication to

comprehensive safety goes into the engineering and design of every vehicle we make”

h. Subaru:

- i. In 2005, Subaru represented on its website: “Features like seatbelts with front pretensioners and force limiters, crumple zones, side-impact beams, front air bags and a Ring-Shaped Reinforcement Frame aid in minimizing the effects of a collision.”
- ii. In 2005, Subaru represented in its brochures: “THE SUBARU DRIVING EXPERIENCE EVOKES MANY EMOTIONS. Confidence should always be one of them. Which is why every Subaru is engineered according to the principles of ‘Active Driving/Active Safety.’”
- iii. In 2005, Subaru represented in its brochures: “Advanced front air bags, including passenger-side dual-stage deployment, help provide optimal protection for the driver and front passenger.”
- iv. In 2015, Subaru represented on its website: “Safety drives Subaru design.”

i. Toyota/Lexus:

- i. In 2002, Toyota represented on its website: “With safety features like dual front air bags, crumple zones and 3-point seatbelts in every seating position. So gather up all the hikers -- big and small -- and head out. Way out.”
- ii. In 2015, Toyota represented on its website: “For us, the journey towards a safe road never ends. This belief, along with our collaborative research efforts, drives us to create advancements and innovations in safety that have helped (and continue to help) prevent crashes and protect people.”

j. **Volkswagen:**

- i. Brochures, including those distributed at dealerships, which regularly touted its vehicles' standard and optional airbags.
- ii. A 2008 Audi A4 brochure that touted its "IIHS top safety pick" designation, and asserts it is "not just safe for its size, [but] safe for any size."
- iii. A 2012 Passat brochure that promised "passive safety features to help protect you and keep you safe," and that Volkswagen will "place safety at the top of our list."
- iv. A 2010 Jetta brochure that touted its "IIHS top safety pick" designation, and its use of "the latest in safety technology," as well as its multiple airbags.
- v. A 2010 VW CC brochure that touts the brand's industry-leading number of "IIHS top safety pick" designations, and "six standard airbags."
- vi. A 2011 Audi A6 brochure that promises "all-encompassing safety," and highlights the vehicle's standard airbags.
- vii. A 2012 Audi A3 brochure that states "we kind of have a thing for safety," and promises airbags as a standard feature.

211. Contrary to these representations and countless others like them, Defendants failed to equip Class Vehicles with airbags that would meet these proclaimed standards and failed to disclose to consumers that their vehicles actually contained dangerous and defective airbags.

V. Defendants' Inadequate Recalls and Failure to Assist Impacted Consumers

A. Slow and Inadequate Recalls

212. Even those vehicles that have been recalled have little chance of being repaired in the near term. Under the recalls required under NHTSA's Coordinated Remedy Order, approximately 44 million will be recalled in the United States due to the Inflator Defect.

213. At a Congressional hearing in June 2015, Takata's representative testified that Takata was shipping approximately 700,000 replacement inflators per month, and expected to increase production to 1 million replacement inflators per month by September 2015—well short of the number required to supply the ten automakers that have issued recalls.

214. At the current rate, it will take several years to produce enough Takata inflators to fix all recalled vehicles in the U.S., even setting aside the question of whether service departments would be able to provide the necessary services in a timely manner.

215. Not surprisingly, authorized dealers are experiencing a severe shortage of parts to replace the faulty airbags. Dealers have been telling frustrated car owners they can expect to wait many months before their airbags can be replaced.

216. Honda stated that it would not send recall letters to car owners or lessees until there are parts available, meaning that many drivers would not receive notices for weeks or longer, as they continue to drive vehicles with potentially deadly airbags. Honda owners who have received recall notices have been told to wait at least a month before their authorized dealer has availability to assess their vehicle.

217. New Chrysler stated that: “[t]o help control the proper allocation and inventory of parts, customer notifications are being prioritized by geography and make and model year of vehicle,” meaning that many drivers will not receive notices for weeks or longer, as they

continue to drive vehicles with potentially deadly airbags. Even to this day, certain New and Old Chrysler vehicles, such as the 2009 Chrysler Aspen, are only under recall if registered in certain geographic zones.

218. In February 2017, Mercedes sought year-long extensions for completing the recall in approximately 800,000 of its vehicles. Additionally, in correspondence to Plaintiffs and consumers, in December 2017 and January 2018, Mercedes acknowledged that “the availability of replacement parts [was] taking longer than anticipated.” It also indicated that it needed to obtain an extension of time from NHTSA to provide replacement parts, and that for certain vehicle owners belonging to a particular priority group established by NHTSA, replacement parts would not be expected to be available until March 31, 2018. Under the revised schedules, the remedy will not even *begin* for certain Mercedes vehicles until September 2019. The Defendants’ delay is consequential—it exposes purchasers, lessees, drivers, passengers, and, indeed, the general public, to an ongoing and unnecessary risk of harm.

219. Toyota dealers have reported that wait times for customers who own affected vehicles to get their Takata airbags replaced could be as long as one to three months.

220. In response to the airbag replacement shortage, certain Vehicle Manufacturer Defendants have taken the extreme step of disabling passenger airbags entirely and putting a “Do Not Sit Here” decal in the vehicle until a proper repair can be made. In the alternative, some Vehicle Manufacturer Defendants are advising customers to refrain from driving their vehicles until the airbags can be replaced.

221. Other automakers have also chosen to “repair” their customers’ vehicles not by providing temporary replacement vehicles or replacement parts, but by disengaging the Takata airbags entirely.

222. Congress has voiced concerns about this serious problem. Senators Richard Blumenthal and Edward J. Markey, in a letter to the Department of Transportation (“DOT”), said they were “alarmed and astonished that NHTSA has endorsed a policy recently announced by Toyota and GM that dealers should disable passenger-side airbags and instruct against permitting passengers in the front seat if replacement parts for these airbags are unavailable. As a matter of policy, this step is extraordinarily troubling and potentially dangerous. As a matter of law . . . §30122(b) of the Motor Vehicle Safety Act (49 U.S.C.) prohibits a manufacturer from knowingly making a safety device inoperative unless the [DOT] issues a specific exemption. We are unaware of an exemption from your office in the case of Takata airbags.”

223. As the manufacturers finally took steps to issue national recalls—after forceful prodding by NHTSA—commentators noted not only the potential supply constraints, but also a more frightening concern: “no one knows if the replacement inflators currently being installed will suffer the same issue.” Indeed, in response to repeated questioning at a Congressional hearing in June 2015, Takata’s representative refused to assure the public that replacement inflators containing ammonium nitrate would be safe and not prone to rupture.

B. GM Defendants Delay Repairs and Continue to Put Customers at Risk

224. The GM Defendants have used their considerable clout within the U.S. auto industry to delay repairs of nearly all the GM vehicles that are currently under recall due to the Inflator Defect. In November 2016, GM Parent and New GM appealed to NHTSA to allow them to delay repairs on all 2.5 million vehicles recalled in May 2016, so that they could conduct more tests on the Defective Airbags. When GM Parent and New GM recalled the additional 820,000 vehicles in January 2017, they requested that NHTSA allow repair of those vehicles to be deferred as well. Accordingly, GM Parent and New GM have asked to delay repair of

approximately 90% of the vehicles that they have recalled due to the Inflator Defect. Undoubtedly, GM Parent and New GM will ask to defer recalls of the 630,000 vehicles subject to the most recent January 2018 DIRs as well, leaving even more vehicle occupants at risk.

225. GM Parent and New GM claim the Takata airbags used in these vehicles should be “safe” to drive for a few more years, which obviates the need for an immediate recall, despite the fact that these airbags utilize the same ammonium-nitrate propellant contained in every other defective Takata airbag.

226. Notably, if GM Parent and New GM convince regulators that the Takata airbags in these vehicles are somehow safe, the recalls will be cancelled—saving Defendants \$880 million, according to a GM Parent filing with securities regulators.

227. Initially, GM Parent and New GM requested until August 31, 2017, to prove that these vehicles were safe, and recently asked for a further extension until March 31, 2018—a delay of nearly 2 years since the first of these vehicles were recalled. Consumers are, therefore, forced to play “Russian Roulette” with their vehicles: they must drive dangerous vehicles for years while they wait for the GM Defendants to replace the defective airbags in their cars, all the while exposing themselves and their passengers to the terrifying risk of being seriously injured or killed by their airbags in the event of a collision.

228. The GM Defendants’ persistent attempts to limit the scope of their recalls demonstrate a modus operandi of putting profits over people.

C. Defective Replacement Airbags

229. Perhaps most alarming, the replacement components manufactured by Takata that the Vehicle Manufacturer Defendants are using to “repair” recalled Class Vehicles suffer from the same Inflator Defect that plagues the parts being removed: they use ammonium nitrate as the

inflator's primary propellant. Indeed, Takata admitted in its submitted DIRs and at the June 2015 Congressional hearing that inflators installed in recalled vehicles as replacement parts are, in fact, defective and must be replaced yet again. And even recall notices issued in 2015 acknowledge that certain "replacement inflators are of the same design and materials as the inflators being replaced."

230. Moreover, inspection of inflators manufactured by Takata as recently as 2014 and installed in Class Vehicles by Vehicle Manufacturer Defendants through the recall process reveals that the ammonium nitrate pellets within the inflators already show signs of moisture-induced instability, such as rust stains, the tendency to clump together, and size variations. As a result, Takata cannot reasonably assure Plaintiffs or Class members that Class Vehicles equipped with such post-recall replacement parts will be any safer than they were with the initial Defective Airbags.

231. By way of example, Paragraph 30 of the November 2015 Consent Order provides that the NHTSA Administrator may issue final orders for the recall of Takata's desiccated phase stabilized ammonium nitrate ("PSAN") inflators, used as both original and replacement equipment, if no root cause has been determined by Takata or any other credible source, or if Takata has not otherwise shown the safety and/or service life of the parts by December 31, 2019. But as of July 10, 2017, Takata began recalling certain desiccated PSAN inflators installed in Ford, Mazda, and Nissan vehicles.

232. Moreover, while Takata and Defendants had previously assured the public that the Defective Airbags had been remedied and that the new airbags being placed in recalled vehicles were safe, in fact, several Defendants have been or will be required to recall some vehicles from model year 2013 and later because of the risk of the Takata airbags rupturing. And Takata has

now admitted that replacement airbags installed in some recalled vehicles are defective as well and it cannot assure the public that replacement inflators containing ammonium nitrate are safe and not prone to rupture.

233. As of August 2017, New GM told NHTSA that it had still not come up with a safe replacement for the Defective Inflators currently being used in millions of its vehicles.

VII. Automotive Recyclers Purchased Class Vehicles Containing Defective Airbags for Amounts Greater than Their Actual Value and Maintained the Defective Airbags for the Purposes of Resale

455. Generally, automotive recycling businesses purchase vehicles from a number of sources, including insurance salvage auctions, tow operators, charities, and the public.

456. Automotive recycling businesses calculate the purchase price for individual vehicles based, in part, on the presence and condition of the automotive parts contained in the vehicle. In particular, the presence of undeployed airbags is taken into account by automotive recycling businesses in determining the appropriate purchase price for the vehicle.

457. Automotive recycling businesses store and maintain the airbags and then resell them to consumers, automotive repair shops, automotive dealerships, wholesalers or other automotive recyclers.

458. Here, Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class purchased Class Vehicles containing Takata airbags at insurance salvage auctions and from tow operators, charities, and the public.

459. Automotive Recycler Plaintiffs own or have suffered losses on at least 1,900 airbags that are currently subject to Takata-related recalls.

- a. On information and belief, Butler has purchased at least the Class Vehicles identified in Exhibit A (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.
- b. On information and belief, Cunningham has purchased at least the Class Vehicles identified in Exhibit B (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had

the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

- c. On information and belief, Knox has purchased at least the Class Vehicles identified in Exhibit C (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.
- d. On information and belief, Midway has purchased at least the Class Vehicles identified in Exhibit D (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.
- e. On information and belief, Snyder's has purchased at least the Class Vehicles identified in Exhibit E (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on

which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

- f. On information and belief, Weaver has purchased at least the Class Vehicles identified in Exhibit F (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.
- g. On information and belief, Assignors have purchased at least the Class Vehicles identified in Exhibit G (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.
- h. On information and belief, Young's has purchased at least the Class Vehicles identified in Exhibit H (manufactured or sold by Defendants) including the airbag or airbags, and: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or the Vehicle Manufacturer

Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled, for a price less than fair market value had the airbag not been recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

460. Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class calculate the purchase price for each of the Class Vehicles based on, among other things, the demand for the vehicles, their constituent parts, and the expected resale value of those parts.

461. After Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class purchased the Class Vehicles containing the Takata airbags, they transported the vehicles to their facilities. An inspection of the airbags by Automotive Recycler Plaintiffs and Nationwide Automotive Recycler Class members would not have revealed the Inflator Defect.

462. At the time that Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class purchased the Class Vehicles, they had a reasonable expectation that Defendants would sell safe products and would abide by federal, state, and common law obligations to affirmatively disclose known defects in a timely manner.

463. This did not happen and, as a result, Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class purchased the Class Vehicles containing Takata airbags for amounts greater than their worth.

464. As detailed above, national and regional media outlets around the country have reported extensively about the Defective Airbags, raising public awareness of the Inflator Defect and its safety implications. The market value for Takata airbags in the Class Vehicles has been eliminated and there is no ability to resell these airbags. Finally, Automotive Recycler Plaintiffs

and members of the Nationwide Automotive Recycler Class have been injured by the costs of identifying, storing, maintaining, and otherwise disposing of the defective Takata airbags.

465. Moreover, the Vehicle Manufacturer Defendants and Takata have consistently resisted providing automotive recyclers with the data needed (such as a comprehensive list of specific vehicle identification numbers (VINs) and airbag serial numbers) to enable automotive recyclers to efficiently and effectively identify defective airbags manufactured by Takata.

TOLLING OF THE STATUTE OF LIMITATIONS

Fraudulent Concealment

466. Upon information and belief, Takata has known of the Inflator Defect in its Defective Airbags since at least the 1990s. Prior to installing the Defective Airbags in their vehicles, the Vehicle Manufacturer Defendants knew or should have known of the Inflator Defect, because Takata informed them that the Defective Airbags contained the volatile and unstable ammonium nitrate. In addition, Defendant Honda was again made aware of the Inflator Defect in the Takata airbags in Honda's vehicles in 2004, following a rupture incident. New Chrysler and the GM Defendants knew about the Inflator Defect from the moments of their inception in 2009, and the other Vehicle Manufacturer Defendants were made aware of the Inflator Defect in Takata's airbags no later than 2008. Defendants have concealed from or failed to notify Plaintiffs, Class members, and the public of the full and complete nature of the Inflator Defect.

467. Although Defendants have now acknowledged to safety regulators that Takata's airbags are defective, for years, Defendants did not fully investigate or disclose the seriousness of the issue and in fact downplayed the widespread prevalence of the problem.

468. Any applicable statute of limitations has therefore been tolled by Defendants' knowledge, active concealment, and denial of the facts alleged herein. This behavior is still ongoing.

Estoppel

469. Defendants were and are under a continuous duty to disclose to Plaintiffs and Class members the true character, quality, and nature of the Class Vehicles. They actively concealed the true character, quality, and nature of the vehicles and knowingly made misrepresentations about the quality, reliability, characteristics, and performance of the vehicles. Plaintiffs and Class members reasonably relied upon Defendants' knowing and affirmative misrepresentations and/or active concealment of these facts. Based on the foregoing, Defendants are estopped from relying on any statute of limitations in defense of this action.

Discovery Rule

470. The causes of action alleged herein did not accrue until Plaintiffs and Class members discovered that their vehicles had the Defective Airbags.

471. Plaintiffs and Class members, however, had no realistic ability to discern that the vehicles were defective until – at the earliest – when the vehicles were recalled. Even then, Plaintiffs and Class members had no reason to discover their causes of action because of Defendants' active concealment of the true nature of the defect.

American Pipe Tolling

472. A putative class action suit on behalf of automotive recyclers was brought against Defendants on February 10, 2015. *Automotive Dismantlers and Recyclers Assoc., Inc. v. Takata Corp. et al.*, 1:15-cv-20520-FAM (Moreno, J.). At the time it was brought, Plaintiffs and the

other Class members in this case were part of the classes alleged in the *Automotive Dismantlers* action.

473. Accordingly, pursuant to *American Pipe and Construction Co. v. Utah*, 414 U.S. 538 (1974), the claims of Plaintiffs and other Class members were tolled from at least February 10, 2015. Additional class actions filed by Plaintiffs following the *Automotive Dismantlers* action provide additional bases for *American Pipe* tolling.

CLASS ACTION ALLEGATIONS

474. The Classes' claims all derive directly from a single course of conduct by Takata and the Vehicle Manufacturer Defendants. This case is about the responsibility of Takata and the Vehicle Manufacturer Defendants, at law and in equity, for their knowledge, their conduct, and their products. Takata and the Vehicle Manufacturer Defendants have engaged in uniform and standardized conduct toward the Classes. They did not differentiate, in degree of care or candor, in their actions or inactions, or in the content of their statements or omissions, among individual Class members. The objective facts on these subjects are the same for all Class members. Within each Claim for Relief asserted by the respective Classes, the same legal standards govern. Additionally, many states, and for some claims all states, share the same legal standards and elements of proof, facilitating the certification of multistate or nationwide classes for some or all claims. Accordingly, Plaintiffs bring this lawsuit as a class action on their own behalf and on behalf of all other persons similarly situated as members of the proposed Classes pursuant to Federal Rules of Civil Procedure 23(a) and (b)(3) and/or (b)(2) and/or (c)(4). This action satisfies the numerosity, commonality, typicality, adequacy, predominance, and superiority requirements of those provisions.

The Automotive Recycler Classes

475. The Nationwide Automotive Recyclers Classes proposed below, the State Automotive Recycler Classes proposed below, and all their members are sometimes referred to herein as the “Class” or “Classes.”

476. Excluded from each Class proposed below are Takata and Defendants, their employees, officers, directors, legal representatives, heirs, successors and wholly or partly owned subsidiaries or affiliates of Defendants; Class Counsel and their employees; and the judicial officers and their immediate family members and associated court staff assigned to this case.

A. All Defendants Except New Chrysler and the GM

477. With respect to all Defendants except New Chrysler and GM, Automotive Recycler Plaintiffs bring this action pursuant to Federal Rules of Civil Procedure 23(a), (b)(2) and/or (b)(3) on behalf of a Nationwide Automotive Recycler Class defined as follows:

All automotive recyclers in the United States who, prior to the date on which a Class Vehicle was recalled, purchased a Class Vehicle containing an undeployed Takata airbag, and who: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

478. With respect to all Defendants except New Chrysler and GM, Automotive Recycler Plaintiffs (except with respect to Snyder’s Texas Deceptive Trade Practices Act claim) allege statewide class action claims on behalf of separate classes in the following states: Florida, Georgia, North Carolina, Missouri, Tennessee, and Virginia. These State Automotive Recycler Classes are initially defined as follows:

All automotive recyclers who, prior to the date on which a Class Vehicle was recalled, purchased a Class Vehicle in the state of ____ (e.g., Florida) containing an undeployed Takata airbag, and who: (i) still possess any such airbag; (ii) sold any such airbag or component of the airbag module to Takata or Defendants or an agent or third party acting on their behalf, after the date on which the Class

Vehicle was recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

479. With respect to its Texas Deceptive Trade Practices Act claim against all Defendants except New Chrysler and GM., Snyder's alleges statewide class action claims on behalf of a Texas Automotive Recycler Class initially defined as follows:

All automotive recyclers with assets of less than \$25 million (or controlled by entities with assets of less than \$25 million) in the state of Texas who, prior to the date on which a Class Vehicle was recalled, purchased a Class Vehicle containing an undeployed Takata airbag, and who: (i) still possess any such airbag; or, after the date on which the Class Vehicle was recalled, (ii) sold any such airbag or component of the airbag module to Takata or Defendants or an agent or third party acting on their behalf; or (iii) destroyed or disposed of any such airbag.

B. New Chrysler

480. With respect to New Chrysler, Automotive Recycler Plaintiffs bring this action pursuant to Federal Rules of Civil Procedure 23(a), (b)(2) and/or (b)(3), on behalf of a Nationwide Automotive Recycler Class defined as follows:

All automotive recyclers in the United States who, prior to the date on which a Class Vehicle was recalled and after June 1, 2009, purchased a Class Vehicle containing an undeployed Takata airbag, and who: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to New Chrysler or an agent or third party acting on its behalf, after the date on which the Class Vehicle was recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

481. With respect to New Chrysler, Automotive Recycler Plaintiffs (except with respect to Snyder's Texas Deceptive Trade Practices Act claim) allege statewide class action claims on behalf of separate classes in the following states: Florida, Georgia, Missouri, North Carolina, and Tennessee. These State Automotive Recycler Classes are initially defined as follows:

All automotive recyclers who, prior to the date on which a Class Vehicle was recalled and after June 1, 2009, purchased a Class Vehicle in the state of ____ (e.g., Florida) containing an undeployed Takata airbag, and who: (i) still possess any such airbag; (ii) sold any such airbag or component of the airbag module to New Chrysler or an agent or third party acting on its behalf, after the date on which the Class Vehicle was recalled; or (iii) destroyed or disposed of any such

airbag, after the date on which the Class Vehicle was recalled.

482. With respect to its Texas Deceptive Trade Practices Act claim against New Chrysler, Snyder's alleges statewide class action claims on behalf of the Texas Automotive Recycler Class initially defined as follows:

All automotive recyclers with assets of less than \$25 million (or controlled by entities with assets of less than \$25 million) in the state of Texas who, prior to the date on which a Class Vehicle was recalled, and after June 1, 2009, purchased a Class Vehicle containing an undeployed Takata airbag, and who: (i) still possess any such airbag; or, after the date on which the Class Vehicle was recalled, (ii) sold any such airbag or component of the airbag module to Takata or New Chrysler or an agent or third party acting on their behalf; or (iii) destroyed or disposed of any such airbag.

C. The GM Defendants

483. With respect to the GM Defendants, Automotive Recycler Plaintiffs bring this action pursuant to Federal Rules of Civil Procedure 23(a); and (b)(2), and/or (b)(3), on behalf of a Nationwide Automotive Recycler Class, defined as follows:

All automotive recyclers in the United States who, prior to the date on which a Class Vehicle was recalled and after July 10, 2009, purchased a Class Vehicle containing an undeployed Takata airbag, and who: (i) still possesses any such airbag; (ii) sold any such airbag or component of the airbag module to Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled; or (iii) destroyed or disposed of any such airbag, after the date on which the Class Vehicle was recalled.

484. With respect to the GM Defendants, Automotive Recycler Plaintiffs (except with respect to Snyder's Texas Deceptive Trade Practices Act claim) allege statewide class action claims on behalf of separate classes in the following states: Florida, Georgia, North Carolina, and Tennessee. These State Automotive Recycler Classes are initially defined as follows:

All automotive recyclers who, prior to the date on which a Class Vehicle was recalled and after July 10, 2009, purchased a Class Vehicle in the state of ____ (e.g., Florida) containing an undeployed Takata airbag, and who: (i) still possess any such airbag; (ii) sold any such airbag or component of the airbag module to Defendants or an agent or third party acting on their behalf, after the date on which the Class Vehicle was recalled; or (iii) destroyed or disposed of any such

airbag, after the date on which the Class Vehicle was recalled.

485. With respect to its Texas Deceptive Trade Practices Act claim against the GM Defendants, Snyder's alleges statewide class action claims on behalf of a Texas Automotive Recycler Class initially defined as follows:

All automotive recyclers with assets of less than \$25 million (or controlled by entities with assets of less than \$25 million) in the state of Texas who, prior to the date on which a Class Vehicle was recalled and after July 10, 2009, purchased a Class Vehicle containing an undeployed Takata airbag, and who: (i) still possess any such airbag; or, after the date on which the Class Vehicle was recalled, (ii) sold any such airbag or component of the airbag module to Takata or Defendants or an agent or third party acting on their behalf; or (iii) destroyed or disposed of any such airbag.

Numerosity and Ascertainability

486. This action satisfies the requirements of Fed. R. Civ. P. 23(a)(1). There are millions of Class Vehicles nationwide, and thousands of Class Vehicles in each of the States. Moreover, there are thousands of Automotive Recycler Class members in the United States. Individual joinder of all Class members is impracticable.

487. Each of the Classes is ascertainable because its members can be readily identified using business records, registration records, sales records, production records, and other information kept by Takata, Vehicle Manufacturer Defendants, Plaintiffs or third parties in the usual course of business and within their control. Plaintiffs anticipate providing appropriate notice to each certified Class, in compliance with Fed. R. Civ. P. 23(c)(1)(2)(A) and/or (B), to be approved by the Court after class certification, or pursuant to court order under Fed. R. Civ. P. 23(d).

Predominance of Common Issues

488. This action satisfies the requirements of Fed. R. Civ. P. 23(a)(2) and 23(b)(3) because questions of law and fact that have common answers that are the same for each of the

respective Classes predominate over questions affecting only individual Class members. These include, without limitation, the following:

- a. Whether the Class Vehicles suffer from the Inflator Defect;
- b. Whether the Class Vehicles have suffered a diminution of value as a result of those Vehicles' incorporation of the airbags at issue;
- c. Whether Defendants knew or should have known about the Inflator Defect, and, if so, how long Defendants have known of the defect;
- d. Whether the defective nature of the Class Vehicles constitutes a material fact reasonable businesses would have considered in deciding whether to purchase a Defective Vehicle;
- e. Whether Defendants had a duty to disclose the defective nature of the Class Vehicles to Plaintiffs and Class members;
- f. Whether Defendants omitted and failed to disclose material facts about the Class Vehicles;
- g. Whether Defendants' concealment of the true defective nature of the Class Vehicles induced Plaintiffs and Class members to act to their detriment by purchasing the Class Vehicles;
- h. Whether Defendants' conduct tolls any or all applicable limitations periods by acts of fraudulent concealment, application of the discovery rule, or equitable estoppels;
- i. Whether Defendants misrepresented that the Class Vehicles were safe;

- j. Whether Defendants engaged in unfair, deceptive, unlawful and/or fraudulent acts or practices in trade or commerce by failing to disclose that the Class Vehicles were designed, manufactured, and sold with defective airbag inflators;
- k. Whether Defendants' conduct, as alleged herein, was likely to mislead a reasonable business;
- l. Whether Defendants' statements, concealments and omissions regarding the Class Vehicles were material, in that a reasonable consumer could consider them important in purchasing, selling, maintaining, or operating such vehicles;
- m. Whether Defendants violated each of the States' consumer protection statutes, and if so, what remedies are available under those statutes;
- n. Whether Plaintiffs and the Classes are entitled to a declaratory judgment stating that the airbag inflators in the Class Vehicles are defective and/or not merchantable;
- o. Whether Defendants' unlawful, unfair, and/or deceptive practices harmed Plaintiffs and the Classes;
- p. Whether Plaintiffs and the Classes are entitled to equitable relief, including, but not limited to, a preliminary and/or permanent injunction;
- q. Whether Defendants should be declared responsible for notifying all Class members of the Inflator Defect and ensuring that all vehicles with the airbag Inflator Defect are promptly recalled and repaired;
- r. What aggregate amounts of statutory penalties are sufficient to punish and deter Defendants and to vindicate statutory and public policy;
- s. How such penalties should be most equitably distributed among Class members;

- t. Whether certain Defendants conspired together to violate RICO; and
- u. Whether certain Defendants associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity.

Typicality

489. This action satisfies the requirements of Fed. R. Civ. P. 23(a)(3) because Plaintiffs' claims are typical of the claims of the Class members, and arise from the same course of conduct by Takata and the Vehicle Manufacturer Defendants. The relief Plaintiffs seek is typical of the relief sought for the absent Class members.

Adequate Representation

490. Plaintiffs will fairly and adequately represent and protect the interests of the Classes. Plaintiffs have retained counsel with substantial experience in prosecuting consumer class actions, including actions involving defective products.

491. Plaintiffs and their counsel are committed to vigorously prosecuting this action on behalf of the Classes, and have the financial resources to do so. Neither Plaintiffs nor their counsel have interests adverse to those of the Classes.

Superiority

492. This action satisfies the requirements of Fed. R. Civ. P. 23(b)(2) because the Vehicle Manufacturer Defendants have acted and refused to act on grounds generally applicable to each Class, thereby making appropriate final injunctive and/or corresponding declaratory relief with respect to each Class as a whole.

493. This action satisfies the requirements of Fed. R. Civ. P. 23(b)(3) because a class action is superior to other available methods for the fair and efficient adjudication of this controversy. The common questions of law and of fact regarding Takata and the Vehicle Manufacturer Defendants' conduct and responsibility predominate over any questions affecting only individual Class members.

494. Because the damages suffered by each individual Class member may be relatively small, the expense and burden of individual litigation would make it very difficult or impossible for individual Class members to redress the wrongs done to each of them individually, such that most or all Class members would have no rational economic interest in individually controlling the prosecution of specific actions, and the burden imposed on the judicial system by individual litigation by even a small fraction of the Class would be enormous, making class adjudication the superior alternative under Fed. R. Civ. P. 23(b)(3)(A).

495. The conduct of this action as a class action presents far fewer management difficulties, far better conserves judicial resources and the parties' resources, and far more effectively protects the rights of each Class member than would piecemeal litigation. Compared to the expense, burdens, inconsistencies, economic infeasibility, and inefficiencies of individualized litigation, the challenges of managing this action as a class action are substantially outweighed by the benefits to the legitimate interests of the parties, the court, and the public of class treatment in this court, making class adjudication superior to other alternatives, under Fed. R. Civ. P. 23(b)(3)(D).

496. Plaintiffs are not aware of any obstacles likely to be encountered in the management of this action that would preclude its maintenance as a class action. Rule 23 provides the Court with authority and flexibility to maximize the efficiencies and benefits of the

class mechanism and reduce management challenges. The Court may, on motion of Plaintiffs or on its own determination, certify nationwide, statewide and/or multistate classes for claims sharing common legal questions; utilize the provisions of Rule 23(c)(4) to certify any particular claims, issues, or common questions of fact or law for class-wide adjudication; certify and adjudicate bellwether class claims; and utilize Rule 23(c)(5) to divide any Class into subclasses.

497. The Classes expressly disclaim any recovery in this action for physical injury resulting from the Inflator Defect without waiving or dismissing such claims. Plaintiffs are informed and believe that injuries suffered in crashes as a result of Defective Airbags implicate the Class Vehicles, constitute evidence supporting various claims, including diminution of value, and are continuing to occur because of Defendants' delays and inaction regarding the commencement and completion of recalls, and because of the installation of Defective Airbags as replacement airbags. The increased risk of injury from the Inflator Defect serves as an independent justification for the relief sought by Plaintiffs and the Classes.

REALLEGATION AND INCORPORATION BY REFERENCE

498. Plaintiffs reallege and incorporate by reference all of the preceding paragraphs and allegations of this Complaint, including the Nature of Claims, Factual Allegations, Tolling Allegations, and Class Action Allegations, as though fully set forth in each of the following Claims for Relief asserted on behalf of the Nationwide Class and the Statewide Classes.

CLAIMS FOR RELIEF

I. Nationwide Claims

A. Federal Claims

COUNT 1

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act (“RICO”), against the Honda Defendants

499. All Plaintiffs bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Honda Defendants.

500. The Honda Defendants are all “persons” under 18 U.S.C. § 1961(3).

501. The Honda Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Honda-Takata RICO Enterprise, defined below, through a pattern of racketeering activity.

502. Plaintiffs and Class members are “person[s] injured in his or her business or property” by reason of the Honda Defendants’ violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Honda-Takata RICO Enterprise

503. The following persons, and others presently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the Honda-Takata RICO Enterprise:

- a. The Honda Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a

decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.

- b. Takata, who, with Honda's guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The Honda Defendants' Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Honda-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. Takata's Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Honda-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

504. The Honda-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of "persons" associated together for a common purpose. The Honda-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

505. While the Honda Defendants participated in the conduct of the Honda-Takata RICO Enterprise, they had an existence separate and distinct from the Honda-Takata RICO Enterprise. Further, the Honda-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the Honda Defendants have engaged.

506. At all relevant times, the Honda Defendants operated, controlled or managed the Honda-Takata RICO Enterprise, through a variety of actions. The Honda Defendants' participation in the Honda-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the Honda Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

507. The members of the Honda-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Honda-Takata RICO Enterprise's members. The members of the Honda-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Honda-Takata RICO Enterprise benefited from the common purpose: the Honda Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the Honda Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

508. The Honda Defendants conducted and participated in the conduct of the affairs of the Honda-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2004 and continuing to this day, and that consisted of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

509. For the Honda Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the Honda Defendants also maintained and boosted consumer confidence in the Honda brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the Honda Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

510. As detailed in the General Factual Allegations, the Honda Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began maiming and killing vehicle occupants, the Honda Defendants held secret meetings that revealed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

511. To further the scheme to defraud, the Honda Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The Honda Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested itself in certain areas of the country, when in fact the Honda Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Honda vehicle and manifests itself across the country.

512. To further the scheme to defraud, the Honda Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

513. To further the scheme to defraud, the Honda Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

514. To carry out, or attempt to carry out the scheme to defraud, the Honda Defendants have conducted or participated in the conduct of the affairs of the Honda-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The Honda Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the Honda website, communications with NHTSA, statements to the press, and communications with

other members of the Honda-Takata RICO Enterprise, as well as advertisements and other communications to the Honda Defendants' customers, including Plaintiffs and Class members; and

- b. The Honda Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

515. The Honda Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

516. The Honda Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the Honda Defendants' intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on the Honda Defendants' material misrepresentations and omissions.

517. As described throughout this Complaint, the Honda Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

518. The predicate acts all had the purpose of generating significant revenue and profits for the Honda Defendants and the Honda-Takata RICO enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the Honda Defendants through their participation in the Honda-Takata RICO Enterprise and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

519. By reason of and as a result of the conduct of the Honda Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

520. The Honda Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 2

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced And Corrupt Organizations Act (“RICO”), against the Honda Defendants

521. All Plaintiffs bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class against the Honda Defendants.

522. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 1 above.

523. At all relevant times, Takata and the Honda Defendants were associated with the Honda-Takata RICO Enterprise, defined below, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the Honda-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

524. Over the course of the past decade, the Honda Defendants and Takata shared information about injurious airbag deployments—jointly and secretly—investigated the possible causes of those deployments, delayed and/or prevented the release of inculpatory information, misled regulatory authorities, and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The Honda Defendants’ and Takata’s close cooperation on issues surrounding the Inflator Defect and joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

525. The Honda Defendants committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof.

526. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between Honda and Takata:

⁶Case No. 2010-CV-04232-MG.

[REDACTED]

[REDACTED]

[REDACTED]

527. Honda and Takata agreed to and did conduct and participate in the conduct of the Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count.

528. As a direct and proximate result of Honda's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

529. Had Takata and/or Honda been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Takata's and Honda's conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

530. Honda's and Takata's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

531. The Honda Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 3

Violation of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C. § 1962(c), against New Chrysler

532. Plaintiffs Butler, Knox, Midway, Snyder's, and Weaver bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class, against New Chrysler.

533. New Chrysler and Takata are both "persons" under 18 U.S.C. § 1961(3).

534. Plaintiffs and Class members are "person[s] injured in his or her business or property" by reason of New Chrysler's violation of RICO within the meaning of 18 U.S.C. § 1964(c).

535. Since the 363 Sale to New Chrysler in June 2009, Takata and New Chrysler shared information about erroneous or injurious airbag deployments, jointly and secretly; investigated the possible causes of those deployments; delayed and/or prevented the release of inculpatory information; misled regulatory authorities; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags, and the safety risks those airbags posed. New Chrysler's close cooperation with Takata on issues surrounding the Inflator Defect, and joint participation in predicate acts described below, is evidence of the conspiracy to

participate in a RICO enterprise, and conspiracy to conduct the affairs of such an enterprise through a pattern of racketeering activity.

The New Chrysler-Takata RICO Enterprise

536. The following persons, and others currently unknown, have been members of, and constitute an “association-in-fact enterprise,” within the meaning of RICO, and will be referred to herein collectively as the Takata RICO Enterprise:

- a. Takata, who, with New Chrysler’s guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade and still refuse to entirely acknowledge.
- b. Takata’s Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- c. New Chrysler, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that it knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators since June 1, 2009, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- d. New Chrysler’s Officers, Executives, and Engineers, who have collaborated and colluded with each other, and with other associates in fact, in the New Chrysler-

Takata RICO Enterprise, to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles; and actively concealed the danger and Inflator Defect from Plaintiffs and Class members.

537. The New Chrysler-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of “persons” associated together for a common purpose. The New Chrysler-Takata RICO Enterprise had an ongoing organization with an ascertainable structure and functioned as a continuing unit with separate roles and responsibilities.

538. At all relevant times, New Chrysler operated, controlled, or managed the New Chrysler-Takata RICO Enterprise through a variety of actions. New Chrysler’s participation in the New Chrysler-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud, because New Chrysler manufactured, marketed, and sold Class Vehicles with the Defective Airbags; concealed the nature and scope of the Inflator Defect; and profited from such concealment

539. The members of the New Chrysler-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the New Chrysler-Takata RICO Enterprise’s members.

540. The members of the New Chrysler-Takata RICO Enterprise shared the bounty generated by the enterprise, *i.e.*, by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the New Chrysler-Takata RICO Enterprise benefited from the common purpose: New Chrysler sold or leased more Class Vehicles and received more for those vehicles than they would have otherwise, had the scope and nature of the

Inflator Defect not been concealed; Takata sold more Defective Airbags to New Chrysler than they would have otherwise, had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

541. At all relevant times, New Chrysler operated, controlled, or managed the New Chrysler-Takata RICO Enterprise through a variety of actions. New Chrysler's participation in the New Chrysler-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud, because New Chrysler manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

Pattern of Racketeering Activity

542. New Chrysler conducted and participated in the conduct of the affairs of the New Chrysler-Takata RICO Enterprise through a long-running pattern of racketeering activity, beginning June 1, 2009, and continuing to this day, consisting of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

543. For New Chrysler, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to avoid incurring the expenses associated with repairing the Inflator Defect in New and Old Chrysler vehicles that New Chrysler was obligated to recall. By concealing the scope and nature of the Inflator Defect in its millions of Defective Airbags, New Chrysler also maintained

and boosted consumer confidence in the New Chrysler brand and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped New Chrysler and Takata sell more vehicles and airbags than they otherwise would have sold and for a much higher price or profit

544. As detailed in the general factual allegations, New Chrysler was well aware of the risks of using ammonium nitrate as the propellant in its airbag inflators but intentionally subjected Plaintiffs and Class members to those risks, or consciously disregarded those risks, in order to maximize their profits. Moreover, even after New Chrysler was aware of multiple ruptures in Takata inflators being used in New Chrysler vehicles and vehicles for which New Chrysler was responsible to recall, and vehicles with the Inflator Defect began maiming and killing vehicle occupants in other manufacturers' vehicles in the field, New Chrysler continued to conceal the nature and scope of the Inflator Defect.

545. To further the scheme to defraud, New Chrysler conspired to and did repeatedly misrepresent and conceal the nature and scope of the Inflator Defect. As late as June 2014, New Chrysler refused to publicly acknowledge that a defect even existed, when in fact New Chrysler knew that there was an Inflator Defect, which is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the defectively designed inflator—that plagues every Takata airbag, and manifests itself across the country.

546. To further the scheme to defraud, New Chrysler conspired to and did conceal the nature and scope of the Inflator Defect from federal regulators, enabling New Chrysler to escape investigation and the costs associated with recalls.

547. To further the scheme to defraud, New Chrysler promoted and touted the safety, reliability, and quality of its vehicles, while simultaneously concealing the nature and scope of the Inflator Defect.

548. To carry out or attempt to carry out the scheme to defraud New Chrysler has conducted or participated in the conduct of the affairs of the New Chrysler-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. New Chrysler devised and furthered the scheme to defraud by use of the mail, telephone, and internet and transmitted or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the New Chrysler website, communications with NHTSA, statements to the press, and communications with other members of the New Chrysler-Takata RICO Enterprise, as well as advertisements and other communications to their customers, including Plaintiffs and Class members; and
- b. New Chrysler utilized the interstate and international mail and wires for the purpose of obtaining money or property, by means of the omissions, false pretense, and misrepresentations described herein.

549. Since June 1, 2009, New Chrysler's pattern of racketeering activity in violation of the mail and wire fraud statutes included, but was not limited to, the following:

- a. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

550. New Chrysler’s conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of New Chrysler’s intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on New Chrysler’s material misrepresentations and omissions.

551. As described throughout this Complaint, on or after June 1, 2009, New Chrysler conspired to or did engage in a pattern of related and continuous predicate acts. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members—and obtaining significant monies and revenues from them—while providing vehicles with Defective Airbags worth significantly less than the

purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

552. The predicate acts all had the purpose of generating significant revenue and profits for New Chrysler at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by New Chrysler through their participation in the New Chrysler-Takata RICO Enterprise and in furtherance of its fraudulent scheme and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

553. By reason of and as a result of the conduct of New Chrysler, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the values of the Class Vehicles have diminished, thus reducing their resale values.

554. New Chrysler's violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as

injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. § 1964(a) and (c).

COUNT 4

Violation of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C. § 1962(d), against New Chrysler

555. Plaintiffs Butler, Knox, Midway, Snyder's, and Weaver bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class against the New Chrysler.

556. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth above in Count 3.

557. At all relevant times, New Chrysler was associated with the New Chrysler-Takata RICO Enterprise and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the New Chrysler-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d). New Chrysler also agreed to the objective of the conspiracy or to commit at least two racketeering predicate acts.

558. Over the course of the past eight and a half years, the New Chrysler and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. New Chrysler's and Takata's close cooperation on issues surrounding the Inflator Defect and joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

[REDACTED]

561. In addition, Takata engaged in the following predicate acts in furtherance of the conspiracy:

a. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

562. New Chrysler agreed to and did conduct and participate in the conduct of the New Chrysler-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described above.

563. As a direct and proximate result of New Chrysler's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' values have diminished, thus reducing their resale values.

564. Had New Chrysler been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was its duty, Plaintiffs would not have suffered these harms.

New Chrysler's conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension and was committed with reckless indifference to the truth if not the outright intent to deceive.

565. Plaintiffs and Class Members seek to hold New Chrysler liable only for damages resulting from conduct of New Chrysler, its co-conspirators, and the New Chrysler-Takata RICO Enterprise that occurred on or after June 1, 2009.

566. New Chrysler's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

567. New Chrysler's violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 5

Violation of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C. § 1962(c), against the GM Defendants

568. Plaintiffs Butler, Knox, Snyder's, and Weaver bring this claim against the GM Defendants on behalf of themselves and the Nationwide Automotive Recycler Class.

569. The GM Defendants and Takata are "persons" under 18 U.S.C. § 1961(3).

570. The GM Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the New GM-Takata RICO Enterprise through a pattern of racketeering activity.

571. Plaintiffs and Class members are “person[s] injured in his or her business or property,” by reason of Defendants’ violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The New GM-Takata RICO Enterprise

572. The following persons, and others currently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the New GM-Takata RICO Enterprise:

- a. The GM Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators since July 10, 2009, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- b. Takata, who, with the GM Defendants’ guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for years.
- c. The GM Defendants’ Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the New GM-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealed the danger and Inflator Defect from Plaintiffs and Class members.
- d. Takata’s Officers, Executives, and Engineers, who have collaborated and colluded

with each other and with other associates in fact in the New GM-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealed the danger and Inflator Defect from Plaintiffs and Class members.

573. The New GM-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of “persons” associated together for a common purpose. The New GM-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

574. While the GM Defendants participated in the conduct of the New GM-Takata RICO Enterprise, each had an existence separate and distinct from the New GM-Takata RICO Enterprise. Further, the New GM-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which Defendants have engaged.

575. At all relevant times, the GM Defendants operated, controlled, or managed the New GM-Takata RICO Enterprise through a variety of actions. The GM Defendants’ participation in the New GM-Takata RICO Enterprise was necessary for the successful operation of their scheme to defraud because the GM Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

576. The members of the New GM-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the New GM-Takata RICO Enterprise’s members.

The members of the New GM-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the New GM-Takata RICO Enterprise benefited from the common purpose: the GM Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the GM Defendants than it would have otherwise, had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

577. The GM Defendants conducted and participated in the conduct of the affairs of the New GM-Takata RICO Enterprise through a long-running pattern of racketeering activity, beginning July 10, 2009, and continuing to this day, consisting of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

578. For the GM Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with repairing the Inflator Defect in GM vehicles that the GM Defendants were obligated to recall. By concealing the scope and nature of the Inflator Defect in millions of Defective Airbags, Defendants also maintained and boosted consumer

confidence in the GM brand and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the GM Defendants and Takata sell more vehicles and airbags than they otherwise would have sold, and to sell them at a much higher price or for a higher profit.

579. As detailed in the General Factual Allegations, the GM Defendants were well aware of the risks of using ammonium nitrate as the propellant in their inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, even after the GM Defendants became aware of multiple ruptures in Takata inflators being used in New GM vehicles and vehicles for which Defendants are responsible to recall, and after the Inflator Defect began maiming and killing vehicle occupants in other manufacturers' vehicles in the field, the GM Defendants continued to conceal the nature and scope of the Inflator Defect.

580. To further the scheme to defraud, the GM Defendants misrepresented and concealed the nature and scope of the Inflator Defect. The GM Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested itself in certain areas of the country, when in fact the GM Defendants knew that the Inflator Defect is a fundamental, uniform defect that manifests itself across the country, in every Takata airbag equipped in a New GM vehicle, or vehicle for which Defendants are responsible to recall.

581. To further the scheme to defraud, the GM Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling the GM Defendants to escape and delay investigation and costs associated with recalls.

582. To further the scheme to defraud, the GM Defendants promoted and touted the safety, reliability, and quality of their vehicles while simultaneously concealing the nature and scope of the Inflator Defect.

583. To carry out, or attempt to carry out the scheme to defraud, the GM Defendants have conducted or participated in the conduct of the affairs of the New GM-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The GM Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire facilities travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the Takata website, communications with NHTSA, statements to the press, and communications with other members of the New GM-Takata RICO Enterprise, as well as advertisements and other communications to the GM Defendants' customers and other purchasers of New GM vehicles and vehicles for which the GM Defendants are responsible to recall, including Plaintiffs and Class members; and
- b. The GM Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

584. Since July 10, 2009, to present, the GM Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included, but was not limited to, the following:

c. 

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

585. GM Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of their intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on GM Defendants' material misrepresentations and omissions.

586. As described throughout this Complaint, on or after July 10, 2009, GM Defendants engaged in a pattern of related and continuous predicate acts. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing vehicles with Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

587. The predicate acts all had the purpose of generating significant revenue and profits for Defendants and the New GM-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by GM Defendants through their participation in the New GM-Takata RICO Enterprise, and in

furtherance of their fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds, and avoiding the expenses associated with remediating the Inflator Defect.

588. By reason of and as a result of the conduct of GM Defendants, and in particular, their pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems, and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless, and the Automotive Recyclers are now unable to sell them; and
- c. the values of Class Vehicles have diminished, thus reducing their resale values.

589. GM Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs; and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive relief, equitable relief, and costs and reasonable attorneys' fees, pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 6

Violation of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C. § 1962(d), against the GM Defendants

590. Plaintiffs Butler, Knox, Snyder's, and Weaver bring this claim against the GM Defendants on behalf of themselves and the Nationwide Automotive Recycler Class

591. In addition to the General Factual Allegations re-alleged and incorporated herein, Plaintiffs re-allege and incorporate the allegations set forth in Count 5 above.

592. At all relevant times, Takata and GM Defendants were associated with the New GM-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the New GM-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

593. Since the 363 sale to New GM in July 2009, Takata and GM Defendants shared information about erroneous or injurious airbag deployments; jointly and secretly investigated the possible causes of those deployments; delayed and/or prevented the release of inculpatory information, misled regulatory authorities; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. Defendants' close cooperation with Takata on issues surrounding the Inflator Defect, and joint participation in predicate acts described below, is evidence of the conspiracy to participate in a RICO enterprise and conspiracy to conduct the affairs of such an enterprise through a pattern of racketeering activity.

Overt Acts

594. GM Defendants committed, and caused to be committed, a series of overt acts in furtherance of the conspiracy and to affect the objects thereof. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between GM Defendants and Takata:

a. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

596. GM Defendants agreed to, and did engage and participate in, the conduct of the New GM-Takata RICO Enterprise's affairs, through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described above.

597. As a direct and proximate result of GM Defendants' conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems, and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless, and the Automotive Recyclers are now unable to sell them; and
- c. the values of Class Vehicles have diminished, thus reducing their resale values.

598. Plaintiffs and Class Members seek to hold Defendants liable only for damages resulting from conduct of GM Defendants, their co-conspirators, and the New GM-Takata RICO Enterprise that occurred on or after July 10, 2009.

599. Had GM Defendants been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. GM Defendants' conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

600. GM Defendants' conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

601. GM Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 7

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), against the Nissan Defendants

602. All Plaintiffs bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Nissan Defendants.

603. The Nissan Defendants are all "persons" under 18 U.S.C. § 1961(3).

604. The Nissan Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Nissan-Takata RICO Enterprise through a pattern of racketeering activity.

605. Plaintiffs and Class members are “person[s] injured in his or her business or property” by reason of the Nissan Defendants’ violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Nissan-Takata RICO Enterprise

606. The following persons, and others presently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the Nissan-Takata RICO Enterprise:

- a. The Nissan Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- b. Takata, who, with Nissan’s guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The Nissan Defendants’ Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Nissan-Takata RICO Enterprise to deceive Plaintiffs and Class members into

purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

- d. Takata's Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Nissan-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- e. Dealerships that sell vehicles manufactured by the Nissan Defendants, which sold or leased the Class Vehicles containing Defective Airbags to Plaintiffs and Class members, and continue to install replacement airbags manufactured by Takata into recalled Class Vehicles that suffer from the same Inflator Defect that plagues the removed airbags.

607. The Nissan-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of "persons" associated together for a common purpose. The Nissan-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

608. While the Nissan Defendants participated in the conduct of the Nissan-Takata RICO Enterprise, they had an existence separate and distinct from the Nissan-Takata RICO Enterprise. Further, the Nissan-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the Nissan Defendants have engaged.

609. At all relevant times, the Nissan Defendants operated, controlled or managed the Nissan-Takata RICO Enterprise, through a variety of actions. The Nissan Defendants' participation in the Nissan-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the Nissan Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

610. The members of the Nissan-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Nissan-Takata RICO Enterprise's members. The members of the Nissan-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Nissan-Takata RICO Enterprise benefited from the common purpose: the Nissan Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the Nissan Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

611. The Nissan Defendants conducted and participated in the conduct of the affairs of the Nissan-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2004 and continuing to this day, and that consisted

of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

612. For the Nissan Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the Nissan Defendants also maintained and boosted consumer confidence in the Nissan brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the Nissan Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

613. As detailed in the General Factual Allegations, the Nissan Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began resulting in field incidents, the Nissan Defendants held meetings that further revealed and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

614. To further the scheme to defraud, the Nissan Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The Nissan Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested in certain airbags and/or certain areas of the country, when in fact the

Nissan Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Nissan vehicle and manifests itself across the country.

615. To further the scheme to defraud, the Nissan Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

616. To further the scheme to defraud, the Nissan Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

617. To carry out, or attempt to carry out the scheme to defraud, the Nissan Defendants have conducted or participated in the conduct of the affairs of the Nissan-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The Nissan Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the Nissan website, communications with NHTSA, statements to the press, and communications with other members of the Nissan-Takata RICO Enterprise, as well as advertisements and other communications to the Nissan Defendants' customers, including Plaintiffs and Class members; and

b. The Nissan Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

618. The Nissan Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

[REDACTED]

[REDACTED]

619. The Nissan Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the Nissan Defendants' intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on the Nissan Defendants' material misrepresentations and omissions.

620. As described throughout this Complaint, the Nissan Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

621. The predicate acts all had the purpose of generating significant revenue and profits for the Nissan Defendants and the Nissan-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the Nissan Defendants through their participation in the Nissan-Takata RICO Enterprise and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

622. By reason of and as a result of the conduct of the Nissan Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

623. The Nissan Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 8

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced And Corrupt Organizations Act ("RICO"), against the Nissan Defendants.

624. All Plaintiffs bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class against the Nissan Defendants.

625. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 7.

626. At all relevant times, Takata and the Nissan Defendants were associated with the Nissan-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the Nissan-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

627. Over the course of the past decade, the Nissan Defendants and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The Nissan Defendants' and Takata's close cooperation on issues surrounding the Inflator Defect and joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

628. Takata and Nissan Defendants committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof.

629. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between Nissan and Takata:

- a. [REDACTED]

630. Nissan and Takata agreed to and did conduct and participate in the conduct of the Nissan-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count.

631. As a direct and proximate result of Nissan's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

632. Had Takata and/or Nissan been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Takata's and Nissan's conspiracy to commit mail fraud and/or wire fraud was reasonably

calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

633. Nissan's and Takata's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

634. The Nissan Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 9

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), against the BMW Defendants

635. All Plaintiffs bring this Count on behalf themselves and of the Nationwide Automotive Recycler Class against the BMW Defendants.

636. The BMW Defendants are all "persons" under 18 U.S.C. § 1961(3).

637. The BMW Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the BMW-Takata RICO Enterprise through a pattern of racketeering activity.

638. Plaintiffs and Class members are "person[s] injured in his or her business or property" by reason of the BMW Defendants' violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The BMW-Takata RICO Enterprise

639. The following persons, and others presently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the BMW-Takata RICO Enterprise:

- a. The BMW Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- b. Takata, who, with BMW’s guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The BMW Defendants’ Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the BMW-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. Takata’s Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the BMW-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and

defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

640. The BMW-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of “persons” associated together for a common purpose. The BMW-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

641. While the BMW Defendants participated in the conduct of the BMW-Takata RICO Enterprise, they had an existence separate and distinct from the BMW-Takata RICO Enterprise. Further, the BMW-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the BMW Defendants have engaged.

642. At all relevant times, the BMW Defendants operated, controlled, or managed the BMW-Takata RICO Enterprise, through a variety of actions. The BMW Defendants’ participation in the BMW-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the BMW Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

643. The members of the BMW-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the BMW-Takata RICO Enterprise’s members. The members of the BMW-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to

defraud. Each member of the BMW-Takata RICO Enterprise benefited from the common purpose: the BMW Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; the BMW Defendants sold more Defective Airbags to the BMW Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

644. The BMW Defendants conducted and participated in the conduct of the affairs of the BMW-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2003 and continuing to this day, and that consisted of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

645. For the BMW Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the BMW Defendants also maintained and boosted consumer confidence in the BMW brand, and avoided remediation costs and negative publicity, all of which furthered the

scheme to defraud and helped the BMW Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

646. As detailed in the General Factual Allegations, the BMW Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began resulting in field incidents, the BMW Defendants held meetings that further revealed and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

647. To further the scheme to defraud, the BMW Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The BMW Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested in certain airbags and/or certain areas of the country, when in fact the BMW Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a BMW vehicle and manifests itself across the country.

648. To further the scheme to defraud, the BMW Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

649. To further the scheme to defraud, the BMW Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

650. To carry out, or attempt to carry out the scheme to defraud, the BMW Defendants have conducted or participated in the conduct of the affairs of the BMW-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The BMW Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the BMW website, communications with NHTSA, statements to the press, and communications with other members of the BMW-Takata RICO Enterprise, as well as advertisements and other communications to the BMW Defendants' customers, Plaintiffs, and Class members; and
- b. The BMW Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

651. The BMW Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

- a. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[Redacted text block]

[Redacted text block]

[Redacted text block]

[Redacted text block]

[REDACTED]

[REDACTED]

652. The BMW Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the BMW Defendants' intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on the BMW Defendants' material misrepresentations and omissions.

653. As described throughout this Complaint, the BMW Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

654. The predicate acts all had the purpose of generating significant revenue and profits for the BMW Defendants and the BMW-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the BMW Defendants through their participation in the BMW-Takata RICO Enterprise and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

655. By reason of and as a result of the conduct of the BMW Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

656. The BMW Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 10

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced And Corrupt Organizations Act ("RICO"), against the BMW Defendants.

657. All Plaintiffs bring this claim on behalf themselves of the Nationwide Automotive Recycler Class against the BMW Defendants.

658. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 9.

659. At all relevant times, the BMW Defendants were associated with the BMW-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the BMW-

Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

660. Over the course of the past decade, the BMW Defendants and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The BMW Defendants' and Takata's close cooperation on issues surrounding the Inflator Defect and joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

661. The BMW Defendants committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof.

662. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between BMW and Takata:

- a. [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

663. BMW and Takata agreed to and did conduct and participate in the conduct of the BMW-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count.

664. As a direct and proximate result of BMW's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

665. Had BMW been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. BMW's conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

666. BMW's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

667. The BMW Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as

injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 11

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), against the Mazda Defendants

668. All Plaintiffs bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Mazda Defendants.

669. The Mazda Defendants are all "persons" under 18 U.S.C. § 1961(3).

670. The Mazda Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Mazda-Takata RICO Enterprise, defined below, through a pattern of racketeering activity.

671. Plaintiffs and Class members are "person[s] injured in his or her business or property" by reason of the Mazda Defendants' violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Mazda-Takata RICO Enterprise

672. The following persons, and others presently unknown, have been members of and constitute an "association-in-fact enterprise" within the meaning of RICO, and will be referred to herein collectively as the Mazda-Takata RICO Enterprise:

- a. The Mazda Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.

- b. Takata, who, with Mazda's guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The Mazda Defendants' Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Mazda-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. The Takata's Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Mazda-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

673. The Mazda-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of "persons" associated together for a common purpose. The Mazda-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

674. While the Mazda Defendants participated in the conduct of the Mazda-Takata RICO Enterprise, they had an existence separate and distinct from the Mazda-Takata RICO

Enterprise. Further, the Mazda-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the Mazda Defendants have engaged.

675. At all relevant times, the Mazda Defendants operated, controlled or managed the Mazda-Takata RICO Enterprise, through a variety of actions. The Mazda Defendants' participation in the Mazda-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the Mazda Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

676. The members of the Mazda-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Mazda-Takata RICO Enterprise's members. The members of the Mazda-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Mazda-Takata RICO Enterprise benefited from the common purpose: the Mazda Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the Mazda Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

677. The Mazda Defendants conducted and participated in the conduct of the affairs of the Mazda-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2004 and continuing to this day, and that consisted of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

678. For the Mazda Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the Mazda Defendants also maintained and boosted consumer confidence in the Mazda brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the Mazda Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

679. As detailed in the General Factual Allegations, the Mazda Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began resulting in field incidents, the Mazda Defendants held meetings that further revealed and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

680. To further the scheme to defraud, the Mazda Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The Mazda Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested in certain airbags and/or certain areas of the country, when in fact the Mazda Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Mazda vehicle and manifests itself across the country.

681. To further the scheme to defraud, the Mazda Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

682. To further the scheme to defraud, the Mazda Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

683. To carry out, or attempt to carry out the scheme to defraud, the Mazda Defendants have conducted or participated in the conduct of the affairs of the Mazda-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The Mazda Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the Mazda website, communications with NHTSA, statements to the press, and communications with

other members of the Mazda-Takata RICO Enterprise, as well as advertisements and other communications to the Mazda Defendants' customers, Plaintiffs, and Class members; and

- b. The Mazda Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

684. The Mazda Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

- a. [REDACTED]

- [REDACTED]

[REDACTED]

685. The Mazda Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the Mazda Defendants' intentional conduct. Mazda, Class members, and federal regulators, among others, relied on the Mazda Defendants' material misrepresentations and omissions.

686. As described throughout this Complaint, the Mazda Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding customers, Plaintiffs, and other Class members and obtaining or retaining significant

monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

687. The predicate acts all had the purpose of generating significant revenue and profits for the Mazda Defendants and the Mazda-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the Mazda Defendants through their participation in the Mazda-Takata RICO Enterprise and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

688. By reason of and as a result of the conduct of the Mazda Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

689. The Mazda Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as

injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 12

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced And Corrupt Organizations Act ("RICO"), against the Mazda Defendants.

690. All Plaintiffs bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class against the Mazda Defendants.

691. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 11.

692. At all relevant times, Takata and the Mazda Defendants were associated with the Mazda-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the Mazda-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

693. Over the course of the past decade, the Mazda Defendants and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The Mazda Defendants' and Takata's close cooperation on issues surrounding the Inflator Defect and joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

694. The Mazda Defendants committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof.

695. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between Mazda and Takata:

[REDACTED]

696. Mazda and Takata agreed to and did conduct and participate in the conduct of the Mazda-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count.

697. As a direct and proximate result of Mazda's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

698. Had Mazda been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Takata's and Mazda's conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

699. Mazda's and Takata's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

700. The Mazda Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 13

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), against the Subaru Defendants

701. All Plaintiffs bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Subaru Defendants.

702. The Subaru Defendants are all "persons" under 18 U.S.C. § 1961(3).

703. The Subaru Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Subaru-Takata RICO Enterprise through a pattern of racketeering activity.

704. Plaintiffs and Class members are "person[s] injured in his or her business or property" by reason of the Subaru Defendants' violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Subaru-Takata RICO Enterprise

705. The following persons, and others presently unknown, have been members of and constitute an "association-in-fact enterprise" within the meaning of RICO, and will be referred to herein collectively as the Subaru-Takata RICO Enterprise:

- a. The Subaru Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- b. Takata, who, with Subaru's guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The Subaru Defendants' Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Subaru-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. The Takata's Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Subaru-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

706. The Subaru-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of "persons" associated together

for a common purpose. The Subaru-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

707. While the Subaru Defendants participated in the conduct of the Subaru-Takata RICO Enterprise, they had an existence separate and distinct from the Subaru-Takata RICO Enterprise. Further, the Subaru-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the Subaru Defendants have engaged.

708. At all relevant times, the Subaru Defendants operated, controlled or managed the Subaru-Takata RICO Enterprise, through a variety of actions. The Subaru Defendants' participation in the Subaru-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the Subaru Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

709. The members of the Subaru-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Subaru-Takata RICO Enterprise's members. The members of the Subaru-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Subaru-Takata RICO Enterprise benefited from the common purpose: the Subaru Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the Subaru Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the

dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

710. The Subaru Defendants conducted and participated in the conduct of the affairs of the Subaru-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2004 and continuing to this day, and that consisted of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

711. For the Subaru Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the Subaru Defendants also maintained and boosted consumer confidence in the Subaru brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the Subaru Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

712. As detailed in the General Factual Allegations, the Subaru Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began resulting in field

incidents, the Subaru Defendants held meetings that further revealed and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

713. To further the scheme to defraud, the Subaru Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The Subaru Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested in certain airbags and/or certain areas of the country, when in fact the Subaru Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Subaru vehicle and manifests itself across the country.

714. To further the scheme to defraud, the Subaru Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

715. To further the scheme to defraud, the Subaru Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

716. To carry out, or attempt to carry out the scheme to defraud, the Subaru Defendants have conducted or participated in the conduct of the affairs of the Subaru-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The Subaru Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the Subaru website, communications with NHTSA, statements to the press, and communications with other members of the Subaru-Takata RICO Enterprise, as well as advertisements and other communications to the Subaru Defendants' customers, Plaintiffs, and Class members; and
- b. The Subaru Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

717. The Subaru Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

- a. [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]

718. The Subaru Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the Subaru Defendants' intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on the Subaru Defendants' material misrepresentations and omissions.

719. As described throughout this Complaint, the Subaru Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining or retaining significant monies and revenues while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

720. The predicate acts all had the purpose of generating significant revenue and profits for the Subaru Defendants and the Subaru-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the Subaru Defendants through their participation in the Subaru-Takata RICO Enterprise and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

721. By reason of and as a result of the conduct of the Subaru Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

722. The Subaru Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 14

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced And Corrupt Organizations Act ("RICO"), against the Subaru Defendants.

723. All Plaintiffs bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class against the Subaru Defendants.

724. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 13.

725. At all relevant times, the Takata and the Subaru Defendants were associated with the Subaru-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of

the Subaru-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

726. Over the course of the past decade, the Subaru Defendants and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The Subaru Defendants' and Takata's close cooperation on issues surrounding the Inflator Defect and joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

727. Subaru Defendants committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof.

728. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy:

- a. [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]

729. Subaru and Takata agreed to and did conduct and participate in the conduct of the Subaru-Takata RICO Enterprise’s affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count.

730. As a direct and proximate result of Subaru’s conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

731. Had Subaru been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Subaru's conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

732. Subaru's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

733. The Subaru's violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 15

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act (“RICO”), against the Toyota Defendants

734. All Plaintiffs bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Toyota Defendants.

735. The Toyota Defendants are all “persons” under 18 U.S.C. § 1961(3).

736. The Toyota Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Toyota-Takata RICO Enterprise through a pattern of racketeering activity.

737. Plaintiffs and Class members are “person[s] injured in his or her business or property” by reason of the Toyota Defendants’ violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Toyota-Takata RICO Enterprise

738. The following persons, and others presently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the Toyota-Takata RICO Enterprise:

- a. The Toyota Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- b. Takata, who, with Toyota’s guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope

and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.

- c. The Toyota Defendants' Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Toyota-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. Takata's Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Toyota-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

739. The Toyota-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4) and consists of "persons" associated together for a common purpose. The Toyota-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

740. While the Toyota Defendants participated in the conduct of the Toyota-Takata RICO Enterprise, they had an existence separate and distinct from the Toyota-Takata RICO Enterprise. Further, the Toyota-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the Toyota Defendants have engaged.

741. At all relevant times, the Toyota Defendants operated, controlled, or managed the Toyota-Takata RICO Enterprise, through a variety of actions. The Toyota Defendants' participation in the Toyota-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the Toyota Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

742. The members of the Toyota-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Toyota-Takata RICO Enterprise's members. The members of the Toyota-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Toyota-Takata RICO Enterprise benefited from the common purpose: the Toyota Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the Toyota Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

743. The Toyota Defendants conducted and participated in the conduct of the affairs of the Toyota-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2004 and continuing to this day, and that consisted

of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

744. For the Toyota Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the Toyota Defendants also maintained and boosted consumer confidence in the Toyota brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the Toyota Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

745. As detailed in the General Factual Allegations, the Toyota Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began resulting in field incidents, the Toyota Defendants held meetings that further revealed and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

746. To further the scheme to defraud, the Toyota Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The Toyota Defendants repeatedly described the defect as a contained and corrected manufacturing defect that only manifested in certain airbags and/or certain areas of the country, when in fact the

Toyota Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Toyota vehicle and manifests itself across the country.

747. To further the scheme to defraud, the Toyota Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

748. To further the scheme to defraud, the Toyota Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

749. To carry out, or attempt to carry out the scheme to defraud, the Toyota Defendants have conducted or participated in the conduct of the affairs of the Toyota-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The Toyota Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, writing(s) and/or signal(s), including the Toyota website, communications with NHTSA, statements to the press, and communications with other members of the Toyota-Takata RICO Enterprise, as well as advertisements and other communications to the Toyota Defendants' customers, Plaintiffs, and Class members; and

b. The Toyota Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein.

750. The Toyota Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

751. The Toyota Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the Toyota Defendants' intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on the Toyota Defendants' material misrepresentations and omissions.

752. As described throughout this Complaint, the Toyota Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

753. The predicate acts all had the purpose of generating significant revenue and profits for the Toyota Defendants and the Toyota-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the Toyota Defendants through their participation in the Toyota-Takata RICO Enterprise and in furtherance of its fraudulent scheme, and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

754. By reason of and as a result of the conduct of the Toyota Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

755. The Toyota Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 16

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced And Corrupt Organizations Act ("RICO"), against the Toyota Defendants.

756. All Plaintiffs bring this claim on behalf of themselves and the Nationwide Automotive Recycler Class against the Toyota Defendants.

757. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 15.

758. At all relevant times, the Takata and the Toyota Defendants were associated with the Toyota-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the Toyota-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d).

759. Over the course of the past decade, the Toyota Defendants and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The Toyota Defendants' and Takata's close cooperation on issues surrounding the Inflator Defect, as well as their joint participation in predicate acts described above and below, is evidence of the conspiracy.

Overt Acts

760. The Toyota Defendants committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof.

761. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between Toyota and Takata:

- a. [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]

[REDACTED]

762. Toyota and Takata agreed to and did conduct and participate in the conduct of the Toyota-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count.

763. As a direct and proximate result of Toyota's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs believed they were paying for vehicles with safe airbag systems and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

764. Had Toyota been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Toyota's conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

765. Toyota's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

766. The Toyota Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as

well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 17

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act (“RICO”), Against Volkswagen

767. Plaintiffs Butler, Cunningham, Knox, Midway, Snyder's, and Weaver bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Volkswagen Defendants.

768. The Volkswagen Defendants are all “persons” under 18 U.S.C. § 1961(3).

769. The Volkswagen Defendants violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Volkswagen-Takata RICO Enterprise through a pattern of racketeering activity.

770. Plaintiffs and Class members are “person[s] injured in his or her business or property” by reason of the Volkswagen Defendants' violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Volkswagen-Takata RICO Enterprise

771. The following persons, and others presently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the Volkswagen-Takata RICO Enterprise:

- a. The Volkswagen Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a

decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.

- b. Takata, who, with Volkswagen's guidance, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The Volkswagen Defendants' Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Volkswagen-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. Takata's Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Volkswagen-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

772. The Volkswagen-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4), and consists of "persons" associated together for a common purpose. The Volkswagen-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

773. While the Volkswagen Defendants participated in the conduct of the Volkswagen-Takata RICO Enterprise, they had an existence separate and distinct from the Volkswagen-Takata RICO Enterprise. Further, the Volkswagen-Takata RICO Enterprise was separate and distinct from the pattern of racketeering in which the Volkswagen Defendants have engaged.

774. At all relevant times, the Volkswagen Defendants operated, controlled or managed the Volkswagen-Takata RICO Enterprise, through a variety of actions. The Volkswagen Defendants' participation in the Volkswagen-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because the Volkswagen Defendants manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

775. The members of the Volkswagen-Takata RICO Enterprise all served a common purpose: to sell as many airbags and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Volkswagen-Takata RICO Enterprise's members. The members of the Volkswagen-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Volkswagen-Takata RICO Enterprise benefited from the common purpose: the Volkswagen Defendants sold or leased more Class Vehicles, and received more for those vehicles, than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to the Volkswagen Defendants than they would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

776. The Volkswagen Defendants conducted and participated in the conduct of the affairs of the Volkswagen-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2004 and continuing to this day, and that consisted of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

777. For the Volkswagen Defendants, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, the Volkswagen Defendants also maintained and boosted consumer confidence in the Volkswagen and Audi brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped the Volkswagen Defendants sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

778. As detailed in the General Factual Allegations, the Volkswagen Defendants were well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize their profits. Moreover, once the Inflator Defect began resulting in field and testing incidents, the Volkswagen Defendants held meetings that further revealed

and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

779. To further the scheme to defraud, the Volkswagen Defendants repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. The Volkswagen Defendants repeatedly described the defect as a contained issue that only manifested in certain airbags, when in fact the Volkswagen Defendants knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Volkswagen vehicle.

780. To further the scheme to defraud, the Volkswagen Defendants concealed the nature and scope of the Inflator Defect from federal regulators, enabling it to escape investigation and costs associated with recalls for more than a decade.

781. To further the scheme to defraud, the Volkswagen Defendants would promote and tout the safety, reliability, and quality of their vehicles with airbags while simultaneously concealing the nature and scope of the Inflator Defect.

782. To carry out, or attempt to carry out the scheme to defraud, the Volkswagen Defendants have conducted or participated in the conduct of the affairs of the Volkswagen-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. The Volkswagen Defendants devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign

commerce, writing(s) and/or signal(s), including the Volkswagen website, communications with NHTSA, statements to the press, and communications with other members of the Volkswagen-Takata RICO Enterprise, as well as advertisements and other communications to the Volkswagen Defendants' customers, including Plaintiffs and Class members; and

- b. The Volkswagen Defendants utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein. From at least 2004 through the present, Volkswagen regularly utilized the interstate and international mail and wires to ship and pay for defective inflators from Takata's facilities in Monclova, Mexico and LaGrange, Georgia to Volkswagen's facilities in Germany and Tennessee, among others located in the United States.

783. The Volkswagen Defendants' pattern of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

- a. [REDACTED]

b. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

784. The Volkswagen Defendants' conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of the Volkswagen Defendants' intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on the Volkswagen Defendants' material misrepresentations and omissions.

785. As described throughout this Complaint, the Volkswagen Defendants engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

786. The predicate acts all had the purpose of generating significant revenue and profits for the Volkswagen Defendants and the Volkswagen-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by the Volkswagen Defendants through their participation in the Volkswagen-Takata RICO enterprise, and in furtherance of its fraudulent scheme; and were interrelated in that they

involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

787. By reason of and as a result of the conduct of the Volkswagen Defendants, and in particular, its pattern of racketeering activity, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems, and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless, and the Automotive Recyclers are now unable to sell them; and
- c. the value of the Class Vehicles has diminished, thus reducing their resale value.

788. The Volkswagen Defendants' violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 18

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), Against Volkswagen.

789. Plaintiffs Butler, Cunningham, Knox, Midway, Snyder's, and Weaver bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against the Volkswagen Defendants.

790. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth in Count 17.

791. At all relevant times, Takata and the Volkswagen Defendants were associated with the Volkswagen-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the Volkswagen-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d). Takata and the Volkswagen Defendants also agreed to the objective of the conspiracy or to commit at least two racketeering predicate acts.

792. Over the course of the past decade, the Volkswagen Defendants and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of vehicles affected by the Defective Airbags and the safety risks those airbags posed. The Volkswagen Defendants' and Takata's close cooperation on issues surrounding the Inflator Defect, their concealment of the nature and scope of the Inflator Defect, and their joint participation in predicate acts described below is evidence of the conspiracy.

Overt Acts

793. Volkswagen committed and caused to be committed a series of overt acts in furtherance of the conspiracy and to affect the objects thereof. More specifically, the following conduct and overt acts demonstrate the ongoing conspiracy between Volkswagen and Takata:

- a. [REDACTED]
- [REDACTED]

795. Volkswagen and Takata agreed to and did conduct and participate in the conduct of the Volkswagen-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described in the prior Count and herein.

796. As a direct and proximate result of Volkswagen's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems, and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless, and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

797. Had Takata and/or Volkswagen been entirely forthcoming with Plaintiffs and Class members, NHTSA, and the public in a timely manner about the true nature and scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Takata's and Volkswagen's conspiracy to commit mail fraud and/or wire fraud

was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

798. Volkswagen's and Takata's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

799. The Volkswagen Defendants' violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 19

Violation of 18 U.S.C. § 1962(c), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), Against Mercedes

800. Plaintiffs Butler, Cunningham, Knox, Midway, Snyder's, and Weaver bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against Mercedes.

801. Each of the Mercedes Defendants is a "person" under 18 U.S.C. § 1961(3).

802. Mercedes violated 18 U.S.C. § 1962(c) by participating in or conducting the affairs of the Mercedes-Takata RICO Enterprise through a pattern of racketeering activity.

803. Plaintiffs and Class members are "person[s] injured in his or her business or property" by reason of Mercedes's violation of RICO within the meaning of 18 U.S.C. § 1964(c).

The Mercedes-Takata RICO Enterprise

804. The following persons, and others presently unknown, have been members of and constitute an “association-in-fact enterprise” within the meaning of RICO, and will be referred to herein collectively as the Mercedes-Takata RICO Enterprise:

- a. The Mercedes Defendants, who designed, manufactured, and sold millions of vehicles equipped with Defective Airbags that they knew, or were reckless in not knowing, contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade, while falsely and inaccurately representing that their vehicles were safe, thereby deceiving Plaintiffs and Class members.
- b. Takata, who, with Mercedes’s guidance and approval, designed, manufactured, and sold millions of Defective Airbags knowing that they contained the Inflator Defect, the scope and nature of which they concealed from and misrepresented to the public and regulators for more than a decade.
- c. The Mercedes Defendants’ Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Mercedes-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.
- d. Takata’s Officers, Executives, and Engineers, who have collaborated and colluded with each other and with other associates in fact in the Mercedes-Takata RICO Enterprise to deceive Plaintiffs and Class members into purchasing dangerous and

defective vehicles, and actively concealing the danger and Inflator Defect from Plaintiffs and Class members.

805. The Mercedes-Takata RICO Enterprise, which engaged in, and whose activities affected interstate and foreign commerce, is an association-in-fact of individuals and corporate entities within the meaning of 18 U.S.C. § 1961(4), and consists of “persons” associated together for a common purpose. The Mercedes-Takata RICO Enterprise had an ongoing organization with an ascertainable structure, and functioned as a continuing unit with separate roles and responsibilities.

806. At all relevant times, Mercedes operated, controlled or managed the Mercedes-Takata RICO Enterprise, through a variety of actions. Mercedes’s participation in the Mercedes-Takata RICO Enterprise was necessary for the successful operation of its scheme to defraud because Mercedes manufactured, marketed, and sold Class Vehicles with the Defective Airbags, concealed the nature and scope of the Inflator Defect, and profited from such concealment.

807. The members of the Mercedes-Takata RICO Enterprise all served a common purpose: to sell as many airbags, and vehicles containing such airbags, as possible, and thereby maximize the revenue and profitability of the Mercedes-Takata RICO Enterprise’s members.

808. The members of the Mercedes-Takata RICO Enterprise shared the bounty generated by the enterprise, i.e., by sharing the benefit derived from increased sales revenue generated by the scheme to defraud. Each member of the Mercedes-Takata RICO Enterprise benefited from the common purpose: Mercedes sold or leased more Class Vehicles, and received more for those vehicles, than it would have otherwise had the scope and nature of the Inflator Defect not been concealed; Takata sold more Defective Airbags to Mercedes than it would have otherwise had the scope and nature of the Inflator Defect not been concealed; and the dealerships

sold and serviced more Class Vehicles, and sold or leased those vehicles at a much higher price, as a result of the concealment of the scope and nature of the Inflator Defect from Plaintiffs and Class members.

Pattern of Racketeering Activity

809. Mercedes conducted and participated in the conduct of the affairs of the Mercedes-Takata RICO Enterprise through a pattern of racketeering activity that has lasted for more than a decade, beginning no later than 2003 and continuing to this day, and that consisted of numerous and repeated violations of the federal mail and wire fraud statutes, which prohibit the use of any interstate or foreign mail or wire facility for the purpose of executing a scheme to defraud, in violation of 18 U.S.C. §§ 1341 and 1343.

810. For Mercedes, the purpose of the scheme to defraud was to conceal the scope and nature of the Inflator Defect found in millions of Defective Airbags in the United States in order to sell more vehicles, to sell them at a higher price or for a higher profit, and to avoid incurring the expenses associated with recalling vehicles plagued by the Inflator Defect.

811. By concealing the scope and nature of the Inflator Defect in millions of vehicles containing Defective Airbags, Mercedes also maintained and boosted consumer confidence in the Mercedes premium brand, and avoided remediation costs and negative publicity, all of which furthered the scheme to defraud and helped Mercedes sell more vehicles than they would otherwise have sold, and to sell them at a much higher price or for a higher profit.

812. As detailed in the General Factual Allegations, Mercedes was well aware of the risks of using ammonium nitrate as the propellant in its inflators, but intentionally subjected Plaintiffs and Class members to those risks or consciously disregarded those risks in order to maximize its profits. Moreover, once the Inflator Defect began resulting in field incidents,

Mercedes held meetings and conference calls and exchanged emails that further revealed and/or reconfirmed the dangers associated with the Inflator Defect, but then continued to conceal the nature and scope of the Inflator Defect.

813. To further the scheme to defraud, Mercedes repeatedly misrepresented and concealed the nature and scope of the Inflator Defect. Mercedes continued to sell new vehicles equipped with Defective Inflators without informing consumers, including Plaintiffs and Class members, and repeatedly claimed to NHTSA and publicly that the Inflator Defect did not impact its vehicles, when in fact Mercedes knew, or consciously disregarded knowing, that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the inflator—that plagues every Takata airbag equipped in a Mercedes vehicle and manifests itself across the country.

814. To further the scheme to defraud, Mercedes concealed the nature and scope of the Inflator Defect from federal regulators, including NHTSA, enabling it to escape investigation and costs associated with recalls for more than a decade.

815. To further the scheme to defraud, Mercedes would promote and tout the safety, reliability, and superior quality of its vehicles with airbags while simultaneously expressing concerns privately about the same airbags, therein affirmatively concealing the nature and scope of the Inflator Defect.

816. To carry out, or attempt to carry out the scheme to defraud, Mercedes has conducted or participated in the conduct of the affairs of the Mercedes-Takata RICO Enterprise through the following pattern of racketeering activity that employed the use of the mail and wire facilities, in violation of 18 U.S.C. § 1341 (mail fraud) and § 1343 (wire fraud):

- a. Mercedes devised and furthered the scheme to defraud by use of the mail, telephone, and internet, and transmitted, or caused to be transmitted, by means of mail and wire communications, through interstate or foreign commerce, writing(s) and/or signal(s), including, through the Mercedes website, communications with NHTSA, statements to the press, and communications with other members of the Mercedes-Takata RICO Enterprise, as well as advertisements and other communications to Mercedes's customers, including Plaintiffs and Class members; and
- b. Mercedes utilized the interstate and international mail and wires for the purpose of obtaining money or property by means of the omissions, false pretense, and misrepresentations described herein. From at least 2004 through the present, Mercedes utilized the interstate and international mail and wires to ship and pay for defective inflators from Takata's facilities in Monclova, Mexico and LaGrange, Georgia to Mercedes facilities in Germany and Michigan, among others located in the United States.

817. During the relevant time period, Mercedes transmitted, or caused to be transmitted (which hereinafter also means that Mercedes acted with knowledge that the use of the interstate mails and wires would follow in the ordinary course of business, or such use was reasonably foreseeable), by means of mail and wire communication travelling in interstate or foreign commerce, including between its offices in Europe and/or the United States, communications concerning the defective nature of the Takata airbags and the instability and volatility of ammonium nitrate, recognizing that Takata's inflators installed in Mercedes vehicles exposed vehicle occupants to an unacceptable risk of serious injury or death. Mercedes's pattern

of racketeering activity in violation of the mail and wire fraud statutes included but was not limited to the following:

818. Mercedes's conduct in furtherance of this scheme was intentional. Plaintiffs and Class members were directly harmed as a result of Mercedes's intentional conduct. Plaintiffs, Class members, and federal regulators, among others, relied on Mercedes's material misrepresentations and omissions.

819. As described throughout this Complaint, Mercedes engaged in a pattern of related and continuous predicate acts for more than a decade. The predicate acts constituted a variety of

unlawful activities, each conducted with the common purpose of defrauding Plaintiffs and other Class members and obtaining significant monies and revenues from them while providing Defective Airbags worth significantly less than the purchase price paid. The predicate acts also had the same or similar results, participants, victims, and methods of commission. The predicate acts were related and not isolated events.

820. The predicate acts all had the purpose of generating significant revenue and profits for Mercedes and the Mercedes-Takata RICO Enterprise at the expense of Plaintiffs and Class members. The predicate acts were committed or caused to be committed by Mercedes through its participation in the Mercedes-Takata RICO enterprise, and in furtherance of its fraudulent scheme; and were interrelated in that they involved obtaining Plaintiffs' and Class members' funds and avoiding the expenses associated with remediating the Inflator Defect.

821. By reason of and as a result of the conduct of Mercedes, and in particular, its pattern of racketeering activity and scheme to defraud, Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs were misled into paying for premium Mercedes vehicles with safe airbag systems, and obtained vehicles with anything but, and were deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless, and the Automotive Recyclers are now unable to sell them; and
- c. the values of the Class Vehicles have diminished, thus reducing their resale values.

822. Mercedes's violations of 18 U.S.C. § 1962(c) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 20

Violation of 18 U.S.C. § 1962(d), the Racketeer Influenced and Corrupt Organizations Act ("RICO"), Against Mercedes

823. Plaintiffs Butler, Cunningham, Knox, Midway, Snyder's, and Weaver bring this Count on behalf of themselves and the Nationwide Automotive Recycler Class against Mercedes.

824. In addition to the General Factual Allegations re-alleged and incorporated herein through the general Reallegation and Incorporation by Reference Paragraph above, Plaintiffs re-allege and incorporate the allegations set forth above in Count 19.

825. At all relevant times, Mercedes was associated with the Mercedes-Takata RICO Enterprise, and agreed and conspired to violate 18 U.S.C. § 1962(c), that is, agreed to conduct and participate, directly and indirectly, in the conduct of the affairs of the Mercedes-Takata RICO Enterprise through a pattern of racketeering activity, in violation of 18 U.S.C. § 1962(d). Mercedes also agreed to the objective of the conspiracy or to commit at least two racketeering predicate acts.

826. Over the course of the past decade, Mercedes and Takata shared information about the Defective Airbags' inherent flaws, their inability to meet safety specifications, and abnormal airbag deployments experienced by other automakers; delayed and/or prevented the release of inculpatory information; and maintained a consistent public posture as to the scope of

830. On June 11, 2014, Takata transmitted or caused to be transmitted, by means of mail and wire communication travelling in interstate or foreign commerce, from Takata's offices in Michigan or Japan to the ODI in Washington, D.C., a letter titled "Takata Support for Regional Field Actions to Address Potential Inflator Issues." Takata explained that it would "support the replacement of the identified inflators in vehicles in Puerto Rico, Florida, Hawaii, and the Virgin Islands, based on the high levels of absolute humidity in those areas," because "all six of the potentially-relevant rupture incidents had occurred in either Florida or Puerto Rico." Takata misleadingly omitted Ashely Parham's death in Oklahoma in May 2009, Gurjit Rathore's death in December 2009 in Virginia, and Brandi Owens's injury in October 2013 in Georgia. By focusing on areas of high humidity, this communication concealed the nature and scope of the Inflator Defect.

831. Mercedes and Takata agreed to and did conduct and participate in the conduct of the Mercedes-Takata RICO Enterprise's affairs through a pattern of racketeering activity and for the unlawful purpose of defrauding Plaintiffs and Class members, as more fully described above.

832. As a direct and proximate result of Mercedes's and Takata's conspiracy and violation of 18 U.S.C. § 1962(d), Plaintiffs and Class members have been injured in their business and/or property in multiple ways, including but not limited to:

- a. overpayment for leased or purchased Class Vehicles, in that Plaintiffs paid for vehicles with safe airbag systems, and obtained vehicles with anything but, and have been deprived of the benefit of their bargain;
- b. overpayment for purchased Class Vehicles and the airbags contained therein, in that the airbags are essentially valueless, and the Automotive Recyclers are now unable to sell them; and
- c. the Class Vehicles' value has diminished, thus reducing their resale value.

833. Had Takata and/or Mercedes been entirely forthcoming with NHTSA and with the public in a timely manner about the vast scope of the Inflator Defect and the grave risks it posed to countless vehicle occupants, as was their duty, Plaintiffs would not have suffered these harms. Their conspiracy to commit mail fraud and/or wire fraud was reasonably calculated to deceive persons of ordinary prudence and comprehension, and was committed with reckless indifference to the truth if not the outright intent to deceive.

834. Mercedes's and Takata's conspiracy to violate 18 U.S.C. § 1962(c) was committed with the specific intent to defraud, thereby entitling Plaintiffs to treble damages under 18 U.S.C. § 1964(c).

835. Mercedes's violations of 18 U.S.C. § 1962(d) have directly and proximately caused injuries and damages to Plaintiffs and Class Members, and Plaintiffs and Class Members are entitled to bring this action for three times their actual damages, as well as injunctive/equitable relief and costs and reasonable attorneys' fees pursuant to 18 U.S.C. §§ 1964(a) and 1964(c).

COUNT 21

**Violation of the Lanham (Trademark) Act,
15 U.S.C. §§ 1501, *et seq.***

836. This claim is brought by (a) all Plaintiffs against Honda, BMW, Mazda, Nissan, Subaru, and Toyota; (b) Plaintiffs Butler, Knox, Midway, Synder's, and Weaver against New Chrysler; (c) Plaintiffs Butler, Knox, Synder's, and Weaver against the GM Defendants; and (d) Plaintiffs Butler, Cunningham, Knox, Midway, Snyder's, and Weaver against Mercedes and the Volkswagen Defendants. Each group of Plaintiffs brings this claim individually and on behalf of the Nationwide Automotive Recycler Class.

837. The Lanham Act, 15 U.S.C. § 1125(a), entitled "False designation of origin, false descriptions, and dilution forbidden," provides in pertinent part:

(1) Any person who, on or in connection with any goods or services, or any container for goods, uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which—

(A) is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person, or

(B) in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities, shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

838. Takata and the Vehicle Manufacturer Defendants used and/or continue to use in commerce false or misleading descriptions of fact, and/or false or misleading representations and/or omissions of fact, which misrepresented, and were likely to cause and/or did cause confusion and mistake or to deceive, regarding Takata's Defective Airbags, the safety of the

Defective Airbags and the Class Vehicles, the scope and cause of the Inflator Defect, and the extent of unreasonable danger of death or personal injury related to the Inflator Defect.

839. As detailed more fully above, the Vehicle Manufacturer Defendants' representations, omissions, statements, and false commentary have included misleading representations about the safety of the Class Vehicles and the scope of the Inflator Defect to:

- a. the public and Class Vehicle purchasers, both in the form of advertising and responding to initial recall concerns;
- b. the U.S. Congress;
- c. the media; and
- d. federal regulators.

840. The Vehicle Manufacturers' representations, omissions, statements, and commentary have included selling and marketing the Class Vehicles as "safe" and "reliable," despite their knowledge of the Inflator Defect or their failure to reasonably investigate it. At all relevant times, in advertisements and promotional materials, the Vehicle Manufacturer Defendants continuously maintained that their vehicles were safe and reliable.

841. In addition to false and misleading statements and omissions to consumers, Takata also made false and misleading statements to federal regulators, vehicle owners, and the media regarding the scope and cause of the Inflator Defect as set forth above.

842. The Vehicle Manufacturer Defendants are contributorily liable for Takata's false statements and omissions.

843. The Vehicle Manufacturer Defendants knew or reasonably should have known about Takata's false misrepresentations and omissions regarding the safety of the Class Vehicles and Takata's defective airbags.

844. The Vehicle Manufacturer Defendants contributed to Takata's false statements and omissions and knowingly induced and caused them through their failure to publicly acknowledge the Inflator Defect. The Vehicle Manufacturer Defendants not only allowed the misrepresentations and omissions to be disseminated without correction because they benefitted from it through minimizing the scope of the recalls and continued business in purchasing cheaper airbags from Takata, but they also materially participated in such misrepresentations and omissions by allowing them and, in some cases, directing such misrepresentations and omissions to be made.

845. Takata's misrepresentations and omissions also included statements to NHTSA and the public that the Inflator Defect was limited to "a specific production process" and by providing vague and misleading information about the seriousness of the problem as more fully alleged in above. For example, Takata falsely represented that the Inflator Defect only manifested itself in certain areas of the country, when in fact Takata knew that the Inflator Defect is a fundamental, uniform defect—i.e., the reckless use of the unstable and dangerous ammonium nitrate as the propellant in the defectively designed inflator—that plagues every Takata airbag and manifests itself across the country.

846. In addition to participating in Takata's misleading misrepresentations and omissions, the Vehicle Manufacturer Defendants also made its own materially false statements and omissions that misrepresented, and created confusion and likelihood of mistake as to the nature, characteristics, and qualities of its airbags, the root cause and scope of Inflator Defect, and the extent of unreasonable danger of death or personal injury related to the Inflator Defect.

847. In addition to those in the General Factual Allegations, examples of the Vehicle Manufacturers' safety and reliability misrepresentations, from 2000 through the present, include but are not limited to the following:

a. BMW:

- i. In 2005, BMW represented on its website: "Driver's and passenger's front airbag supplemental restraint system (SRS) with 'smart' dual-threshold, dual-stage deployment and sensor to help prevent unnecessary passenger's airbag deployment."
- ii. In 2008, BMW represented on its website: "The driver and front passenger airbags provide effective protection for the head and upper-torso area, preventing contact with the steering wheel and dashboard. In a head-on collision, you have the best possible protection."
- iii. In 2008, BMW represented on its website: "The principle behind the function of the front airbags for driver and passenger is very simple: in the event of an impact with a force greater than the safe threshold, the airbag sensors activate a substance that causes the airbags to instantly inflate. Within a fraction of a second, the airbags form a protective cushion over the steering wheel and dashboard, significantly reducing the risk of cranial and upper body injuries."
- iv. In 2015, BMW represented on its website: "There is no end to our quest for the next innovation. And it's not just about greater power and more efficient performance. It's also about safety. We prepare our vehicles to expect the unexpected."

b. New Chrysler:

- i. The 2009 Chrysler 300 brochure stated that:

[n]o one wants to test a vehicle's impact resistance, but 300 is ready, if it occurs.... Advanced multistage front air bags deploy in staged amounts, depending on impact severity, while available front seat-mounted side air bags with supplemental front and rear side-curtain air bags offer additional side-impact protection to front and rear outboard occupants.

- ii. The 2011 Dodge Dakota brochure claimed that the: "Dakota heritage of protecting you and your passengers is uncompromising. In addition to the many safety and security features listed here, all 2011 Dakota models now feature supplemental side-curtain air bags as standard equipment and, of course, four-wheel ABS."
- iii. The 2011 Jeep Wrangler brochure asserted that: "Wrangler's got your back, your sides, as well as your front end. Just as Wranglers are purpose-built for fun, they're also infused with advanced active and passive systems designed to help keep you safe and secure. At the forefront are the standard advanced multistage front air bags."
- iv. The 2011 Chrysler 300 brochure included the slogan: "[t]his kind of safety gives you that kind of security." The brochure further advertised that: "advanced multistage front air bags, supplemental front-seat thorax side air bags, driver-knee air bag, and supplemental side-curtain air bags for front and rear outboard occupants are all standard."

- v. A February 9, 2012 press release boasted that the 2012 Chrysler 300 and 2012 Dodge Charger had achieved 5-star safety ratings from NHTSA, and it boasted that the Chrysler 300 and Dodge Charger were named a “Top Safety Pick” by the Insurance Institute for Highway Safety. The press release further quoted the Senior Vice President-Engineering of Chrysler, who stated: “we’re very pleased that both the 2012 Chrysler 300 and 2012 Dodge Charger have achieved the highest overall rating” and that: “both vehicles are robustly designed with a rigid structure to protect occupants and have numerous advanced safety features.”
- vi. The 2012 Dodge Charger brochure highlighted that the Charger was a 2011 Insurance for Highway Safety (“IHS”) top safety pick. The brochure further stated that: “[s]afety and security are the driving principles behind every Dodge vehicle, including Charger” and that: “[a]dvanced multistage front air bags, supplemental front-seat mounted pelvic-thorax side air bags, driver-side knee air bag, and supplemental side-curtain air bags for front and rear outboard occupants are all standard.”
- vii. Just prior to the New Chrysler field action in June of 2014, New Chrysler told the public that there was not a safety defect with its inflator. New Chrysler stated: “Chrysler Group has agreed, in principle, to honor a National Highway Traffic Safety Administration request to replace airbag inflators in certain vehicles registered in four U.S. regions... This is not a safety recall. Chrysler Group has not identified a defect. This is a field action conducted out of an abundance of caution.”

- viii. In 2017, New Chrysler’s website listed its mission as: “To create the type of exciting, efficient, reliable, safe vehicles you expect and deserve.”
- ix. In 2017, New Chrysler described the design of the 2007–2017 Jeep Wrangler on Jeep’s website as: “With an all-new frame, exterior and interior design, engine, safety and security and convenience features, the Jeep Wrangler was built on the successful, original Jeep Brand formula.”

c. GM Defendants:

- i. In its 2010 Annual Report, GM Parent proclaimed its products would “improve safety and enhance the overall driving experience for our customers.”
- ii. In an April 2010 video advertisement, GM Parent Chairman and CEO, Ed Whitacre, stated that New GM was “designing, building, and selling the best cars in the world,” and has “unmatched lifesaving technology” to keep customers safe.
- iii. On November 10, 2010, New GM published a video that told consumers that New GM actually prevents any defects from reaching consumers. The video, titled “Andy Danko: The White Glove Quality Check,” explains that there are “quality processes in the plant[s] that prevent any defects from getting out.”
- iv. New GM’s brochure for the 2010 Chevy Avalanche called the truck a “Four-Wheel Bodyguard,” in connection with its airbags, and an “all-

encompassing approach to safety.” This model is subject to the Inflator Defect recalls.

- v. An August 29, 2011, advertisement on Defendants’ website stated that “Chevrolet provides consumers with fuel-efficient, safe and reliable vehicles that deliver high quality, expressive design, spirited performance and value.”
- vi. The promotional brochure for New GM’s 2011 Cadillac Escalade series noted: “Passenger safety is a primary consideration throughout the engineering process.” It also advised potential customers that “[a] look beneath the beautiful exterior reveals a comprehensive approach to safety.”
- vii. Defendants published on their website a December 27, 2011, an interview with Gay Kent (General Motors Executive Director of Vehicle Safety and Crashworthiness), who stated, “[o]ur safety strategy is about providing continuous protection for our customers before, during and after a crash. . . . We design safety and crashworthiness into our vehicles very early in development.” In the interview, Kent touted “GM’s own internal requirements for vehicle safety and crashworthiness, which go above and beyond federal requirements.”
- viii. An April 2012, New GM national advertising campaign slogan proclaimed: “Safety. Utility. Performance.”
- ix. In a July 10, 2012, news release, Chris Perry (Chevrolet Global Vice President of Marketing) stated, “[w]e think customers who have been

driving competitive makes or even older Chevrolets will be very pleased by today's Chevrolet designs, easy-to-use technologies, comprehensive safety and the quality built into all of our cars, trucks and crossovers."

- x. GM Parent's 2013 Annual Report asserts that "[n]othing is more important than the safety of our customers."
- xi. During a presentation at the May 2014 North American Conference on Elderly Mobility, Gay Kent (General Motors Director of Global Vehicle Safety) stated that "[t]he safety of all our customers is our utmost concern."
- xii. In December 2014, Defendants issued a news release touting the Insurance Institute for Highway Safety (IIHS)'s designation of four Chevrolet vehicle models as "Top Safety Picks," including some models subject to recalls due to the Inflator Defect.
- xiii. In a February 2015 news release, Defendants advertised high rankings in a J.D. Power Vehicle Dependability Study for several models subject to the Inflator Defect recalls. The news release highlighted the GMC Sierra (which is subject to the Inflator Defect recalls) for becoming "the first full-size pickup to receive the highest-possible five-star Overall Vehicle Score for safety."
- xiv. In 2017, Defendants' website stated: "Safety is always our priority. It's the main concern with each and every car we design and a driving principle of our company."

d. Honda:

- i. In 2002, Honda represented on its website: “Having already earned top safety ratings with its quadruple five-star front- and side-impact crash test ratings, the 2002 Odyssey now offers the latest generation of airbag systems from Honda. Driver’s and front passenger’s dual stage airbags (SRS) along with driver’s and front passenger’s side airbags are now standard equipment on all models - yet another minivan first... Both front airbags have a dual-stage inflator that can deploy the airbag at one of two rates depending on the severity of the crash The front passenger’s side airbag has an automatic cutoff system that is designed to prevent side airbag deployment if a child (or small statured adult) leans into the side airbag deployment path. Once the child returns to an upright position, the side airbag will be able to deploy and provide protection in the event of a side impact Building on the standard anti-lock braking system (ABS), new standard rear disc brakes result in improved stopping performance with higher resistance to brake fade and a more responsive brake pedal feel. Amber rear turn signals have been added, which help other drivers differentiate the indicators with increased clarity.”
- ii. In 2002, Honda represented in a commercial: “5-stars of frontal collision tests... that’s a safe car. Safe, get it through your head. To see what safe really means, take a look at a close look at the 2002 civic from Honda.”
- iii. In 2002, Honda represented in brochures: “Honda’s commitment to safe driving is in evidence throughout every vehicle... Every new vehicle

comes with dual front airbags (SRS), most using a dual stage design . . .

All designed to keep you and yours out of harm's way.”

- iv. In 2004, Honda represented in brochures: “A glance at the crash-test data posted by the U.S. government’s National Highway Traffic Safety Administration reveals a galaxy of 5-star ratings for Honda cars and trucks. In fact, five of our models to date – Accord Coupe, Civic Coupe, CR-V, Odyssey and Pilot – have earned the highest NHTSA crash-test ratings in frontal and side impact testing It’s a solid testament to our emphasis on safety.”
- v. In 2007, Honda represented on its website: “Through innovative original research, Honda has created advanced airbags that offer outstanding levels of occupant protection.”
- vi. In 2007, Honda also represented on its website: “Honda led the industry through advances such as driver and front passenger airbags with ‘dual output inflators’ that adjust the deployment force of the airbags to the severity of the crash.”
- vii. In 2007, Honda also represented on its website: “The Honda Accord is the first mid-size sedan to offer front, front-side and side curtain airbags as standard equipment. Accord earned a 5-star frontal impact rating from the U.S. government and a frontal ‘Best Pick’ from the Insurance Institute for Highway Safety (IIHS).”
- viii. In 2007, Honda also represented on its website: “Every Honda and Acura vehicle begins with a basic structure designed to be fundamentally safe,

but we add advanced technology as standard equipment that can help the driver maintain control of the vehicle.”

- ix. In 2015, Honda represented on its website: “Honda is committed to providing safety for everyone—that means crash protection not only for our own drivers and passengers, but also for the occupants of other vehicles, and injury mitigation for pedestrians.” “As a leader, Honda looks beyond government regulations, studying real world situations to develop new safety technologies for everyone.”
- x. In 2015, Honda represented on its website: “Acura believes driving a luxury car should be a highly enjoyable experience. And while we tend to dwell on the more exhilarating aspects of our vehicles, we consider your safety a top priority. . . . Safety has been top of mind with Acura engineers since day one. . . . Over the years, we’ve added many advanced safety technologies to the list, and the vast majority of them are now standard on every model.”

e. Mazda:

- i. In 2004, Mazda represented in brochures that its cars possessed “inspiring performance” and “reassuring safety features.”
- ii. In 2005, Mazda represented on its website: “in every configuration, you’ll enjoy Mazda’s legendary performance, function, style and safety.”
- iii. In 2015, Mazda represented on its website: “In the realm of safety, Mazda’s aim is to achieve a safe and accident-free automotive society from the three viewpoints of vehicles, people, and roads and

infrastructure. Specifically, the Company carries out research and development into safety technologies based on the Mazda Proactive Safety philosophy, which particularly respects the driver, and has released vehicles featuring the full suite of Mazda's advanced safety technologies”

f. Mercedes

- i. In a May 15, 2013 Mercedes press release on the Mercedes website, Dr. Dieter Zetsche, Chairman of the Board of Management of Daimler AG and Head of Mercedes-Benz Cars said: “Rather than being about safety or aesthetics, power or efficiency, comfort or dynamism, our aspirations were ‘the best or nothing’ in every respect. No other car stands for the Mercedes-Benz brand promise more than the S-Class.”
- ii. In a June 18, 2014, Mercedes press release on the Mercedes website, Mercedes stated: “Hallmark Mercedes high level of safety- To make top-class safety available for everyone, the CLS-Class will in the future be fitted with a host of new assistance systems along with existing systems with upgraded functionality.”
- iii. In a March 22, 2016, Mercedes press release on the Mercedes website, Mercedes stated about its Coupe: “In keeping with the Mercedes-Benz tradition, the body forms the foundation for exemplary crash safety. A high-strength safety passenger compartment forms the core of this concept. It is surrounded by specially designed and crash-tested deformation zones, which ensure the best possible occupant safety. In

addition to 3-point safety belts with pyrotechnical and reversible belt tensioning and belt-force limitation for driver, front passenger and those in the outer rear seats, numerous airbags serve to protect the vehicle's occupants in an accident. These include combined thorax/pelvis side bags for driver and front passenger and an optimized window bag extending over both seat rows, optional side bags for the outer rear seats and a driver knee bag.”

- iv. In a September 1, 2015, press release on the Mercedes website, Prof. Dr. Thomas Weber, Member of the Daimler Board of Management responsible for Group Research and Head of Mercedes-Benz claimed that “[t]he S-Class sets the pace on the global market when it comes to safety, efficiency and comfort.”
- v. In a 2011 C-Class brochure, Mercedes touted its “legacy of safety innovation,” promising “top-rated safety” that is “not just equipped with a list of safety features [but] engineered as an orchestrated system that is designed to make the most of the precious milliseconds it takes to avoid, or survive, a collision.”
- vi. In a 2011 M-Class brochure, Mercedes touted its “Five Star Safety.” With respect to airbags in particular, the brochure promises “10-way air bag protection. . . eight air bags offer a total of 10 ways of protection.”
- vii. In a 2012 S-Class Brochure, Mercedes claimed that the “S-Class is engineered not merely to meet expectations, but to redefine every

measure of how an automobile... can protect its occupants.” The S-Class is “engineered with visionary safety advances.”

g. Nissan/Infiniti:

- i. In 2005, Nissan represented in brochures that its vehicles possessed “an entire set of safety features to help protect you from the unavoidable. Including steel reinforcements, guard beams and advanced airbags that will help safeguard you and your passengers in the event of an accident.”
- ii. In 2015, Nissan represented on its website: “Nissan is committed to its position as a leader in the world of automotive safety. This dedication to comprehensive safety goes into the engineering and design of every vehicle we make”

h. Subaru:

- i. In 2005, Subaru represented on its website: “Features like seatbelts with front pretensioners and force limiters, crumple zones, side-impact beams, front air bags and a Ring-Shaped Reinforcement Frame aid in minimizing the effects of a collision.”
- ii. In 2005, Subaru represented in its brochures: “THE SUBARU DRIVING EXPERIENCE EVOKES MANY EMOTIONS. Confidence should always be one of them. Which is why every Subaru is engineered according to the principles of ‘Active Driving/Active Safety.’”
- iii. In 2005, Subaru represented in its brochures: “Advanced front air bags, including passenger-side dual-stage deployment, help provide optimal protection for the driver and front passenger.”

- iv. In 2015, Subaru represented on its website: “Safety drives Subaru design.”

i. Toyota/Lexus:

- i. In 2002, Toyota represented on its website: “With safety features like dual front air bags, crumple zones and 3-point seatbelts in every seating position. So gather up all the hikers -- big and small -- and head out. Way out.”
- ii. In 2015, Toyota represented on its website: “For us, the journey towards a safe road never ends. This belief, along with our collaborative research efforts, drives us to create advancements and innovations in safety that have helped (and continue to help) prevent crashes and protect people.”

j. Volkswagen:

- i. Brochures, including those distributed at dealerships, which regularly touted its vehicles’ standard and optional airbags.
- ii. A 2008 Audi A4 brochure that touted its “IIHS top safety pick” designation, and asserts it is “not just safe for its size, [but] safe for any size.”
- iii. A 2012 Passat brochure that promised “passive safety features to help protect you and keep you safe,” and that Volkswagen will “place safety at the top of our list.”
- iv. A 2010 Jetta brochure that touted its “IIHS top safety pick” designation, and its use of “the latest in safety technology,” as well as its multiple airbags.

- v. A 2010 VW CC brochure that touts the brand's industry-leading number of "IIHS top safety pick" designations, and "six standard airbags."
- vi. A 2011 Audi A6 brochure that promises "all-encompassing safety," and highlights the vehicle's standard airbags.
- vii. A 2012 Audi A3 brochure that states "we kind of have a thing for safety," and promises airbags as a standard feature.

848. In addition to false and misleading statements and omissions to consumers, the Vehicle Manufacturer Defendants also made false and misleading statements to federal regulators and the media regarding the scope and cause of the Inflator Defect, as set forth above.

849. Defendants also made material misrepresentations and omissions regarding the completeness of each of the multiple recalls as more fully alleged above.

850. Each of these statements are materially false statements that misrepresented and omitted material facts and created confusion and likelihood of mistake as to the nature, characteristics, and qualities of its airbags, the root cause of Inflator Defect, the value of the vehicles in which its airbags were installed, the number of affected vehicles, and the extent of the unreasonable danger of death or personal injury related to the Inflator Defect.

851. Takata's and the Vehicle Manufacturer Defendants' misleading representations and omissions of fact relating to the Defective Airbags caused actual injury to automotive recyclers and other industry participants.

852. Takata's and the Vehicle Manufacturer Defendants' statements and omissions were made in commercial advertising or in promotion of vehicles equipped with Defective Airbags.

853. Takata's and the Vehicle Manufacturer Defendants' had an economic motivation for making their statements and omissions, as they were incentivized to sell as many airbags and vehicles as possible, and minimize lost profits associated with Defective Airbags.

854. Takata's and the Vehicle Manufacturer Defendants' misleading statements had a material effect on the purchasing decisions of automotive recyclers. These misrepresented, omitted, and concealed facts were material because they would be relied on by a reasonable business purchasing new or used motor vehicle, and because they directly impact the value of the Class Vehicles purchased by Automotive Recycler Plaintiffs and the Nationwide Automotive Recycler Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products are material concerns to a purchaser. Automotive Recycler Plaintiffs and Nationwide Automotive Recycler Class members trusted Defendants not to sell or fail to recall vehicles that were defective or that violated federal law governing motor vehicle safety.

855. Takata's and the Vehicle Manufacturer Defendants' statements were widely distributed, which is, at least, sufficient to constitute promotion within the automotive recycler industry.

856. Thus, Takata's and the Vehicle Manufacturer Defendants' misleading representations, statements, and omissions are and/or were material and the direct cause of the injuries herein described.

857. Takata's and the Vehicle Manufacturer Defendants' products travel or traveled in interstate commerce.

858. Automotive Recycler Plaintiffs and Nationwide Automotive Recycler Class members have been and continue to be damaged and injured by Takata's and the Vehicle

Manufacturer Defendants' material misrepresentations and omissions and as a result of the false and misleading statements and omissions. Automotive Recycler Plaintiffs and the Nationwide Automotive Recycler Class members were injured and continue to suffer injury to their commercial interests in the sale of airbags by eliminating the resale market for the Defective Airbags, which resulted in lower revenues and profits, as well as lost business and increased expenses. Those economic injuries are likely to continue in the future.

859. Takata's and the Vehicle Manufacturer Defendants' representations, statements, omissions, and commentary, as more fully set forth herein, were made with knowledge or reckless disregard of their falsity and the resulting risk and damage to the Automotive Recycler Plaintiffs and the Nationwide Automotive Recycler Class.

860. Takata's and the Vehicle Manufacturer Defendants' acts constitute the use of false descriptions and false representations in interstate commerce in violation of § 43(a) of the Lanham Act and entitle Automotive Recycler Plaintiffs, individually and on behalf of the other Nationwide Automotive Recycler Class members, to recover damages, disgorgement of Defendants' profits, the costs of this action, attorney's fees, and treble damages based on the actual harm caused.

B. Common Law Claim

COUNT 22

Fraudulent Concealment & Fraudulent Misrepresentation

861. This claim is brought by (a) all Plaintiffs against Honda, BMW, Mazda, Nissan, Subaru, and Toyota; (b) Plaintiffs Butler, Knox, Midway, Snyder's, and Weaver against New Chrysler; (c) Plaintiffs Butler, Knox, Snyder's, and Weaver against the GM Defendants; and (d) Plaintiffs Butler, Cunningham, Knox, Midway, Snyder's, and Weaver against Mercedes and the

Volkswagen Defendants. Each group of Plaintiffs brings this claim on behalf of themselves and the members of the Nationwide Automotive Recycler Class (excluding Class members who purchased a Class Vehicle in Florida or Pennsylvania) under the common law of fraudulent concealment, as there are no true conflicts (case-dispositive differences) among various states' laws of fraudulent concealment. In the alternative, Plaintiffs brings this claim against Defendants under the laws of the states where Plaintiffs and Class members purchased their Class Vehicles.

862. As described above, Defendants made material omissions and affirmative misrepresentations regarding the Class Vehicles and the Defective Airbags contained therein.

863. Defendants concealed and suppressed material facts regarding the Defective Airbags—most importantly, the Inflator Defect, which causes, among other things, the Defective Airbags to: (a) rupture and expel metal shrapnel that tears through the airbag and poses a threat of serious injury or death to occupants; and/or (b) hyper-aggressively deploy and seriously injure occupants through contact with the airbag.

864. Defendants took steps to ensure that its employees did not reveal the known safety Inflator Defect to regulators, consumers, or businesses like Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class.

865. On information and belief, Takata still has not made full and adequate disclosure, continues to defraud Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class and continues to conceal material information regarding the Inflator Defect that exists in the Defective Airbags.

866. Defendants had a duty to disclose the Inflator Defect because they:

- a. Had exclusive and/or far superior knowledge and access to the facts than Automotive Recycler Plaintiffs and members of the Nationwide Automotive

Recycler Class, and knew that the facts were not known to or reasonably discoverable by Plaintiffs and the Class;

- b. Intentionally concealed the foregoing from Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class; and
- c. Made incomplete representations about the safety and reliability of the Defective Airbags and, by extension, the Class Vehicles, while purposefully withholding material facts from Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class that contradicted these representations.

867. These omitted and concealed facts were material because they would be relied on by purchasers of the Class Vehicles, including the Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products are material concerns to a purchaser. Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class trusted Defendants not to sell or fail to recall vehicles that were unsafe or defective or that violated federal law governing motor vehicle safety.

868. Defendants concealed and suppressed these material facts to falsely assure the public that their vehicles were capable of performing safely, as represented by them and reasonably expected by purchasers of the Class Vehicles.

869. Defendants also misrepresented the safety and reliability of its vehicles, because they either (a) knew but did not disclose the Inflator Defect; (b) knew that they did not know whether their safety and reliability representations were true or false; or (c) should have known that their misrepresentations were false.

870. Defendants actively concealed or suppressed these material facts, in whole or in part, to maintain a market for their vehicles, to protect their profits, and to avoid recalls that would harm or damage their brands' image and cost them money. Defendants concealed these facts at the expense of Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class.

871. Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class were unaware and could not have been aware of these omitted material facts and would not have acted as they did if they had known of the concealed or suppressed facts.

872. Had they been aware of the Defective Airbags and Defendants' callous disregard for safety, Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class would have paid less for their Class Vehicles. Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class did not receive the benefit of their bargain as a result of Defendants' fraudulent concealment.

873. Because of the concealment and/or suppression of the facts, Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class sustained damage because they purchased Class Vehicles with Defective Airbags (that cannot be resold) as a result of Defendants' concealment of, and failure to timely disclose, and/or misrepresentations concerning the serious Inflator Defect in millions of Class Vehicles and the serious safety and quality issues caused by their conduct.

874. The value of all Class Vehicles has diminished as a result of Defendants' fraudulent conduct in connection with the Defective Airbags and has made any reasonable consumer reluctant to purchase any of the Class Vehicles, let alone pay what otherwise would have been fair market value for the parts, including airbags, to repair them.

875. Accordingly, Automotive Recycler Plaintiffs and members of the Nationwide Automotive Recycler Class have been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain or overpayment for the Class Vehicles at the time of purchase, the diminished value of the Defective Airbags and the Class Vehicles, and/or the costs incurred in storing, maintaining or otherwise disposing of the defective airbags.

876. Defendants' acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Automotive Recycler Plaintiffs' and Nationwide Automotive Recycler Class members' rights and well-being, and with the aim of enriching themselves. Defendants' conduct, which exhibits the highest degree of reprehensibility, being intentional, continuous, placing others at risk of death and injury, and effecting public safety, warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

II. State Class Claims

COUNT 23

Violation of Florida's Deceptive and Unfair Trade Practices Act, Fla. Stat. §§ 501.201, *et. seq.*

877. This claim is brought by ARA and Butler ("Florida Automotive Recycler Plaintiffs") individually and on behalf of the Florida Automotive Recycler Class against Honda, BMW, Mazda, Nissan, Subaru, and Toyota. Butler also brings this claim individually and on behalf of the Florida Automotive Recycler Class against New Chrysler, the GM Defendants, Mercedes, and the Volkswagen Defendants.

878. Assignors, Butler, and the Florida Automotive Recycler Class are "consumers" within the meaning of Florida Deceptive and Unfair Trade Practices Act ("FDUTPA"), Fla. Stat. § 501.203(7).

879. Defendants are engaged in “trade or commerce” within the meaning of Fla. Stat. § 501.203(8).

880. FDUTPA prohibits “[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce.” Fla. Stat. § 501.204(1). Defendants participated in unfair and deceptive trade practices that violated the FDUTPA as described herein.

881. In the course of their business, Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them as described herein and otherwise engaged in activities with a tendency or capacity to deceive.

882. Defendants also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Class Vehicles and/or the Defective Airbags installed in them.

883. Takata has known of the Inflator Defect in the Defective Airbags since at least the 1990s. Prior to installing the Defective Airbags in their vehicles, the Vehicle Manufacturer Defendants knew or should have known of the Inflator Defect, because Takata informed them that the Defective Airbags contained the volatile and unstable ammonium nitrate. In addition, Defendant Honda has known of the Inflator Defect in the Defective Airbags in Honda’s vehicles since at least 2004. New Chrysler and the GM Defendants knew about the Inflator Defect from the moments of their inception in 2009, and the other Vehicle Manufacturer Defendants have known or should have known of the Inflator Defect in the Defective Airbags since at least 2008.

Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them.

884. By failing to disclose and actively concealing the Inflator Defect in the Class Vehicles and/or the Defective Airbags installed in them, by marketing them as safe, reliable, and of high quality, and by presenting themselves as reputable manufacturers that value safety, Defendants engaged in unfair or deceptive business practices in violation of the FDUTPA. Defendants deliberately withheld the information about the propensity of the Defective Airbags to aggressively deploy, and/or violently explode and spray vehicle occupants with lethal amounts of metal debris and shrapnel, instead of protecting vehicle occupants from bodily injury during accidents, in order to ensure that consumers would purchase the Class Vehicles.

885. In the course of Defendants' business, they willfully failed to disclose and actively concealed the dangerous risks posed by the many safety issues and the serious Inflator Defect discussed above. Defendants compounded the deception by repeatedly asserting that the Class Vehicles and/or the Defective Airbags installed in them were safe, reliable, and of high quality, and by claiming to be reputable manufacturers that value safety.

886. Defendants' unfair or deceptive acts or practices, including these concealments, omissions, and suppressions of material facts, had a tendency or capacity to mislead and create a false impression in consumers, and were likely to and did in fact deceive reasonable consumers, including Assignors, Butler, and the Florida Automotive Recycler Class members, about the true safety and reliability of Class Vehicles and/or the Defective Airbags installed in them, the quality of Defendants' brands, and the true value of the Class Vehicles.

887. Defendants intentionally and knowingly misrepresented material facts regarding the Class Vehicles and/or the Defective Airbags installed in them with an intent to mislead Assignors, Butler, and the Florida Automotive Recycler Class.

888. Defendants knew or should have known that their conduct violated the FDUTPA.

889. As alleged above, Defendants made material statements about the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them that were either false or misleading. Defendants' representations, omissions, statements, and commentary have included selling and marketing the Class Vehicles as "safe" and "reliable," despite their knowledge of the Inflator Defect or their failure to reasonably investigate it.

890. To protect their profits and to avoid remediation costs and a public relations nightmare, Defendants concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them and their tragic consequences, and allowed ARA and Butler and the Florida Automotive Recycler Class members to continue the resale of highly dangerous vehicles and vehicle parts.

891. Defendants owed Assignors, Butler, and the Florida Automotive Recycler Class members a duty to disclose the true safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them because Defendants:

- a. Possessed exclusive knowledge of the dangers and risks posed by the foregoing;
- b. Intentionally concealed the foregoing from Plaintiff; and/or
- c. Made incomplete representations about the safety and reliability of the foregoing generally, while purposefully withholding material facts from Assignors, Butler, and the Florida Automotive Recycler Class members that contradicted these representations.

892. Because Defendants fraudulently concealed the Inflator Defect in Class Vehicles and/or the Defective Airbags installed in them, resulting in a raft of negative publicity once the Inflator Defect finally began to be disclosed, the value of the Class Vehicles has greatly diminished. In light of the stigma attached to Class Vehicles by Defendants' conduct, they are now worth significantly less than they otherwise would be.

893. Defendants' failure to disclose and active concealment of the dangers and risks posed by the Defective Airbags in Class Vehicles were material to Assignors, Butler, and the Florida Automotive Recycler Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

894. Assignors, Butler, and the Florida Automotive Recycler Class suffered ascertainable loss caused by Defendants' misrepresentations and their failure to disclose material information. Had they been aware of the Inflator Defect that existed in the Class Vehicles and/or the Defective Airbags installed in them, and Defendants' complete disregard for safety, Assignors, Butler, and the Florida Automotive Recycler Class members either would have paid less for their vehicles or would not have purchased or leased them at all. Assignors, Butler, and the Florida Automotive Recycler Class members did not receive the benefit of their bargain as a result of Defendants' misconduct.

895. Assignors, Butler, and the Florida Automotive Recycler Class risk irreparable injury as a result of Defendants' act and omissions in violation of the FDUTPA, and these violations present a continuing risk to Assignors, Butler, and the Florida Automotive Recycler Class, as well as to the general public. Defendants' unlawful acts and practices complained of

herein affect the public interest. The recalls and repairs instituted by Defendants have not been adequate.

896. As a direct and proximate result of Defendants' violations of the FDUTPA, Assignors, Butler, and the Florida Automotive Recycler Class have suffered injury-in-fact and/or actual damage.

897. Florida Automotive Recycler Plaintiffs and the Florida Automotive Recycler Class are entitled to recover their actual damages under Fla. Stat. § 501.211(2) and attorneys' fees under Fla. Stat. § 501.2105(1).

898. Florida Automotive Recycler Plaintiffs and the Florida Automotive Recycler Class also seek an order enjoining Defendants' unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under the FDUTPA.

COUNT 24

Violation of the Georgia Uniform Deceptive Trade Practices Act, Ga. Code Ann. §§ 10-1-370, *et seq.*

899. This claim is brought on behalf of Weaver individually and on behalf of the Georgia Automotive Recycler Class against all Vehicle Manufacturer Defendants.

900. Weaver, the Georgia Automotive Recycler Class and Defendants are "persons" within the meaning of the Georgia Uniform Deceptive Trade Practices Act ("Georgia UDTPA"), Ga. Code. Ann. § 10-1-371(5).

901. The Georgia UDTPA prohibits "deceptive trade practices," which include the "misrepresentation of standard or quality of goods or services," and "engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding." Ga. Code Ann. § 10-1-372(a). By failing to disclose and actively concealing the dangers and risks posed by

the Class Vehicles and/or the Defective Airbags installed in them, Defendants engaged in deceptive trade practices prohibited by the Georgia UDTPA.

902. In the course of their business, Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them as described herein and otherwise engaged in activities with a tendency or capacity to deceive.

903. Defendants also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Class Vehicles and/or the Defective Airbags installed in them.

904. Takata has known of the Inflator Defect in the Defective Airbags since at least the 1990s. Prior to installing the Defective Airbags in their vehicles, the Vehicle Manufacturer Defendants knew or should have known of the Inflator Defect, because Takata informed them that the Defective Airbags contained the volatile and unstable ammonium nitrate and the Vehicle Manufacturer Defendants approved Takata's designs.

905. Honda was again made aware of the Inflator Defect in the Takata airbags in Honda's vehicles in 2004, following a rupture incident. New Chrysler and the GM Defendants knew about the Inflator Defect from the moments of their inception in 2009, and the other Vehicle Manufacturer Defendants were again made aware of the Inflator Defect in Takata's airbags not later than 2008, when Honda first notified regulators of a problem with its Takata airbags. Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them.

906. By failing to disclose and by actively concealing the Inflator Defect in the Class Vehicles and/or the Defective Airbags installed in them, by marketing them as safe, reliable, and of high quality, and by presenting themselves as reputable manufacturers that value safety, Defendants engaged in unfair or deceptive business practices in violation of the Georgia UDTPA. Defendants deliberately withheld the information about the propensity of the Defective Airbags to aggressively deploy, and/or violently explode and spray vehicle occupants with lethal amounts of metal debris and shrapnel, instead of protecting vehicle occupants from bodily injury during accidents, in order to ensure that consumers would purchase the Class Vehicles.

907. In the course of Defendants' business, they willfully failed to disclose and actively concealed the dangerous risks posed by the many safety issues and the serious Inflator Defect discussed above. Defendants compounded the deception by repeatedly asserting that the Class Vehicles and/or the Defective Airbags installed in them were safe, reliable, and of high quality, and by claiming to be reputable manufacturers that value safety.

908. Defendants' unfair or deceptive acts or practices, including these concealments, omissions, and suppressions of material facts, had a tendency or capacity to mislead and create a false impression in consumers, and were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of Class Vehicles and/or the Defective Airbags installed in them, the quality of Defendants' brands, and the true value of the Class Vehicles.

909. Defendants intentionally and knowingly misrepresented material facts regarding the Class Vehicles and/or the Defective Airbags installed in them with an intent to mislead Plaintiffs and the Georgia Automotive Recycler Class.

910. Defendants knew or should have known that their conduct violated the Georgia UDTPA.

911. As alleged above, Defendants made material statements about the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them that were either false or misleading. Defendants' representations, omissions, statements, and commentary have included selling and marketing the Class Vehicles as "safe" and "reliable," despite their knowledge of the Inflator Defect or their failure to reasonably investigate it.

912. To protect their profits and to avoid remediation costs and a public relations nightmare, Defendants concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them and their tragic consequences, and allowed Weaver and the Georgia Automotive Recycler Class members to continue the resale of highly dangerous vehicles and vehicle parts.

913. Defendants owed Weaver and the Georgia Automotive Recycler Class a duty to disclose the true safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them because Defendants:

- a. Possessed exclusive knowledge of the dangers and risks to consumers posed by the foregoing;
- b. Intentionally concealed the foregoing from Weaver, the Georgia Automotive Recycler Class, general consumers and the general public; and/or
- c. Made incomplete representations about the safety and reliability of the foregoing generally, while purposefully withholding material facts from Weaver, the Georgia Automotive Recycler Class, general consumers and the general public that contradicted these representations.

914. Because Defendants fraudulently concealed the Inflator Defect in Class Vehicles and/or the Defective Airbags installed in them, resulting in a raft of negative publicity once the Inflator Defect finally began to be disclosed, the value of the Class Vehicles has greatly diminished. In light of the stigma attached to Class Vehicles by Defendants' conduct, they are now worth significantly less than they otherwise would be.

915. Defendants' failure to disclose and active concealment of the dangers and risks posed by the Defective Airbags in Class Vehicles were material to Weaver and the Georgia Automotive Recycler Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

916. Weaver and the Georgia Automotive Recycler Class suffered ascertainable loss caused by Defendants' misrepresentations and their failure to disclose material information. Had they been aware of the Inflator Defect that existed in the Class Vehicles and/or the Defective Airbags installed in them, and Defendants' complete disregard for safety, Weaver and the Georgia Automotive Recycler Class either would have paid less for their vehicles or would not have purchased or leased them at all. Weaver and the Georgia Automotive Recycler Class members did not receive the benefit of their bargain as a result of Defendants' misconduct.

917. Weaver and the Georgia Automotive Recycler Class risk irreparable injury as a result of Defendants' acts and omissions in violation of the Georgia UDTPA, and these violations present a continuing risk to Weaver and the Georgia Automotive Recycler Class as well as to the general public. Defendants' unlawful acts and practices complained of herein affect the public interest. The recalls and repairs instituted by Defendants have not been adequate.

918. As a direct and proximate result of Defendants' violations of the Georgia UDTPA, Weaver and the Georgia Automotive Recycler Class have suffered injury-in-fact and/or actual damage.

919. Weaver and the Georgia Automotive Recycler Class are entitled to recover their general damages under Ga. Code § 10-1-399(a) and attorneys' fees under Ga. Code § 10-1-399(d).

920. Weaver and the Georgia Automotive Recycler Class seek an order enjoining Defendants' unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Georgia UDTPA per Ga. Code Ann. § 10-1-373.

921. Weaver and the Georgia Automotive Recycler Class seek exemplary damages against Defendants because their conduct was intentional.

922. Defendants fraudulently and willfully misrepresented the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them, deceived Weaver and the Georgia Automotive Recycler Class on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations nightmare of correcting the myriad of flaws in the Class Vehicles and/or the Defective Airbags installed in them. Because Defendants' conduct was intentional, it warrants exemplary damages.

923. In accordance with Ga. Code Ann. § 10-1-399(b), Defendants are on notice of their alleged violations of the Georgia UDTPA relating to the Class Vehicles and/or the Defective Airbags installed in them purchased by Weaver and the Georgia Automotive Recycler Class. Weaver demanded that Defendants correct or agree to correct the actions described herein. Defendants have failed to do so.

COUNT 25

**Violation of the North Carolina Unfair and Deceptive Trade Practices Act,
N.C. Gen. Stat. §§ 75-1.1, *et seq.***

924. This claim is brought by Weaver and Young's individually and on behalf of the North Carolina Automotive Recycler Class against all Defendants Honda, BMW, Mazda, Nissan, Subaru, and Toyota. Weaver also brings this claim individually and on behalf of the North Carolina Automotive Recycler Class against New Chrysler, the GM Defendants, Mercedes, and the Volkswagen Defendants.

925. Defendants engaged in "commerce" within the meaning of N.C. Gen. Stat. § 75-1.1(b).

926. The North Carolina Unfair and Deceptive Trade Practices Act ("UDTPA") broadly prohibits "unfair or deceptive acts or practices in or affecting commerce." N.C. Gen. Stat. § 75-1.1(a). As alleged above and below, Defendants willfully committed unfair or deceptive acts or practices in violation of the North Carolina UDTPA.

927. In the course of their business, Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them as described herein and otherwise engaged in activities with a tendency or capacity to deceive.

928. Defendants also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Class Vehicles and/or the Defective Airbags installed in them.

929. Takata has known of the Inflator Defect in its Defective Airbags since at least the 1990s. Prior to installing the Defective Airbags in their vehicles, the Vehicle Manufacturer

Defendants knew or should have known of the Inflator Defect, because Takata informed them that the Defective Airbags contained the volatile and unstable ammonium nitrate and the Vehicle Manufacturer Defendants approved Takata's designs. In addition, Defendant Honda was again made aware of the Inflator Defect in the Takata airbags in Honda's vehicles in 2004, following a rupture incident. New Chrysler and the GM Defendants knew about the Inflator Defect from the moments of their inception in 2009, and the other Vehicle Manufacturer Defendants were again made aware of the Inflator Defect in Takata's airbags not later than 2008, when Honda first notified regulators of a problem with its Takata airbags. Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them.

930. By failing to disclose and by actively concealing the Inflator Defect in the Class Vehicles and/or the Defective Airbags installed in them, by marketing them as safe, reliable, and of high quality, and by presenting themselves as reputable manufacturers that value safety, Defendants engaged in unfair or deceptive business practices in violation of the North Carolina UDTPA. Defendants deliberately withheld the information about the propensity of the Defective Airbags to aggressively deploy, and/or violently explode and spray vehicle occupants with lethal amounts of metal debris and shrapnel, instead of protecting vehicle occupants from bodily injury during accidents, in order to ensure that the Class Vehicles were purchased.

931. In the course of Defendants' business, they willfully failed to disclose and actively concealed the dangerous risks posed by the many safety issues and serious defect discussed above. Defendants compounded the deception by repeatedly asserting that the Class Vehicles and/or the Defective Airbags installed in them were safe, reliable, and of high quality, and by claiming to be reputable manufacturers that value safety.

932. Defendants' unfair or deceptive acts or practices, including these concealments, omissions, and suppressions of material facts, had a tendency or capacity to mislead, tended to create a false impression in purchasers, were likely to and did in fact deceive reasonable purchasers, including Weaver, Young's, and the North Carolina Automotive Recycler Class, about the true safety and reliability of Class Vehicles and/or the Defective Airbags installed in them, the quality of Defendants' brands, and the true value of the Class Vehicles.

933. Defendants intentionally and knowingly misrepresented material facts regarding the Class Vehicles and/or the Defective Airbags installed in them with an intent to mislead Weaver, Young's, and the North Carolina Automotive Recycler Class.

934. Defendants knew or should have known that their conduct violated the North Carolina UDTPA.

935. As alleged above, Defendants made material statements about the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them that were either false or misleading. Defendants' representations, omissions, statements, and commentary have included selling and marketing the Class Vehicles as "safe" and "reliable," despite their knowledge of the Inflator Defect or their failure to reasonably investigate it.

936. To protect their profits and to avoid remediation costs and a public relations nightmare, Defendants concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them and their tragic consequences, and allowed Weaver, Young's, and the North Carolina Automotive Recycler Class members to continue the resale of highly dangerous vehicles and vehicle parts.

937. Defendants owed Weaver, Young's, and the North Carolina Automotive Recycler Class a duty to disclose the true safety and reliability of the Class Vehicles and/or the Defective

Airbags installed in them because Defendants:

- a. Possessed exclusive knowledge of the dangers and risks posed by the foregoing;
- b. Intentionally concealed the foregoing from Weaver, Young's and the North Carolina Automotive Recycler Class; and/or
- c. Made incomplete representations about the safety and reliability of the foregoing generally, while purposefully withholding material facts from Weaver, Young's, and the North Carolina Automotive Recycler Class that contradicted these representations.

938. Because Defendants fraudulently concealed the Inflator Defect in Class Vehicles and/or the Defective Airbags installed in them, resulting in a raft of negative publicity once the Inflator Defect finally began to be disclosed, the value of the Class Vehicles has greatly diminished. In light of the stigma attached to Class Vehicles by Defendants' conduct, they are now worth significantly less than they otherwise would be.

939. Defendants' failure to disclose and active concealment of the dangers and risks posed by the Defective Airbags in Class Vehicles were material to Weaver, Young's, and the North Carolina Automotive Recycler Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

940. Weaver, Young's and the North Carolina Automotive Recycler Class suffered ascertainable loss caused by Defendants' misrepresentations and their failure to disclose material information. Had they been aware of the Inflator Defect that existed in the Class Vehicles and/or the Defective Airbags installed in them, and Defendants' complete disregard for safety, Weaver, Young's, and the North Carolina Automotive Recycler Class either would have paid less for

their vehicles or would not have purchased or leased them at all. Weaver, Young's, and the North Carolina Automotive Recycler Class did not receive the benefit of their bargain as a result of Defendants' misconduct.

941. Weaver, Young's, and the North Carolina Automotive Recycler Class risk irreparable injury as a result of Defendants' acts and omissions in violation of the North Carolina Act, and these violations present a continuing risk to Weaver, Young's, and the North Carolina Automotive Recycler Class, as well as to the general public. Defendants' unlawful acts and practices complained of herein affect the public interest. The recalls and repairs instituted by Defendants have not been adequate.

942. As a direct and proximate result of Defendants' violations of the North Carolina UDTPA, Weaver, Young's, and the North Carolina Automotive Recycler Class have suffered injury-in-fact and/or actual damage.

943. Weaver, Young's, and members of the North Carolina Automotive Recycler Class seek punitive damages against Defendants because Defendants' conduct was malicious, willful, reckless, wanton, fraudulent, and in bad faith.

944. Defendants fraudulently and willfully misrepresented the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them, deceived Weaver, Young's, and North Carolina Automotive Recycler Class on life-or-death matters, and concealed material facts that only Defendants knew, all to avoid the expense and public relations nightmare of correcting the myriad flaws in the Class Vehicles and/or the Defective Airbags installed in them. Because Defendants' conduct was malicious, willful, reckless, wanton, fraudulent, and in bad faith, it warrants punitive damages.

945. Weaver, Young's, and the North Carolina Automotive Recycler Class seek an order for treble their actual damages, an order enjoining Defendants' unlawful acts, costs of Court, attorney's fees, and any other just and proper relief available under the North Carolina UDTPA, N.C. Gen. Stat. § 75-16.

COUNT 26

Violation of the Tennessee Consumer Protection Act Tenn. Code Ann. §§ 47-18-101, *et seq.*

946. This claim is brought by Knox individually and on behalf of the Tennessee Automotive Recycler Class against all Defendants.

947. Knox and the Tennessee Automotive Recycler Class members are "consumers" within the meaning of Tennessee Consumer Protection Act, Tenn. Code § 47-18-103(2).

948. The Tennessee Consumer Protection Act ("TCPA") prohibits "unfair or deceptive acts or practices affecting the conduct of any trade or commerce." Tenn. Code Ann. § 47-18-104(b). Defendants have committed unfair or deceptive acts or practices affecting the conduct of any trade or commerce.

949. Defendants also violated the TCPA by: (1) representing that the Class Vehicles and/or the Defective Airbags installed in them have characteristics, uses, or benefits which they do not have; (2) representing that they are of a particular standard, quality, and grade when they are not; (3) advertising them with the intent not to sell them as advertised; and (4) using statements or illustrations in advertisements which created a false impression of their grade, quality, value or usability.

950. In the course of their business, Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them as described herein and otherwise engaged in activities with a tendency or

capacity to deceive.

951. Defendants also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Class Vehicles and/or the Defective Airbags installed in them.

952. Takata has known of the Inflator Defect in its Defective Airbags since at least the 1990s. Prior to installing the Defective Airbags in their vehicles, the Vehicle Manufacturer Defendants knew or should have known of the Inflator Defect, because Takata informed them that the Defective Airbags contained the volatile and unstable ammonium nitrate and the Vehicle Manufacturer Defendants approved Takata's designs. In addition, Defendant Honda has known of the Inflator Defect in the Defective Airbags in Honda's vehicles since at least 2004. New Chrysler and the GM Defendants knew about the Inflator Defect from the moments of their inception in 2009, and the other Vehicle Manufacturer Defendants have known or should have known of the Inflator Defect in the Defective Airbags since at least 2008. Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them.

953. By failing to disclose and by actively concealing the Inflator Defect in the Class Vehicles and/or the Defective Airbags installed in them, by marketing them as safe, reliable, and of high quality, and by presenting themselves as reputable manufacturers that value safety, Defendants engaged in unfair or deceptive business practices in violation of the TCPA. Defendants deliberately withheld the information about the propensity of the Defective Airbags to aggressively deploy and/or violently explode and spray vehicle occupants with lethal amounts of metal debris and shrapnel, instead of protecting vehicle occupants from bodily injury during

accidents, in order to ensure the purchase of the Class Vehicles.

954. In the course of Defendants' business, they willfully failed to disclose and actively concealed the dangerous risks posed by the many safety issues and serious defect discussed above. Defendants compounded the deception by repeatedly asserting that the Class Vehicles and/or the Defective Airbags installed in them were safe, reliable, and of high quality, and by claiming to be reputable manufacturers that value safety.

955. Defendants' unfair or deceptive acts or practices, including these concealments, omissions, and suppressions of material facts, had a tendency or capacity to mislead, tended to create a false impression in purchasers, were likely to and did in fact deceive reasonable purchasers, including Plaintiff, about the true safety and reliability of Class Vehicles and/or the Defective Airbags installed in them, the quality of Defendants' brands, and the true value of the Class Vehicles.

956. Defendants intentionally and knowingly misrepresented material facts regarding the Class Vehicles and/or the Defective Airbags installed in them with an intent to mislead Knox and the Tennessee Automotive Recycler Class.

957. Defendants knew or should have known that their conduct violated the TCPA.

958. As alleged above, Defendants made material statements about the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them that were either false or misleading. Defendants' representations, omissions, statements, and commentary have included selling and marketing the Class Vehicles as "safe" and "reliable," despite their knowledge of the Inflator Defect or their failure to reasonably investigate it.

959. To protect their profits and to avoid remediation costs and a public relations nightmare, Defendants concealed the dangers and risks posed by the Class Vehicles and/or the

Defective Airbags installed in them and their tragic consequences, and allowed unsuspecting car purchasers to continue to buy the Class Vehicles, and allowed them to continue the resale of highly dangerous vehicles and vehicle parts.

960. Defendants owed Knox and the Tennessee Automotive Recycler Class a duty to disclose the true safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them because Defendants:

- a. Possessed exclusive knowledge of the dangers and risks posed by the foregoing;
- b. Intentionally concealed the foregoing from Knox and the Tennessee Automotive Recycler Class; and/or
- c. Made incomplete representations about the safety and reliability of the foregoing generally, while purposefully withholding material facts from Knox and the Tennessee Automotive Recycler Class that contradicted these representations.

961. Because Defendants fraudulently concealed the Inflator Defect in Class Vehicles and/or the Defective Airbags installed in them, resulting in a raft of negative publicity once the Inflator Defect finally began to be disclosed, the value of the Class Vehicles has greatly diminished. In light of the stigma attached to Class Vehicles by Defendants' conduct, they are now worth significantly less than they otherwise would be.

962. Defendants' failure to disclose and active concealment of the dangers and risks posed by the Defective Airbags in Class Vehicles were material to Knox and the Tennessee Automotive Recycler Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

963. Knox and the Tennessee Automotive Recycler Class suffered ascertainable loss

caused by Defendants' misrepresentations and their failure to disclose material information. Had they been aware of the Inflator Defect that existed in the Class Vehicles and/or the Defective Airbags installed in them, and Defendants' complete disregard for safety, automotive recyclers like Knox and the Tennessee Automotive Recycler Class would have paid less for their vehicles or would not have purchased them at all. Knox and the Tennessee Automotive Recycler Class members did not receive the benefit of their bargain as a result of Defendants' misconduct.

964. Knox and the Tennessee Automotive Recycler Class risk irreparable injury as a result of Defendants' acts and omissions in violation of the TCPA, and these violations present a continuing risk to Knox and the Tennessee Automotive Recycler Class members, as well as to the general public. Defendants' unlawful acts and practices complained of herein affect the public interest. The recalls and repairs instituted by Defendants have not been adequate.

965. As a direct and proximate result of Defendants' violations of the TCPA, Knox and the Tennessee Automotive Recycler Class have suffered injury-in-fact and/or actual damage.

966. Pursuant to Tenn. Code Ann. § 47-18-109(a), Knox and the Tennessee Automotive Recycler Class seek monetary relief against Defendants measured as actual damages in an amount to be determined at trial, treble damages for Defendants' knowing or willful violations of the TCPA, and any other just and proper relief available under the TCPA.

967. Plaintiffs also seek an order enjoining Defendants' unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under the TCPA.

COUNT 27

Violation of the Deceptive Trade Practices Act Tex. Bus. & Com. Code §§ 17.41, *et seq.*

968. This claim is brought by Snyder's individually and on behalf of the Texas

Automotive Recycler Class against all Defendants.

969. Snyder's and the Texas Automotive Recycler Class are individuals, partnerships and corporations with assets of less than \$25 million (or are controlled by corporations or entities with less than \$25 million in assets). *See* Tex. Bus. & Com. Code § 17.41.

970. The Texas Deceptive Trade Practices-Consumer Protection Act ("Texas DTPA") prohibits "[f]alse, misleading, or deceptive acts or practices in the conduct of any trade or commerce," Tex. Bus. & Com. Code § 17.46(a), and an "unconscionable action or course of action," Tex. Bus. & Com. Code § 17.45(5), which means "an act or practice which, to a consumer's detriment, takes advantage of the lack of knowledge, ability, experience, or capacity of the consumer to a grossly unfair degree," Tex. Bus. & Com. Code § 17.50(a)(3). Defendants have committed false, misleading, unconscionable, and deceptive acts or practices in the conduct of trade or commerce.

971. Defendants also violated the Texas DTPA by: (1) representing that the Class Vehicles and/or the Defective Airbags installed in them have characteristics, uses, benefits, and qualities which they do not have; (2) representing that they are of a particular standard, quality, and grade when they are not; (3) advertising them with the intent not to sell or lease them as advertised; and (4) failing to disclose information concerning them with the intent to induce others to purchase or lease them.

972. In the course of their business, Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them as described herein and otherwise engaged in activities with a tendency or capacity to deceive.

973. Defendants also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Class Vehicles and/or the Defective Airbags installed in them.

974. Takata has known of the Inflator Defect in its Defective Airbags since at least the 1990s. Prior to installing the Defective Airbags in their vehicles, the Vehicle Manufacturer Defendants knew or should have known of the Inflator Defect, because Takata informed them that the Defective Airbags contained the volatile and unstable ammonium nitrate and the Vehicle Manufacturer Defendants approved Takata's designs. In addition, Defendant Honda has known of the Inflator Defect in the Defective Airbags in Honda's vehicles since at least 2004. New Chrysler and the GM Defendants knew about the Inflator Defect from the moments of their inception in 2009, and the other Vehicle Manufacturer Defendants have known or should have known of the Inflator Defect in the Defective Airbags since at least 2008. Defendants failed to disclose and actively concealed the dangers and risks posed by the Class Vehicles and/or the Defective Airbags installed in them.

975. By failing to disclose and by actively concealing the Inflator Defect in the Class Vehicles and/or the Defective Airbags installed in them, by marketing them as safe, reliable, and of high quality, and by presenting themselves as reputable manufacturers that value safety, Defendants engaged in unfair or deceptive business practices in violation of the Texas DTPA. Defendants deliberately withheld the information about the propensity of the Defective Airbags to aggressively deploy and/or violently explode and spray vehicle occupants with lethal amounts of metal debris and shrapnel, instead of protecting vehicle occupants from bodily injury during accidents, in order to ensure the purchase of the Class Vehicles.

976. In the course of Defendants' business, they willfully failed to disclose and actively concealed the dangerous risks posed by the many safety issues and serious defect discussed above. Defendants compounded the deception by repeatedly asserting that the Class Vehicles and/or the Defective Airbags installed in them were safe, reliable, and of high quality, and by claiming to be reputable manufacturers that value safety.

977. Defendants' unfair or deceptive acts or practices, including these concealments, omissions, and suppressions of material facts, had a tendency or capacity to mislead, tended to create a false impression in purchasers, were likely to and did in fact deceive reasonable purchasers, including Snyder's and the Texas Automotive Recycler Class members, about the true safety and reliability of Class Vehicles and/or the Defective Airbags installed in them, the quality of Defendants' brands, and the true value of the recalled vehicles.

978. Defendants intentionally and knowingly misrepresented material facts regarding the Class Vehicles and/or the Defective Airbags installed in them with an intent to mislead Snyder's and the Texas Automotive Recycler Class.

979. Defendants knew or should have known that their conduct violated the Texas DTPA.

980. As alleged above, Defendants made material statements about the safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them that were either false or misleading. Defendants' representations, omissions, statements, and commentary have included selling and marketing the Class Vehicles as "safe" and "reliable," despite their knowledge of the Inflator Defect or their failure to reasonably investigate it.

981. To protect their profits and to avoid remediation costs and a public relations nightmare, Defendants concealed the dangers and risks posed by the Class Vehicles and/or the

Defective Airbags installed in them and their tragic consequences, and allowed unsuspecting car purchasers to continue to buy the Class Vehicles, and allowed them to continue the resale of highly dangerous vehicles and vehicle parts.

982. Defendants owed Snyder's and the Texas Automotive Recycler Class a duty to disclose the true safety and reliability of the Class Vehicles and/or the Defective Airbags installed in them because Defendants:

- a. Possessed exclusive knowledge of the dangers and risks posed by the foregoing;
- b. Intentionally concealed the foregoing from Snyder's and the Texas Automotive Recycler Class; and/or
- c. Made incomplete representations about the safety and reliability of the foregoing generally, while purposefully withholding material facts from Snyder's and the Texas Automotive Recycler Class that contradicted these representations.

983. Because Defendants fraudulently concealed the Inflator Defect in Class Vehicles and/or the Defective Airbags installed in them, resulting in a raft of negative publicity once the Inflator Defect finally began to be disclosed, the value of the Class Vehicles has greatly diminished. In light of the stigma attached to Class Vehicles by Defendants' conduct, they are now worth significantly less than they otherwise would be.

984. Defendants' failure to disclose and active concealment of the dangers and risks posed by the Defective Airbags in Class Vehicles were material to Snyder's and the Texas Automotive Recycler Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

985. Snyder's and the Texas Automotive Recycler Class suffered ascertainable loss caused by Defendants' misrepresentations and their failure to disclose material information. Had they been aware of the Inflator Defect that existed in the Class Vehicles and/or the Defective Airbags installed in them, and Defendants' complete disregard for safety, automotive recyclers like Plaintiff and the Texas Automotive Recycler Class would have paid less for their vehicles or would not have purchased them at all. Snyder's and the Texas Automotive Recycler Class did not receive the benefit of their bargain as a result of Defendants' misconduct.

986. Snyder's and the Texas Automotive Recycler Class risk irreparable injury as a result of Defendants' acts and omissions in violation of the Texas DTPA, and these violations present a continuing risk to Snyder's and the Texas Automotive Recycler Class, as well as to the general public. Defendants' unlawful acts and practices complained of herein affect the public interest. The recalls and repairs instituted by Defendants have not been adequate.

987. As a direct and proximate result of Defendants' violations of the Texas DTPA, Snyder's and the Texas Automotive Recycler Class have suffered injury-in-fact and/or actual damage.

988. Pursuant to Tex. Bus. & Com. Code § 17.50(a)(1) and (b), Snyder's and the Texas Automotive Recycler Class seek monetary relief against Defendants measured as actual damages in an amount to be determined at trial, treble damages for Defendants' knowing violations of the Texas DTPA, and any other just and proper relief available under the Texas DTPA.

989. For those Texas Automotive Recycler Class members who wish to rescind their purchases, they are entitled under Tex. Bus. & Com. Code § 17.50(b)(4) to rescission and other relief necessary to restore any money or property that was acquired from them based on violations of the Texas DTPA.

990. Snyder's and the Texas Automotive Recycler Class also seek court costs and attorneys' fees under § 17.50(d) of the Texas DTPA.

991. In accordance with Tex. Bus. & Com. Code § 17.505(a), Defendants are on notice of their alleged violations of the Texas DTPA relating to the Class Vehicles and/or the Defective Airbags installed in them purchased by Snyder's and the Texas Automotive Recycler Class. Snyder's demanded that Defendants correct or agree to correct the actions described herein. Defendants have failed to do so.

PRAYER FOR RELIEF

Plaintiffs, on behalf of themselves and all others similarly situated, request the Court to enter judgment against Defendants, as follows:

A. An order certifying the proposed Classes, designating Plaintiffs as the named representatives of the Classes, designating the undersigned as Class Counsel, and making such further orders for the protection of Class members as the Court deems appropriate, under Fed. R. Civ. P. 23;

B. A declaration that the airbags in Class Vehicles are defective;

C. An order enjoining Defendants to desist from further deceptive distribution and with respect to the Class Vehicles and such other injunctive relief that the Court deems just and proper;

D. An award to Plaintiffs and Class Members of compensatory, exemplary, and punitive remedies and damages and statutory penalties, including interest, in an amount to be proven at trial;

E. An award to Plaintiffs and Class Members for the return of the purchase price of the Class Vehicles and/or the defective airbags, with interest from the time it was paid, for the

reimbursement of the reasonable expenses occasioned by the purchase, for damages and for reasonable attorney fees;

F. A Defendant-funded program, using transparent, consistent, and reasonable protocols, under which out-of-pocket and loss-of-use expenses and damages claims associated with the Defective Airbags in Plaintiffs' and Class Members' Class Vehicles, can be made and paid, such that Defendants, not the Class Members, absorb the losses and expenses fairly traceable to the recall of the vehicles and correction of the Defective Airbags;

G. A declaration that Defendants must disgorge, for the benefit of Plaintiffs and Class Members, all or part of the ill-gotten profits they received from the sale of the Class Vehicles, or make full restitution to Plaintiffs and Class Members;

H. An award of attorneys' fees and costs, as allowed by law;

I. An award of prejudgment and post-judgment interest, as provided by law;

J. Leave to amend this Complaint to conform to the evidence produced at trial; and

K. Such other relief as may be appropriate under the circumstances.

DEMAND FOR JURY TRIAL

Pursuant to Rule 38(b) of the Federal Rules of Civil Procedure, Plaintiffs demand a jury trial as to all issues triable by a jury.
